PROFESSIONAL SUMMARY

Innovative Senior Full Stack Engineer with 9+ years of professional experience delivering scalable web applications, combining **React.js frontend expertise** with strong backend development in **Symfony/Laravel and PHP**. Skilled in designing responsive UI/UX, building reusable components, implementing API-driven architectures, and optimizing performance for high-traffic environments. Adept at leading engineering practices, mentoring teams, and ensuring compliance with **security standards** in healthcare and enterprise platforms. Strong foundation in **cloud solutions (AWS, GCP, Azure)**, **SQL and NoSQL databases**, and **automated testing frameworks**, ensuring reliability and maintainability across complex systems.

TECHNICAL SKILLS

- **Frontend:** React.js, Redux, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind, Bootstrap
- **Backend:** Symfony, Laravel, Node.js, Express.js, PHP 7/8, ASP.NET Core, Java, Python
- **Databases:** PostgreSQL, MySQL, MS SQL Server, MongoDB, Redis, Firebase
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), GCP (Firestore, Cloud Run), Azure, Docker, Kubernetes, GitHub Actions, GitLab CI/CD, Jenkins, Terraform
- **Testing & Quality:** Jest, Mocha, Chai, PHPUnit, Cypress, Jasmine, Playwright, Selenium
- **Other Tools:** Webpack, Babel, GraphQL, REST APIs, Jira, Confluence, Figma, Agile/Scrum

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led frontend development with **React.js**, creating modular, reusable components and UI libraries that reduced new feature implementation time by 30%.
- Partnered with designers to implement pixel-perfect, responsive interfaces, ensuring **cross-device consistency** and enhancing UX for 50k+ monthly users.
- Integrated **Symfony backend APIs** with React, streamlining patient data management workflows for healthcare applications and ensuring secure data handling.
- Built and maintained **automated unit/integration tests** (Jest, PHPUnit), improving release confidence and reducing regression bugs by 40%.
- Contributed to architecture discussions for migrating legacy systems to **cloud-native solutions (AWS/GCP)**, ensuring scalability and fault tolerance.

- Optimized SQL queries and caching strategies with PostgreSQL and Redis, boosting response times by 25% in high-traffic environments.
- Mentored junior developers through code reviews, pairing sessions, and workshops, fostering a culture of clean code and maintainability.
- Advocated for **CI/CD pipelines** with GitHub Actions, enabling automated builds, tests, and deployments across multiple environments.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed **full-stack applications** with React, PHP, and Symfony, supporting large-scale digital campaigns and customer engagement platforms.
- Implemented **responsive UI/UX features** and optimized CSS/SCSS, achieving 20% faster page loads and improved user satisfaction scores.
- Designed secure **RESTful APIs** in Symfony with JWT authentication, ensuring compliance with industry-standard data security practices.
- Automated testing pipelines with **Jest and PHPUnit**, increasing code coverage above 85% across multiple services.
- Collaborated with cross-functional teams to enhance product usability, driving adoption by healthcare and retail clients.
- Introduced **Webpack and Babel optimizations**, reducing bundle size and improving frontend build performance significantly.
- Contributed to documentation and **best practices for code quality**, standardizing reusable components and backend modules.
- Assisted in migrating applications to **Dockerized microservices** on AWS, ensuring better scalability and uptime.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Engineered **React and Angular web applications** with modern JavaScript (ES6+), enhancing interactive dashboards and analytics modules.
- Developed backend services in **Laravel and Symfony**, handling data-intensive workflows with PostgreSQL and MySQL.
- Applied **role-based access control and encryption techniques** to strengthen data protection for enterprise healthcare platforms.
- Built internal UI libraries of reusable components, reducing development duplication across multiple client projects.
- Conducted **integration testing with Mocha/Chai**, ensuring reliable interaction between frontend and backend services.
- Collaborated on **performance tuning** with database indexing and query optimization, reducing reporting generation time by 40%.
- Maintained CI/CD pipelines in GitLab for automated deployments across staging and production.
- Partnered with clients in Agile environments, refining requirements and delivering production-ready features in bi-weekly sprints.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Contributed to e-commerce and healthcare projects using **React and PHP Symfony**, focusing on frontend enhancements and backend integrations.
- Improved UI accessibility standards, ensuring **WCAG compliance** and better usability across devices.
- Supported data synchronization with **SQL and NoSQL backends**, improving system resilience and scalability.
- Designed **RESTful APIs** for third-party integrations with payment systems and healthcare data providers.
- Assisted in **frontend build process automation** with Webpack and npm scripts, improving developer productivity.
- Implemented **unit testing and functional testing** with PHPUnit, reducing deployment issues significantly.
- Optimized frontend performance by reducing load times with lazy loading and code-splitting techniques.
- Participated in daily Scrum and sprint retrospectives, improving team collaboration and delivery cycles.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Supported development of **frontend interfaces** with HTML5, CSS3, and JavaScript, ensuring responsive layouts.
- Contributed to **backend APIs in PHP and Laravel**, handling CRUD operations for enterprise clients.
- Implemented simple **unit tests** and assisted in bug fixing, reducing backlog issues and improving release timelines.
- Enhanced database schema design with MySQL, improving query reliability and consistency.
- Assisted senior developers in setting up **Git workflows**, learning collaborative development best practices.
- Participated in **UI/UX discussions**, contributing design suggestions for better user flows.
- Documented features and test results, creating reusable knowledge bases for future interns.
- Gained early exposure to **Agile/Scrum practices**, preparing for professional full-time roles.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Developer – Associate
 - Google Cloud Professional Developer
 - React Nanodegree – Udacity
 - PHP Symfony Certification
-

PROJECTS

- **Healthcare Practice Management Platform** – Built full-stack solution with React frontend and Symfony APIs for patient scheduling, billing, and medical record management. Implemented secure authentication, role-based access, and GDPR compliance.
- **E-Commerce Dashboard** – Designed scalable React dashboards integrated with Laravel backend, featuring real-time sales analytics, order management, and multi-tenant architecture on AWS.
- **Microservices Migration** – Led migration from monolith PHP system to containerized microservices on AWS ECS, improving uptime and enabling continuous deployment.
