

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Creative and performance-oriented Full Stack Developer with 8+ years of experience designing, building, and optimizing scalable, maintainable web applications in mission-driven environments. Adept in building end-to-end systems with Node.js, Vue.js, and TypeScript, including experience with NoSQL and SQL databases. Passionate about Tech for Good, contributing to projects with strong ethical, environmental, or social impact.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3, Python, SQL, Bash
- **Frontend:** Vue.js, Nuxt.js, Vuex, Pinia, Vuetify, Quasar, React, Next.js, Tailwind CSS, Bootstrap, Material UI
- **Backend:** Node.js, Express.js, NestJS, REST API, GraphQL, JWT, OAuth2, Firebase Functions
- **Databases:** MongoDB, Firebase Firestore, PostgreSQL, MySQL, Redis
- **DevOps & Cloud:** Docker, GitHub Actions, GitLab CI/CD, Vercel, Netlify, Firebase, Heroku, AWS EC2
- **Testing:** Jest, Mocha, Chai, Cypress, Puppeteer, ESLint, Prettier, Istanbul (nyc)
- **Tools:** Git, GitHub, GitLab, Bitbucket, Postman, Swagger, Insomnia, VS Code, Figma
- **Architecture:** Microservices, Serverless, MVC, Modular Monolith, Domain-Driven Design (DDD)
- **Other:** WebSockets, i18n/l10n, SEO Optimization, Performance Tuning, Accessibility (WCAG)

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led the design and full-stack development of progressive web apps using Vue.js (Composition API), Node.js, and Firebase, supporting real-time interaction and scalable architecture.
- Built microservices with Express and integrated NoSQL (MongoDB, Firebase Firestore) to optimize data flows for mission-driven education platforms.
- Developed reusable UI components using TypeScript and Storybook, improving consistency across design systems and reducing code duplication.
- Integrated complex REST APIs and real-time communication via WebSockets, increasing application responsiveness for data-heavy dashboards.
- Spearheaded the migration of legacy front-end codebases from jQuery to Vue.js, reducing page load times by 38% and modernizing development workflows.
- Architected cloud functions on Firebase to process background tasks, data syncing, and authentication flows, boosting system reliability.

- Introduced CI/CD pipelines using GitHub Actions, enabling faster and safer deployment cycles while maintaining strong test coverage.
- Mentored junior developers in advanced Vue/TypeScript practices, contributing to a 20% reduction in PR rework and faster onboarding.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed and maintained full-stack features for digital marketing automation tools using Node.js backend and Vue.js frontend.
- Engineered secure, RESTful APIs with JWT authentication and integrated external marketing data providers to enrich campaign analytics.
- Improved campaign delivery logic and performance using Redis-based caching and optimized database queries in MongoDB.
- Refactored Vue components to TypeScript, enforcing static typing and reducing runtime errors across the codebase by 30%.
- Created custom dashboards for clients using Vue.js, Charts.js, and RESTful API endpoints for real-time KPIs and metrics.
- Implemented logging and alerting system using Sentry and custom error middleware, enabling proactive debugging and faster recovery.
- Coordinated cross-functional releases, collaborating with designers, QA engineers, and data analysts to ensure timely delivery of features.
- Built AB testing and segmentation modules that increased user engagement by 18% through personalized content delivery.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Contributed to development of B2B and SaaS platforms using Node.js, Vue.js, and Bootstrap for a range of clients in logistics and real estate.
- Designed NoSQL schemas to support flexible, document-based data models for dynamic form generation and workflow management.
- Developed modular services using Node.js and Express, connecting to MongoDB and Firebase backends for real-time updates and storage.
- Enhanced Vue components with Vuex state management to streamline data synchronization and improve user interactions.
- Integrated third-party services like Stripe, SendGrid, and Twilio, supporting automated billing, email workflows, and SMS alerts.
- Championed code quality improvements with ESLint, Prettier, and Git hooks, reducing formatting issues and improving team collaboration.
- Conducted performance tuning on Vue apps, employing lazy loading and server-side rendering to boost Lighthouse scores above 90.
- Participated in Agile ceremonies, product planning, and backlog grooming with cross-border teams using Jira and Confluence.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Collaborated on custom CMS platform development using Vue.js for the frontend and Node.js for content workflows.
- Introduced form validation and multi-step wizards with Vue.js, simplifying content creation flows for non-technical users.
- Built REST API endpoints for custom data entities and admin functionalities using Express and MongoDB.
- Implemented user access roles and content restrictions based on permission levels, improving CMS flexibility for enterprise clients.
- Integrated image optimization and CDN delivery to reduce page load size, resulting in 2x faster content access.
- Created custom component library with SCSS and Vue CLI to standardize UI/UX across client projects.
- Automated data backups and error reporting in staging environments using Node.js cron jobs and mail alerts.
- Assisted with DevOps tasks such as deployment to Netlify and Heroku with staging and production pipelines.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Developed internal tools using Node.js and jQuery to streamline daily QA and data entry tasks for engineers.
- Designed and implemented single-page dashboards with D3.js and charting libraries for device monitoring.
- Automated browser testing scenarios with Selenium, helping reduce manual testing workload by 25%.
- Participated in agile sprints, providing bug fixes, prototype testing, and documentation support.
- Created RESTful endpoints for feedback form submissions and user reports, storing results in MongoDB.
- Improved script reusability by introducing modular JavaScript design patterns to legacy codebase.
- Contributed to daily standups and sprint reviews, gaining valuable experience in remote team workflows.
- Demonstrated rapid skill development and became the go-to intern for front-end debugging tasks.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ MongoDB for JavaScript Developers – MongoDB University
- ❖ Full Stack Web Development with Vue.js and Node – Coursera
- ❖ TypeScript Fundamentals – Pluralsight
- ❖ Agile with Atlassian Jira – Coursera

PROJECTS

- ✓ **Social Impact Fund Platform** – Sensidev
Built a scalable platform using Vue.js and Node.js to help social entrepreneurs manage grant applications and impact metrics. Integrated secure file uploads and real-time dashboards.
- ✓ **GreenFleet Tracker** – Freelance
Developed a web app to monitor fuel and emission metrics using GPS and NoSQL backend. Used Vue.js for UI, Node.js for backend APIs, and Firebase for real-time syncing and hosting.
- ✓ **EduMatch** – Syscom Digital
Created a platform matching tutors and students for underserved communities. Built core backend matching logic in Node.js and developed UI with Vue and Vuetify.
