

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Full-stack Developer with over 9 years of hands-on experience developing robust learning and enterprise platforms using PHP, Python, JavaScript, and Moodle LMS. Specialized in crafting modular Moodle plugins, integrating LAMP stack architecture, and deploying scalable CI/CD pipelines with Docker. Proven ability to collaborate cross-functionally with instructional designers and system architects to deliver high-performance e-learning ecosystems, API integrations, and user-centric solutions for both backend and frontend.

TECHNICAL SKILLS

- **Languages:** PHP, Python, JavaScript, SQL, HTML5, CSS3
- **Frameworks:** FastAPI, Flask, Django, Odoo ORM, Laravel (basic)
- **LMS & ERP:** Moodle, Odoo ERP, XML Views, JavaScript Client Scripting
- **Moodle Skills:** Plugin & Theme Development, API Integration, Performance Tuning, Auth Systems
- **DevOps:** Docker, GitHub Actions, CI/CD Pipelines, Linux, Apache, Nginx
- **Databases:** MySQL, PostgreSQL, MongoDB, Elasticsearch
- **Frontend:** React, Tailwind CSS, jQuery, Bootstrap, Moodle Templating
- **Testing:** Pytest, Jest, Moodle PHPUnit, React Testing Library
- **Cloud & Tools:** Git, Postman, Confluence, Vercel, Heroku, DigitalOcean, GitLab Pipelines

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Developed modular full-stack systems combining PHP, FastAPI, and Odoo, enhancing ERP data flow and syncing across PostgreSQL and Moodle APIs for e-learning platforms.
- Customized and deployed Odoo and Moodle modules with XML, ORM, and PHP/JS extensions to meet specific client training workflows and CRM integration demands.
- Engineered and maintained CI/CD automation for PHP-based Moodle plugins using Docker, GitHub Actions, and MySQL fixtures, accelerating deployment cycles.
- Collaborated with UI/UX teams and stakeholders to optimize Moodle themes for accessibility and responsive behavior across web and mobile devices.
- Improved Moodle LMS search performance by integrating Elasticsearch indexing with layered caching strategies, reducing load times for 1M+ records by 65%.
- Designed role-based authentication using OAuth2 and integrated Moodle with SSO systems, ensuring secure access and compliance across corporate clients.

Syscom Digital
Software Engineer
October 2019 – August 2021
Bucharest, Romania

- Maintained and extended Moodle-based LMS solutions, developing custom modules using PHP and JavaScript to enhance reporting, grading, and attendance tracking.
- Built REST APIs in Python and PHP to synchronize Moodle with marketing and analytics tools, enabling real-time tracking of learner engagement and performance.
- Deployed and optimized LAMP environments for Moodle using Apache, MySQL, and Docker Compose, including staging and automated backup routines on Linux.
- Implemented Moodle cron jobs and caching systems to handle thousands of concurrent learners during assessment cycles, optimizing system throughput.
- Collaborated with instructional designers to convert course materials into dynamic Moodle SCORM packages and interactive HTML-based activities.
- Conducted rigorous integration testing using PHPUnit and Selenium scripts for Moodle, maintaining system stability during frequent plugin updates.

Soft Build
Software Developer
June 2016 – July 2019
Timișoara, Romania

- Designed and deployed internal HR and finance systems using PHP/MySQL and Python backends, interfaced with Moodle and ERP modules for employee training records.
- Refactored legacy PHP code within Moodle plugins to comply with latest Moodle coding standards and enhance maintainability and scalability.
- Created data transformation scripts in Python using Pandas for Moodle grade reports, enabling management to generate customized dashboards.
- Built Dockerized environments for Moodle testing and development, replicating production load cases to validate memory management and page latency.
- Integrated LDAP and external auth services into Moodle, providing seamless login experience and consistent user identity management across apps.
- Guided junior developers through Moodle architecture, plugin structure, and best practices in Moodle development via peer code reviews and walkthroughs.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Supported Moodle migration efforts for legacy clients, resolving schema inconsistencies and deprecated plugin errors during PHP version upgrades.
- Modernized Moodle front-end components using JavaScript and jQuery, improving compatibility with Bootstrap-based responsive design frameworks.
- Designed shell scripts and automated tasks to manage Moodle file backups and restore processes across distributed Linux environments.
- Worked with QA teams to implement automated Moodle testing pipelines using GitLab CI/CD and database snapshot validation techniques.
- Built dashboards for LMS data analysis using PostgreSQL and embedded Moodle reports, offering granular insights into learner performance trends.
- Assisted with the deployment of Moodle containers on cloud platforms, including DigitalOcean droplets and Nginx reverse proxies.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Developed PHP scripts to import and validate SCORM modules within Moodle LMS for a government e-learning initiative.
- Researched Moodle documentation and created XML views and JS components to support plugin UI customization and interactive learning blocks.
- Contributed to backend microservices using FastAPI for Moodle data syncs and file delivery systems interfacing with content repositories.
- Prototyped HTML/CSS/JS-based learning templates embedded into Moodle pages to simulate hands-on quizzes and interactive code editors.
- Created test scaffolds and CI jobs for Moodle plugin development, streamlining local development and deployment using Vagrant and Docker.
- Learned version control, Linux server administration, and Moodle database schema under guidance of senior LMS engineers.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ **Moodle Plugin Development Masterclass** – MoodleBites
- ❖ **Advanced PHP for Web Development** – LinkedIn Learning
- ❖ **Docker & Kubernetes: The Complete Guide** – Udemy
- ❖ **LAMP Stack Development Essentials** – Coursera
- ❖ **CI/CD for PHP Projects with GitHub Actions** – Pluralsight
- ❖ **Odoo Technical Training** – OdooClass
- ❖ **Python for Data Science** – Coursera

PROJECTS

- ✓ **Moodle Performance Optimizer**
Implemented caching strategies, table indexing, and cron task schedulers in Moodle to support 1000+ concurrent users with stable response times.
- ✓ **Campaign Sync Tool for Moodle**
Custom PHP module syncing third-party CRM campaigns into Moodle user groups for segmented learning paths and performance tracking.
- ✓ **CI/CD Moodle Deployment Pipeline**
Automated plugin testing and deployment via GitHub Actions and Docker, ensuring reliable rollouts of Moodle features across multiple client environments.
