

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Experienced and detail-driven Senior Software Developer with over 9 years of backend expertise, specializing in scalable PHP applications, ERP systems, and AI integrations. Proven ability to drive performance in remote, multicultural teams and deploy intelligent solutions with LLMs using LangChain and Hugging Face. Seeking to contribute to cutting-edge innovation at SPACE44 by building performant, maintainable backend systems with AI-enhanced capabilities.

TECHNICAL SKILLS

- **Languages:** PHP, JavaScript, TypeScript, SQL, HTML, CSS
- **Frameworks/Libraries:** Laravel, Symfony, React, Vue.js, Node.js, LangChain
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools:** Git, Docker, Jenkins, GitHub Actions, JIRA, Webpack, Postman
- **AI & LLMs:** Hugging Face, OpenAI APIs, LangChain, Gemini, GitHub Copilot
- **Cloud & DevOps:** AWS (EC2, S3), Azure, DigitalOcean, NGINX
- **Other:** REST APIs, Microservices, ERP Systems, OOP, MVC, TDD, CI/CD, Agile/Scrum

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Architected and developed backend modules using PHP and Laravel for B2B and ERP clients, focusing on scalability, security, and long-term maintainability.
- Led the integration of GPT-based services into proprietary platforms, automating summarization and content generation workflows for enterprise clients.
- Deployed LLM-based APIs using Hugging Face Transformers and LangChain, streamlining AI pipeline orchestration across backend services.
- Designed and optimized MySQL and PostgreSQL queries for large-scale reporting and analytics modules, ensuring sub-second latency performance.
- Orchestrated Dockerized environments and CI/CD pipelines on GitHub Actions to ensure reliable and testable backend releases.
- Oversaw code quality through regular peer reviews and Git-based workflows, enforcing clean architecture, SOLID principles, and testing coverage.

- Collaborated remotely with EU and US clients, translating business rules into well-structured ERP backend logic for inventory and finance modules.
- Mentored junior developers in AI-assisted development practices, version control, and codebase hygiene to elevate team maturity and delivery quality.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed modular PHP applications supporting campaign management and data collection using Symfony, adhering to DDD and MVC standards.
- Integrated OpenAI and Gemini APIs to automate personalized content generation in client-facing campaigns, reducing manual input by 70%.
- Designed microservices interacting with MongoDB and PostgreSQL, enhancing data reliability and analytics across user engagement metrics.
- Implemented authentication and user roles for marketing portals using JWT and OAuth, strengthening security posture and session management.
- Built internal tools to enable non-tech users to configure campaign flows, resulting in a 40% reduction in dependency on engineering hours.
- Improved performance of legacy reporting systems by rewriting SQL-heavy routines into optimized views and materialized aggregates.
- Ensured robust CI/CD with Docker, Jenkins, and GitLab pipelines, automating test execution and facilitating smooth deployment cycles.
- Maintained clear documentation for LLM integration endpoints and AI behavior, ensuring product managers could iterate on prompts independently.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Engineered backend solutions for ecommerce platforms using PHP and MySQL, with features including product syncing, stock updates, and checkout APIs.
- Collaborated with frontend teams using REST APIs and JSON schemas to deliver seamless UX while preserving backend logic modularity.
- Enhanced ERP modules related to logistics and invoicing, integrating them with third-party APIs for automated data retrieval and processing.
- Wrote efficient data migration scripts during ERP transitions, avoiding downtime while processing millions of records via batch pipelines.
- Introduced unit testing and integration testing into legacy services, increasing backend reliability and reducing post-deployment issues by 60%.
- Built admin dashboards using Vue.js and Laravel, enabling real-time visibility into operational KPIs, alerts, and background jobs.
- Actively contributed to architectural decisions and tech stack upgrades as the team transitioned to modern PHP frameworks and Docker.
- Worked closely with QA and product owners, translating business rules into functional specifications and backend logic implementations.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Developed custom CMS modules using PHP, focusing on multilingual content handling and media asset optimization.
- Implemented backend logic for scheduling and triggering email campaigns based on user behavior, integrated with Mailchimp API.
- Designed SQL procedures for content indexing, enabling faster content retrieval and enhancing the site's SEO and search performance.
- Rebuilt monolithic backend components into reusable service layers, simplifying future integrations with mobile apps.
- Collaborated with UI/UX teams to deliver mobile-friendly admin interfaces using Bootstrap and jQuery.
- Built internal deployment scripts using Bash and Git hooks to automate staging and production pushes.
- Participated in sprint retrospectives and contributed to improving remote collaboration workflows using Trello and Slack.
- Documented APIs and module logic for client handover and future developer onboarding processes.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Supported development of an internal PHP-based ERP system by building and optimizing backend modules for HR and payroll.
- Created SQL views and triggers to automate recurring business logic around employee onboarding, taxes, and attendance logs.
- Developed UI components with JavaScript and jQuery to allow HR staff to edit and export employee data easily.
- Implemented daily backups and error logs using cron jobs and custom logging classes in PHP.
- Analyzed and refactored slow-performing queries to improve dashboard response times for finance administrators.
- Participated in Agile ceremonies and contributed to planning and estimation for ERP feature delivery.
- Created internal tools to convert Excel-based reporting into dynamic web-based visualizations using Chart.js.
- Delivered a mini knowledge base with ERP usage guides for HR staff and department managers to reduce support tickets.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ PHP Certification – Zend (2020)
 - ❖ AI Programming with Python – Udacity (2022)
 - ❖ LangChain for LLM Developers – DeepLearning.AI (2024)
 - ❖ Generative AI with Gemini – Google Cloud (2024)
-

PROJECTS

- ✓ **ERP Intelligence Assistant:** Integrated Hugging Face Transformers and LangChain to embed LLM-powered summarization and document generation into a proprietary ERP system.
- ✓ **AI Campaign Engine:** Created dynamic AI-driven marketing content generation system using Gemini and PHP microservices, deployed on Docker and monitored with Grafana.
- ✓ **CI/CD for LLM Services:** Built automated deployment pipeline for LLM-enhanced APIs, enabling rollback-safe updates across staging and production using GitHub Actions.
