

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-866410383/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative and detail-oriented **Senior Software Engineer** with 9+ years of experience in **PHP development, full-stack engineering, and cloud-based deployments** across industries. Skilled in designing, implementing, and maintaining enterprise-level web solutions with **PHP, MySQL, JavaScript, and modern frontend frameworks**. Strong expertise in **Azure, AWS, and GCP cloud environments, SQL/NoSQL databases**, and scalable **microservices architectures**. Adept at leading development teams, mentoring engineers, and driving full software lifecycle delivery while ensuring performance, maintainability, and security. Certified in software development and committed to continuous learning, sustainability, and innovation.

TECHNICAL SKILLS

- **Languages & Frameworks:** PHP, JavaScript (ES6+), TypeScript, Node.js, React, Angular, HTML5, CSS3/SCSS, Bootstrap
- **Backend & APIs:** FastAPI, Laravel, Symfony, REST/gRPC, GraphQL, Microservices, Camel DSL
- **Databases:** MySQL, PostgreSQL, Microsoft SQL Server, MongoDB, Redis, DynamoDB
- **Cloud Platforms:** Microsoft Azure, AWS, GCP (Cloud Functions, Cloud Run, BigQuery)
- **DevOps & Tools:** Docker, Kubernetes, Terraform, Git, GitHub Actions, GitLab CI/CD
- **Architecture & Methodologies:** UML, Agile Scrum, Event-Driven Systems, Clean Architecture, Design Patterns
- **Testing & QA:** PHPUnit, Jest, Cypress, Selenium, Load Testing, CI/CD pipelines

WORK EXPERIENCE

Freelancer

January 2025–Present

Tallinn, Estonia

- Designed, developed, and deployed scalable web applications using **PHP (Laravel, Symfony)** on the backend and **React.js / Vue.js** on the frontend, ensuring clean architecture and maintainability.
- Built and integrated **RESTful and GraphQL APIs** to connect microservices, improving system interoperability and reducing integration time by 30%.
- Optimized **MySQL and NoSQL databases** with efficient indexing and query tuning, enhancing application performance for high-traffic workloads.
- Implemented **secure authentication and authorization** (JWT, OAuth2, SSO) across multiple projects to meet enterprise-level compliance standards.
- Developed **responsive UI components** with modern JavaScript frameworks, ensuring cross-browser compatibility and accessibility compliance (WCAG 2.1).
- Automated CI/CD pipelines with **GitHub Actions / GitLab CI / Jenkins**, reducing deployment errors and cutting release cycles by 40%.

- Containerized applications using **Docker** and deployed to **AWS/Azure/GCP**, improving scalability and reducing infrastructure costs.
- Collaborated with international clients on requirements, architecture decisions, and agile delivery, while mentoring junior developers in best coding practices.

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Designed and developed enterprise-grade PHP and Node.js solutions, integrating **Azure and AWS cloud services** to support scalable learning and training management systems.
- Implemented full-stack solutions combining **PHP backend with React and Angular frontends**, optimizing performance and ensuring compliance with accessibility and security standards.
- Led cloud migration projects deploying applications to **Microsoft Azure** using Docker and Kubernetes, ensuring **99.95% availability** and reduced infrastructure costs by 18%.
- Built **REST and GraphQL APIs** that supported multi-tenant platforms, enabling seamless integration with external systems such as Salesforce and SAP.
- Introduced automated **CI/CD pipelines with GitHub Actions**, streamlining release cycles and reducing deployment errors by 30%.
- Mentored a team of junior engineers, guiding best practices in coding standards, design patterns, and documentation.
- Enhanced application performance by **35%** through SQL query optimization, caching strategies with Redis, and NoSQL integrations for high-volume data.
- Collaborated with QA teams to achieve **90%+ bug resolution per sprint**, aligning with agile delivery standards.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed **PHP-based CMS platforms and e-commerce systems**, integrating **MySQL/MSSQL databases** and ensuring responsiveness across devices.
- Implemented **secure authentication and role-based access systems**, improving compliance with GDPR and ISO 27001 standards.
- Migrated legacy applications to cloud-native **Azure and AWS environments**, modernizing infrastructure and improving scalability.
- Designed **interactive dashboards** with React and Bootstrap, enabling clients to analyze real-time digital marketing campaign performance.
- Contributed to backend orchestration, ensuring seamless integration of APIs with third-party platforms like Google Ads and Facebook Graph API.
- Conducted **performance, stress, and penetration testing** to ensure high reliability under enterprise-scale usage.
- Collaborated with business stakeholders to refine backlog, prepare technical documentation, and conduct sprint demos.
- Consistently met sprint goals, with **92%+ feature completion rate** across multiple releases.

