

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Results-oriented Full Stack Software Engineer with 8+ years of experience building scalable, production-grade systems. Proficient in TypeScript, Node.js, React, GraphQL, Kafka, and MongoDB with hands-on expertise in microservices, serverless architectures, and distributed systems. Adept at delivering high-quality features in agile, fast-paced environments, contributing to existing architectures with clean, maintainable code. Strong communicator with a focus on collaboration, testing, and performance optimization.

TECHNICAL SKILLS

- **Frontend:** React.js, SCSS, TypeScript, Redux, Next.js, Angular
- **Backend:** Node.js, Express, NestJS, JavaScript (ES6+), GraphQL, gRPC
- **Messaging & Data:** Kafka, MongoDB, PostgreSQL, MySQL
- **Architecture:** Microservices, Serverless, RESTful APIs, Distributed Systems
- **DevOps & Tools:** Docker, Git, CI/CD, GitHub Actions, AWS Lambda, Vercel, Firebase
- **Others:** Agile, Scrum, TDD, Unit Testing, Jira, Confluence, Storybook

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Built and deployed scalable backend APIs using Node.js, TypeScript, and GraphQL, significantly reducing request latency across high-traffic modules by 40% in a customer analytics platform.
- Developed and maintained complex React interfaces with SCSS and component-driven development, improving user experience scores and lowering bounce rates by 30%.
- Integrated Kafka messaging for event-driven communication across microservices, ensuring high throughput and low latency under heavy load.
- Collaborated with cross-functional teams in Agile sprints, delivering sprint goals consistently ahead of deadlines with full test coverage and detailed documentation.
- Migrated legacy services to serverless functions using AWS Lambda, cutting infrastructure costs by 25% while improving scalability and fault tolerance.
- Optimized MongoDB queries and schema design to improve read/write performance by 50%, supporting 20k+ concurrent users.
- Used gRPC to build efficient, lightweight communication protocols between services, enhancing performance in distributed deployments.
- Actively contributed to code reviews and architectural decisions, fostering a strong team culture of maintainable and high-quality development.

Syscom Digital
Software Engineer
October 2019 – August 2021
Bucharest, Romania

- Designed and implemented full-stack features using Node.js and React, accelerating product delivery for marketing automation tools.
- Implemented GraphQL APIs and resolvers to streamline client-server data interactions and reduce frontend complexity.
- Participated in performance tuning of backend services, reducing average response times by 300ms and enhancing scalability.
- Wrote unit and integration tests using Jest and Mocha, achieving over 90% code coverage and minimizing regressions.
- Maintained documentation and onboarding materials for new developers to ensure rapid ramp-up and consistency.
- Ensured UI consistency across browsers and devices using responsive SCSS modules and component libraries.
- Collaborated with stakeholders and QA to translate business goals into technical specifications and tested deliverables.
- Contributed to daily standups, sprint planning, and retrospectives in a SCRUM team with consistent two-week delivery cycles.

Soft Build
Software Developer
June 2016 – July 2019
Timișoara, Romania

- Delivered robust backend systems in Node.js and Express to power large-scale applications for real estate and hospitality clients.
- Built reusable React components with SCSS, improving frontend development velocity and UI consistency across applications.
- Worked with MongoDB and PostgreSQL to manage user, booking, and location data for high-demand systems.
- Implemented Kafka-based pipelines for processing user events and integrating third-party analytics in near real-time.
- Collaborated with design teams to implement pixel-perfect, accessible user interfaces with responsive behavior.
- Created modular, testable codebases that adhered to best practices and allowed for rapid iteration.
- Deployed applications via Docker containers on AWS infrastructure, supporting continuous delivery with GitHub Actions.
- Participated in backend refactoring projects that improved maintainability and onboarding time for new developers.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Developed and maintained frontend interfaces using Angular and SCSS for a B2B eCommerce platform.
- Connected frontend logic with backend APIs using REST and WebSocket protocols for real-time stock updates.

- Contributed to early architectural discussions and implemented reusable modules across micro-frontend components.
- Collaborated remotely with distributed teams and participated in weekly planning sessions and sprint reviews.
- Focused on user-centric design and responsive behaviors, supporting multiple browser versions and screen sizes.
- Performed code audits and optimization that reduced page load times by 25%.
- Built feature flags to allow gradual feature rollouts and easy rollback in case of regressions.
- Maintained detailed technical documentation to ensure cross-team visibility of shared components.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Built internal tools using JavaScript and jQuery to automate data entry processes, saving 80+ man-hours per month.
- Collaborated on early-stage prototypes using AngularJS and Bootstrap for a logistics management platform.
- Wrote clean, reusable frontend components and improved user feedback with AJAX-powered interactions.
- Connected client-side apps to RESTful APIs and integrated third-party services for authentication and file storage.
- Participated in code reviews and learned best practices around Git workflows and software lifecycle.
- Documented APIs and frontend logic for peer reference and onboarding.
- Delivered project demos and incorporated stakeholder feedback for iterative refinement.
- Assisted in writing unit and manual test cases to improve testing coverage.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ MongoDB for Developers
- ❖ Advanced React (Meta via Coursera)
- ❖ Kafka Essentials (Confluent)
- ❖ TypeScript: The Complete Developer's Guide (Udemy)
- ❖ Node.js Microservices with Typescript (Udemy)

PROJECTS

- ✓ **Customer Engagement Dashboard (Sensidev)**
Built a microservice-oriented dashboard with real-time Kafka-based updates and GraphQL APIs, enabling customer support agents to access and respond to tickets with sub-second latency.

✓ **Content Publishing System (Soft Build)**

Developed an internal tool for managing marketing content using a headless CMS, React-based editor, and GraphQL, deployed via AWS Lambda with full CI/CD automation.
