

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Full Stack PHP Developer with 9+ years of experience in **enterprise-level application design, cloud deployments, and full software lifecycle delivery**. Proven expertise in PHP (5+ years), MySQL, and modern frontend frameworks including **JavaScript (ES6), HTML5, CSS3, and Bootstrap**. Skilled in UML-based application design, Agile/Scrum, and mentoring development teams. Experienced in **cloud-native solutions, distributed architectures, and technical documentation**.

TECHNICAL SKILLS

- **Backend:** PHP (Laravel, Symfony, Zend), Node.js, RESTful APIs, MVC, OOP
- **Frontend:** JavaScript (ES6), HTML5, CSS3, Bootstrap, jQuery, Vue.js, Angular
- **Databases:** MySQL, MSSQL, PostgreSQL, Redis
- **Cloud & DevOps:** AWS, Azure, GCP, Docker, Kubernetes, GitHub Actions, GitLab CI
- **Architecture:** UML, enterprise systems design, microservices, solution modeling
- **Testing & CI/CD:** PHPUnit, Selenium, Jest, Cypress, CI/CD pipelines
- **Methodologies:** Agile, Scrum, Kanban, technical documentation

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Designed and implemented enterprise PHP applications with Laravel and Symfony, focusing on scalability, maintainability, and business logic integrity.
- Delivered multiple successful full-stack projects leveraging PHP, MySQL, HTML5, CSS3, and JavaScript, meeting client requirements and deadlines.
- Modeled application workflows and system interactions using UML, improving cross-team communication and architectural clarity.
- Migrated legacy PHP applications to cloud-native solutions using AWS services, ensuring scalability, fault tolerance, and deployment automation.
- Applied Agile/Scrum methodologies with Jira, leading sprint planning, retrospectives, and backlog grooming to improve delivery speed.
- Collaborated with designers and product managers to deliver responsive UIs using Bootstrap and ES6 JavaScript, improving UX.
- Mentored junior developers in PHP best practices, debugging, and UML modeling, raising overall team coding standards.
- Contributed to technical documentation for system design, deployment processes, and architecture decisions, ensuring long-term maintainability.

Syscom Digital
Software Engineer
October 2019 – August 2021
Bucharest, Romania

- Developed and maintained enterprise web solutions in PHP and MySQL, ensuring high availability, data security, and system reliability.
- Delivered 3+ successful full-stack solutions from design to deployment, integrating PHP backends with HTML5/CSS3/JS frontends.
- Implemented UML diagrams to define class structures, workflows, and architectural components, reducing design ambiguity.
- Contributed to cloud deployment projects using Azure and AWS, implementing CI/CD pipelines with Docker and GitLab CI.
- Enhanced frontend features using ES6 JavaScript, Bootstrap, and responsive design principles, ensuring cross-browser compatibility.
- Wrote unit and integration tests in PHPUnit, improving code coverage and reducing post-deployment bugs by 35%.
- Participated in daily Scrum ceremonies and sprint reviews, ensuring Agile delivery and alignment with business priorities.
- Supported team leads by mentoring peers, reviewing pull requests, and improving team-wide development practices.

Soft Build
Software Developer
June 2016 – July 2019
Timișoara, Romania

- Built PHP-based applications with MySQL backends, applying OOP and MVC principles for scalable and maintainable solutions.
- Designed UML-based architecture models covering entity relationships, workflows, and integration points across enterprise platforms.
- Delivered cloud-enabled solutions with AWS and GCP, leveraging containerization for seamless deployments.
- Implemented user interfaces with HTML5, CSS3, and JavaScript ES6, improving customer-facing application usability.
- Collaborated with QA teams to implement Selenium and PHPUnit test suites, ensuring robust end-to-end coverage.
- Created technical documentation including solution designs, API specifications, and deployment guides.
- Adopted Agile development practices, contributing actively to sprint planning and backlog refinement.
- Optimized MySQL queries and database indexing strategies, reducing query execution times significantly in high-load applications.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Developed enterprise web modules using PHP and MySQL, contributing to multiple client projects with fast-paced delivery cycles.
- Integrated Bootstrap-based responsive designs into PHP platforms, ensuring mobile compatibility and enhanced UX.
- Applied UML diagrams to design modular solutions, ensuring clarity and reducing integration risks.

- Built CI/CD pipelines with Jenkins and Docker for automated deployments across test and production environments.
- Wrote PHP unit tests to validate business logic correctness, supporting robust and reliable releases.
- Participated in Agile Scrum processes, collaborating with cross-functional teams on requirements and sprint deliverables.
- Delivered modules handling authentication, RBAC, and user session management, improving system security and compliance.
- Assisted in solution documentation, producing architecture diagrams and design notes for client handovers.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Contributed to PHP-based enterprise applications with MySQL backends, learning best practices in scalable backend development.
 - Applied UML diagrams under guidance to model database schemas and workflows, gaining hands-on architecture design experience.
 - Assisted in building responsive frontends with HTML5, CSS3, and JavaScript ES6, improving interface usability.
 - Wrote PHPUnit test cases to validate backend logic, gaining early exposure to TDD practices.
 - Participated in Agile sprints, contributing to story breakdowns, sprint planning, and retrospectives.
 - Helped with database optimization tasks, learning indexing, schema refinement, and performance tuning techniques.
 - Collaborated with senior developers in cloud-based deployment experiments on AWS.
 - Delivered independent modules, including form validation and user session handling, gaining confidence in PHP system development.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- **Intermediate Certificate in Software Development** – PHP / Web Development (recognized internationally)
 - AWS Certified Developer – Associate
 - Scrum Master Certified (SMC)
-

PROJECTS

- **Enterprise CRM System** – Delivered PHP-based CRM with MySQL, HTML5/CSS3, and Bootstrap, deployed on AWS with full CI/CD integration.

- **eCommerce Portal** – Built scalable PHP + JavaScript eCommerce solution with secure payment integration, responsive frontend, and cloud hosting.
- **Cloud-Based ERP Modules** – Designed ERP features deployed on Azure with UML-modeled architecture, enabling modular, enterprise-level growth.
