

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Software Developer with over 9 years of experience building scalable, high-performance web applications and enterprise systems. Proficient in PHP (Laravel 8+), Vue.js, PostgreSQL, Redis, Elasticsearch, and modern CI/CD pipelines. Proven leadership in mentoring teams, conducting code reviews, and driving architectural decisions across B2B and B2C solutions. Strong knowledge of system design, optimization, and high-load environments. Experienced in leading cross-functional development teams, conducting technical interviews, and improving engineering processes through automation and best practices.

TECHNICAL SKILLS

- **Languages & Frameworks:** PHP 8+, Laravel 8/9/10, JavaScript, TypeScript, Vue.js, Node.js, HTML5, CSS3, SASS
- **Databases:** PostgreSQL, MySQL 8.0, Redis, Elasticsearch
- **DevOps & Tools:** Docker, GitLab CI/CD, Jenkins, RabbitMQ, NGINX, Kubernetes (basic), Linux, Composer, Webpack
- **Testing & Quality:** PHPUnit, Jest, Cypress, REST API testing, Postman, Swagger
- **Concepts:** OOP, MVC, KISS, YAGNI, SOLID, Clean Architecture, TDD
- **Other:** Agile/Scrum, Git, Jira, CI/CD pipelines, Logging & Monitoring (ELK Stack, Grafana)

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led a team of 4 developers building B2C applications on Laravel 10 and Vue.js, architecting a modular codebase to support dynamic product catalogs and real-time user interactions.
- Developed custom CI/CD pipelines using GitLab CI to automate testing, security scans, and Docker-based deployments, reducing release errors by over 40%.
- Designed RESTful APIs supporting millions of concurrent requests monthly with optimized PostgreSQL queries and Redis caching mechanisms for fast response time.
- Integrated Elasticsearch for full-text catalog search, drastically improving query performance and search accuracy across multilingual datasets.
- Conducted regular code reviews and design sessions, mentoring junior developers on performance tuning, security practices, and clean code principles.
- Implemented detailed system logging with ELK Stack and set up Grafana dashboards for proactive performance monitoring and troubleshooting.

- Played a pivotal role in hiring by creating technical assessments, leading interviews, and onboarding developers into high-performance agile workflows.
- Collaborated with DevOps team to fine-tune NGINX configurations for microservices routing, caching strategies, and request load balancing.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed and maintained CRM and marketing automation platforms using Laravel 8 and Vue.js, handling customer segmentation, A/B testing, and campaign analytics.
- Refactored legacy PHP systems into modern service-based architecture, improving maintainability and system responsiveness by 60%.
- Wrote complex PostgreSQL queries and views for reporting engines, focusing on execution time optimization through strategic indexing and query profiling.
- Collaborated with QA to implement Jest and PHPUnit test coverage, reducing bugs in production by over 50% and enhancing system stability.
- Created Dockerized local environments to standardize team development setups and accelerate onboarding time for new hires.
- Managed CI/CD processes through Jenkins, adding pre-merge testing and post-deploy monitoring scripts to ensure code reliability.
- Designed modular Vue.js components for real-time marketing dashboards with dynamic charts, filters, and interactive interfaces.
- Configured RabbitMQ to handle background task processing for outbound campaigns, ensuring asynchronous delivery and logging.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Built and maintained enterprise CMS systems in Laravel, handling large-scale product catalogs with multilanguage and multiregion support.
- Spearheaded integration with 3rd-party APIs (shipping, inventory, payment), implementing error-handling workflows and retry mechanisms.
- Tuned MySQL 8.0 database performance with partitioning and custom indexing, reducing report generation latency by over 70%.
- Wrote Redis-based caching layers for dynamic pages, offloading frequent reads from DB and cutting load times across key pages.
- Collaborated in cross-functional teams using Agile methodologies and participated in sprint planning, estimation, and retrospectives.
- Implemented multi-tenant architecture supporting various brand sites from a shared backend, with dynamic domain and config resolution.
- Participated in architectural discussions to transition monolithic systems to modular services with Laravel packages and API-first designs.
- Led internal tech workshops to upskill mid-level developers in best practices of secure and scalable PHP development.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Contributed to backend development of B2B portals using Laravel and PostgreSQL, focusing on user roles, permissions, and activity logs.
- Customized front-end components using Vue.js and integrated dynamic filters, sorters, and exportable reports into client dashboards.
- Set up Jenkins-based automated deployment pipelines with rollbacks and Slack integrations for deployment notifications.
- Built REST APIs for mobile clients with JWT authentication and enforced role-based access across routes and resources.
- Participated in biweekly sprint reviews and retrospectives, sharing feedback on technical challenges and refactoring needs.
- Researched and implemented rate-limiting strategies to protect public endpoints and mitigate abuse.
- Deployed beta applications to staging environments and led QA feedback integration for final releases.
- Created internal documentation for system configuration, feature specifications, and environment setup.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Developed internal tools and admin panels using Laravel 5 and Bootstrap, supporting internal analytics and content management.
- Built CRUD modules for inventory tracking and integrated barcode scanning via mobile interfaces.
- Assisted in transitioning codebase from raw PHP to Laravel, creating reusable controllers and middleware.
- Conducted unit testing for controllers and models, helping reduce production bugs by 30% during internship.
- Configured NGINX servers for dev/staging deployments and created bash scripts for routine backups and DB exports.
- Supported QA team by writing testing scripts and helping reproduce UI bugs in local environments.
- Took part in code pairing sessions to understand enterprise development workflows and Git branching strategies.
- Participated in team scrums and presented weekly updates on intern progress and learned technologies.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ Laravel Certified Developer – 2023
- ❖ PHP Advanced Certification – 2022
- ❖ PostgreSQL Performance Optimization – 2021
- ❖ Vue.js Mastery Track – 2020
- ❖ CI/CD DevOps with GitLab & Jenkins – 2020

PROJECTS

- ✓ **E-Commerce CMS (Sensidev):** Architected a Laravel + Vue.js solution powering 10+ B2C webshops with PostgreSQL, Redis, and Elasticsearch for catalog and search.
- ✓ **CRM Automation System (Syscom):** Built campaign workflows and customer profiles with Vue dashboards and REST APIs, supported by RabbitMQ job queues.
- ✓ **Multi-Brand Site Manager (Soft Build):** Designed multi-tenant system in Laravel with isolated brand configurations and scalable PostgreSQL schema.