Soft Build
Software Developer
June 2016 – July 2019
Timișoara, Romania

- Built scalable **PHP applications with Laravel and Symfony frameworks**, integrated with **SQL and NoSQL databases** for data-driven decision systems.
- Designed and deployed applications to **AWS (EC2, S3, RDS)** and GCP, ensuring high availability and disaster recovery compliance.
- Created custom **learning management modules**, supporting 10K+ concurrent users with optimized load balancing.
- Implemented **CI/CD pipelines** with GitLab, reducing deployment time by 40% and improving release reliability.
- Collaborated with UX/UI designers to implement **modern frontend components** using JavaScript ES6, SCSS, and Bootstrap.
- Refactored legacy monolithic systems into **microservices architecture**, improving modularity and maintainability.
- Automated database migrations, backups, and monitoring, improving data integrity and reducing incidents by 25%.
- Led technical workshops to introduce Agile methodologies and foster collaboration across teams.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Delivered **custom PHP solutions** for e-commerce and enterprise platforms, ensuring integration with **MySQL/MSSQL** backends.
- Contributed to system design using **UML modeling** and documentation for future scalability.
- Built **responsive frontend interfaces** leveraging HTML5, CSS3, and jQuery, improving client engagement metrics.
- Participated in international projects, collaborating with distributed teams across Europe.
- Implemented **API integrations** for payment gateways, logistics services, and external CRMs.
- Performed bug fixing, vulnerability patching, and unit testing to strengthen application stability.
- Assisted in backlog refinement and sprint planning in an Agile environment.
- Supported deployment processes on on-premises and early-stage cloud infrastructures.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Assisted in developing **PHP-based web applications**, ensuring compliance with coding and security best practices.
 - Implemented **frontend interfaces** using Bootstrap, CSS3, and JavaScript, collaborating with designers for pixel-perfect UI.
 - Gained experience in **MySQL database design**, normalization, and query optimization for production systems.
 - Wrote unit and integration tests, improving overall software quality.
 - Participated in agile sprint reviews, backlog grooming, and daily standups.
 - Provided **technical documentation and user manuals** to support training initiatives.
 - Assisted in debugging and fixing cross-browser compatibility issues.
 - Supported senior developers in prototyping and deploying solutions to **Azure-based environments**.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- **AWS Certified Developer – Associate**
 - **Google Cloud Professional Cloud Developer**
 - **MySQL Performance Tuning Certification**
 - **Laravel Certified Developer**
 - **Vue.js Professional Certification**
-

PROJECTS

- **Travel Platform Modernization:** Migrated a large-scale travel management platform from legacy PHP to **Laravel 10 with Vue 3 + Inertia.js**, improving maintainability and performance while introducing modular UI with Tailwind UI.
- **Enterprise CRM System:** Designed and deployed a CRM solution using **VILT stack** with Docker and GitLab CI/CD, delivering seamless integration between backend APIs and Vue 3 SPAs.
- **E-commerce Dashboard:** Built an admin dashboard with **AG Grid and Tailwind CSS**, enabling advanced data visualization and real-time filtering for large product datasets.
