PROFESSIONAL SUMMARY

Detail-oriented and delivery-focused Full-Stack Developer with 8+ years of professional experience developing scalable, cross-platform web and mobile applications using Node.js, React, and TypeScript. Proven track record in building robust backend APIs, architecting secure and maintainable codebases, and delivering responsive UI/UX for both web and mobile environments. Skilled in SQL/NoSQL databases, testing, CI/CD, and Agile workflows. Passionate about cloud-native technologies and continuous improvement in development practices.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, Node.js, React, React Native, Express.js, Next.js, HTML5, CSS3, SASS
- **Backend & APIs:** RESTful API design, Firebase, Google Cloud Functions, Cloud Firestore, GraphQL (basic)
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase Realtime DB
- **DevOps & Tools:** Git, GitHub, GitLab, Docker, CI/CD pipelines, GCP, Vercel, Firebase Hosting
- **Testing:** Jest, Cypress, Detox (E2E), React Testing Library, Postman
- **Practices:** Agile/Scrum, TDD, A/B Testing, Clean Code, Component-based Architecture, Performance Optimization

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed and maintained multiple end-to-end full-stack applications using Node.js and React, ensuring optimal responsiveness and scalability across web and mobile platforms.
- Engineered scalable REST APIs and cloud-native functions in Node.js using Firebase Functions, integrating deeply with Firestore and other GCP services.
- Delivered cross-platform mobile features with React Native, including offline support, real-time updates, and push notifications using Firebase Cloud Messaging.
- Led architectural improvements and code refactors for legacy systems to modernize codebase using TypeScript and modular design patterns.
- Spearheaded performance tuning and load testing, reducing backend response time by over 40% across critical endpoints.

- Mentored junior developers on full-stack practices, code review processes, and CI/CD pipeline maintenance using GitLab and Docker.
- Integrated Firebase Auth and Firestore security rules to enhance user data isolation and ensure secure access controls.
- Conducted rigorous unit and integration testing with Jest and Cypress, reaching over 90% test coverage on all critical services.
- Acted as liaison between design and development teams to translate complex business logic into interactive and intuitive UIs.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Built and deployed React-based SPAs communicating with Node.js backends, enhancing user interaction and admin dashboards for marketing analytics systems.
- Developed reusable backend modules in Express.js to manage data ingestion from IoT devices, social media APIs, and third-party CRMs.
- Collaborated with mobile developers to bridge native functionalities using React Native modules, improving overall cross-platform parity.
- Designed PostgreSQL schemas and implemented optimized stored procedures to streamline reporting queries for campaign data.
- Introduced Git branching strategies and pre-commit linting, reducing merge conflicts and improving team development velocity.
- Implemented end-to-end monitoring using Google Cloud Logging and Alerts for backend API services, ensuring high availability.
- Participated in regular Agile ceremonies and worked closely with product owners to align features with customer goals and KPIs.
- Wrote detailed technical documentation for API usage, environment setup, and onboarding processes to streamline team scalability.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Designed and deployed multi-tenant SaaS solutions with secure user separation using Node.js and Firebase for authentication and access control.
- Developed mobile-first UI components with React, React Native, and Redux Toolkit, focusing on seamless cross-device UX.
- Integrated payment gateways (Stripe, PayPal) and order tracking for e-commerce clients, increasing transaction reliability and decreasing support tickets.
- Built analytics dashboards powered by MongoDB aggregation pipelines and REST APIs, delivering business insights to clients in real-time.
- Automated deployment workflows with GitLab CI/CD and Docker containers, reducing manual setup and delivery time by 60%.
- Migrated legacy PHP applications to full-stack JavaScript using modern tooling and cloud-native hosting solutions like Firebase Hosting.
- Proactively optimized frontend bundle sizes and introduced lazy loading techniques to improve page load speeds by 45%.
- Wrote automated tests and visual regression tests using Cypress and React Testing Library, identifying bugs earlier in the release cycle.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Created responsive web interfaces using React and Redux for a digital asset management system, integrating backend APIs for metadata search.
- Developed RESTful services in Node.js to support high-throughput file uploads and secure media streaming.
- Built Firebase-based real-time collaboration tools for internal teams, allowing concurrent user editing of shared content.
- Configured ESLint and Prettier to enforce consistent code style and reduce post-merge code issues.
- Refactored inefficient MongoDB queries leading to a 30% decrease in latency across reporting modules.
- Contributed to Docker-based microservice architecture and tested container orchestration on GCP App Engine.
- Worked closely with QA teams to improve test automation pipelines using Jest and Postman collections for regression testing.
- Delivered training on Git workflows to junior developers, ensuring consistent usage of rebase, squash, and conflict resolution.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in building a CRM system using Node.js and MySQL, supporting basic user management, lead tracking, and campaign reporting.
- Implemented frontend components in AngularJS and gradually transitioned parts of the app to React.
- Wrote utility scripts for data import/export from CSV into relational databases, ensuring data consistency.
- Improved API security by integrating OAuth2 and HTTPS-based token validation.
- Wrote technical documentation and contributed to internal wiki pages on best practices in version control and REST API design.
- Performed unit and integration testing using Mocha and Chai for backend services and utility libraries.
- Created shell scripts for environment setup and local database cloning to accelerate new developer onboarding.
- Worked closely with product managers to debug client-facing issues and deliver hotfixes on tight deadlines.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ **Google Cloud Digital Leader** – Google (2023)
 - ❖ **Full-Stack Web Development with React** – Coursera, Hong Kong University of Science and Technology (2022)
 - ❖ **Firebase for Web and Mobile Apps** – Udemy (2021)
 - ❖ **TypeScript Deep Dive** – Pluralsight (2021)
-

PROJECTS

- ✓ **SmartLogix – Mobile Logistics Suite**
Led backend and mobile development of a fleet tracking system using React Native, Node.js, and Firebase Cloud Functions; supported offline sync and real-time driver location updates via Firestore and Maps SDK.
- ✓ **HealthConnect – Telemedicine Platform**
Built cross-platform patient booking and video consultation platform using Node.js, PostgreSQL, and React; integrated CI/CD pipelines and secure JWT-based auth for role-based access.
- ✓ **EduMate – Online Tutoring App**
Developed educational mobile app with React Native and Firebase backend; handled lesson scheduling, in-app chat, and push notifications with FCM.
