

# CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com  
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-866410383/> | Phone Number: +372 58619311

## PROFESSIONAL SUMMARY

Detail-oriented Fullstack Developer with 9+ years of experience delivering robust, scalable web applications using Node.js, React.js, and TypeScript. Proven ability to lead end-to-end software development including RESTful API design, cloud deployments with AWS, and high-performance UI implementations. Adept in agile environments and highly collaborative across cross-functional teams. Passionate about secure, maintainable, and high-quality code.

## TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3
- **Frontend:** React.js, Redux, Next.js, Vue.js, Angular
- **Backend:** Node.js, Express.js, NestJS, RESTful API, GraphQL
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, RDS), Docker, GitHub Actions, GitLab CI/CD, CloudFormation
- **Tools & Platforms:** Git, Jira, Bitbucket, Figma, Storybook, Postman
- **Other:** Responsive UI/UX Design, Microservices Architecture, Agile Scrum, Test Automation (Jest, Cypress)

## WORK EXPERIENCE

### Sensidev

#### Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Developed and maintained scalable backend services using Node.js and Express.js, supporting high-throughput applications across healthcare and e-commerce domains.
- Designed dynamic and responsive UI components in React.js using TypeScript, ensuring accessibility and pixel-perfect fidelity to Figma designs.
- Built and documented RESTful APIs integrated with PostgreSQL databases, handling data models, indexing, and query optimization.
- Deployed serverless functions and backend services using AWS Lambda and EC2, streamlining cloud-based performance and reliability.
- Integrated OAuth-based authentication and authorization flows to secure frontend and backend services across multiple user roles.
- Participated in sprint planning, architectural design discussions, and code reviews, contributing to a high-performance agile team.

- Refactored legacy codebases to use microservices architecture, improving modularity and deployment speed across CI/CD pipelines.
- Implemented Docker-based containerization workflows with automated testing and deployment using GitHub Actions.

## **Syscom Digital**

### **Software Engineer**

**October 2019 – August 2021**

Bucharest, Romania

- Engineered fullstack applications using Node.js and React.js, supporting B2B marketing platforms with real-time data processing and analytics.
- Built custom dashboards and components with reusable UI patterns, improving maintainability and reducing feature delivery time by 30%.
- Integrated third-party services such as Google APIs and analytics tools to enhance campaign performance tracking.
- Created database schemas and migrations for PostgreSQL systems, ensuring referential integrity and efficient query performance.
- Participated in DevOps setup for AWS S3, EC2, and RDS services to manage scalable infrastructure for growing user bases.
- Conducted regular peer code reviews and implemented linting/formatting standards to maintain consistent code quality.
- Collaborated with designers and stakeholders to translate business requirements into precise technical features.
- Managed releases and hotfixes using GitFlow, ensuring stable deployments across environments.

## **Soft Build**

### **Software Developer**

**June 2016 – July 2019**

Timișoara, Romania

- Contributed to the development of internal tools and client-facing dashboards using JavaScript, Vue.js, and Express.js.
- Created detailed functional specs and user flows for new feature implementations across frontend and backend systems.
- Maintained application performance and security by addressing bottlenecks, fixing vulnerabilities, and performing code refactors.
- Integrated PostgreSQL with ORMs and raw SQL queries, developing business-critical reporting tools.
- Worked closely with QA teams to implement test strategies and resolve regression issues in CI pipelines.
- Developed UI components with responsiveness in mind, supporting both desktop and mobile platforms.
- Trained junior developers and participated in pair programming to improve onboarding and knowledge sharing.
- Deployed and managed environments on AWS with monitoring tools like CloudWatch and custom alerts.

## **Decima Digital**

### **Software Developer**

**November 2015 – April 2016**

Tallinn, Estonia

- Supported the development of client-side applications using AngularJS and REST APIs backed by Node.js.
- Developed reusable UI libraries for integration across multiple client websites and internal tools.
- Delivered bug fixes and feature enhancements through structured Agile sprints and bi-weekly reviews.
- Helped implement Git-based workflows and issue tracking via Jira for the dev team.
- Collaborated with UX teams to improve navigation structure and user flows across key web products.
- Integrated payment systems and subscription management modules into e-commerce portals.
- Created REST API endpoints for mobile app integrations using Node.js and MongoDB.
- Delivered code and documentation for handover to maintenance teams.

## **Borna Technology**

### **Software Developer Intern**

**September 2014 – August 2015**

Tallinn, Estonia

- Developed internal web tools and assisted in bug fixing across Angular and Node.js applications.
- Built modular HTML and CSS components with SCSS, improving theming and responsive behavior.
- Helped design database schemas for small-scale web tools using MySQL.
- Participated in daily stand-ups and documented internal development processes.
- Wrote testing scripts using Jasmine and performed unit testing for various modules.
- Supported backend developers with API testing and data setup for QA environments.
- Engaged in learning best practices around secure coding and data validation.
- Delivered a project optimizing customer feedback collection via digital forms.

---

## **EDUCATION**

### **Tallinn University**

Bachelor's Degree in Computer Science,

**2010 – 2014**

---

## **CERTIFICATIONS**

- ❖ AWS Certified Developer – Associate
- ❖ Certified JavaScript Developer (CIW)
- ❖ PostgreSQL for Developers – LinkedIn Learning
- ❖ Node.js Microservices – Udemy
- ❖ React & TypeScript Advanced – Coursera

---

## **PROJECTS**

- ✓ **SmartHealth Platform**  
Built a full-stack application using React.js and Node.js for a digital health company. Integrated AWS Lambda and RDS for cost-effective scaling. Handled multi-role authentication and responsive UI.

✓ **EcomDash Dashboard**

Developed a scalable e-commerce analytics dashboard using React, Express, and PostgreSQL. Delivered microservice backend for product analytics and order tracking.

✓ **AWS Auto-Deploy Pipelines**

Built CI/CD pipelines with GitHub Actions and AWS CloudFormation for automated deployments of containerized React + Node applications.
