

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 9+ years of experience delivering scalable SaaS, cybersecurity, and enterprise-grade solutions using MERN stack, TypeScript, AWS, and cloud-native architectures. Proven record of leading technical teams, optimizing CI/CD pipelines, and building secure, high-performance platforms in startup and scale-up environments. Adept at mentoring engineers, architecting complex systems, and collaborating cross-functionally to achieve product excellence.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, Node.js, React, Express.js, Angular, PHP, C#, Java, Python, .NET Core, Next.js, HTML5, CSS3, SCSS
- **Databases:** MongoDB, MySQL, PostgreSQL, Redis, DynamoDB, SQL, NoSQL
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, CloudFormation), GCP, Docker, Kubernetes, Terraform, CI/CD Pipelines, GitHub Actions, Jenkins
- **Testing & Tools:** Jest, Mocha, Cypress, Postman, Swagger, GraphQL, WebSockets, REST APIs
- **Other Expertise:** SaaS architecture, Cybersecurity best practices, Agile/Scrum, Performance Optimization, Scalability Engineering

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led architecture and full-stack development of SaaS platforms using React, Node.js, TypeScript, MongoDB, and AWS, delivering highly secure, scalable solutions for clients across finance and cybersecurity sectors.
- Designed and implemented CI/CD pipelines with GitHub Actions and AWS CodePipeline, reducing deployment time by 60% and ensuring automated testing integration for higher release confidence.
- Collaborated with product managers, designers, and tech leads to define technical roadmaps, aligning engineering efforts with business objectives in a fast-paced, fully remote environment.
- Built and optimized data models and queries in MongoDB and PostgreSQL, enhancing database performance for high-volume applications and reducing query latency by 40%.
- Mentored junior and mid-level developers, providing code reviews, architectural guidance, and best practices that improved code quality and reduced bug rates.
- Implemented advanced security features including encryption, role-based access control, and penetration test remediations to ensure compliance with industry cybersecurity standards.

- Integrated third-party APIs and microservices into core platform architecture, enabling seamless connectivity with payment gateways, authentication providers, and analytics tools.
- Developed performance monitoring dashboards and logging systems using AWS CloudWatch and ELK stack, enabling proactive issue detection and resolution before impacting end users.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Engineered responsive web applications with React, Node.js, Express, and MySQL, delivering high-performance solutions tailored for digital marketing and analytics.
- Designed RESTful APIs and integrated third-party services to streamline data processing and enhance campaign management capabilities for enterprise clients.
- Built reusable UI components and state management patterns, improving code maintainability and reducing development time for new features by 30%.
- Worked closely with cross-functional teams to define technical specifications, ensuring product features met both functional and scalability requirements.
- Deployed applications to AWS EC2 and S3 with CloudFront CDN integration, improving load times for global user bases by over 50%.
- Automated deployment workflows using Jenkins and GitLab CI, enabling continuous delivery with zero downtime releases.
- Enhanced application security by implementing OWASP best practices, securing APIs against SQL injection, XSS, and CSRF attacks.
- Conducted thorough performance testing and profiling, identifying and resolving bottlenecks to ensure consistent sub-second response times.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed and maintained full-stack applications with Node.js, PHP, and React, supporting e-commerce and SaaS platforms with thousands of daily active users.
- Architected database schemas and implemented optimized SQL queries in MySQL and PostgreSQL, improving reporting and analytics performance.
- Designed and integrated REST APIs for internal and client-facing applications, ensuring secure and reliable data exchange.
- Collaborated with front-end teams to create pixel-perfect, accessible UI components, improving user engagement and retention rates.
- Introduced automated testing with Jest and Mocha, increasing code coverage to 85% and significantly reducing production defects.
- Migrated legacy monolithic applications to microservices architecture, enabling easier scaling and faster feature deployment.
- Utilized Docker and Kubernetes to containerize applications, streamlining development, testing, and deployment processes.
- Conducted security audits and implemented encryption at rest and in transit, enhancing compliance with GDPR and ISO standards.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Delivered Drupal-based content management solutions, integrating custom modules and APIs to meet client-specific needs.
- Implemented responsive, mobile-first front-end designs using JavaScript, jQuery, and CSS3 for cross-browser compatibility.
- Optimized database queries and caching mechanisms in MySQL to improve site load speed and performance.
- Collaborated with design teams to implement UX best practices, ensuring high usability and accessibility compliance.
- Enhanced platform security with input validation, secure authentication, and proper session management.
- Created custom REST endpoints to extend Drupal functionalities for third-party integrations.
- Deployed and maintained applications on AWS infrastructure, ensuring high uptime and disaster recovery readiness.
- Documented system architecture and workflows, enabling smoother onboarding for future developers.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in the development of web applications using PHP, JavaScript, and MySQL, contributing to internal and client-facing projects.
- Created and optimized SQL queries to support reporting and analytics features, improving performance for large datasets.
- Participated in code reviews and debugging sessions, learning best practices for clean, maintainable code.
- Built front-end interfaces with HTML5, CSS3, and jQuery, ensuring responsiveness across devices.
- Integrated third-party APIs for payment processing and user authentication, enhancing platform capabilities.
- Contributed to the setup of AWS-hosted environments for staging and production deployments.
- Implemented basic automated testing scripts, reducing manual QA effort.
- Prepared detailed documentation for project workflows, system configurations, and user guides.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ AWS Certified Solutions Architect – Associate
- ❖ AWS Certified Developer – Associate

- ❖ MongoDB Certified Developer
 - ❖ JavaScript Algorithms and Data Structures – freeCodeCamp
 - ❖ Google Cloud Professional Cloud Developer
-

PROJECTS

- ✓ **CyberShield SaaS Platform** – Architected and developed a secure, AWS-hosted cybersecurity monitoring platform using React, Node.js, TypeScript, MongoDB, and GraphQL. Implemented real-time alerting, multi-tenant support, and advanced access controls for enterprise clients.
- ✓ **E-LearnX LMS** – Built a scalable, cloud-native learning management system with MERN stack and AWS Lambda. Integrated video streaming, real-time chat, and analytics dashboards.
- ✓ **DataFlow ETL Pipeline** – Designed and deployed a high-volume ETL pipeline in Node.js with AWS S3 and DynamoDB, reducing processing time for multi-gigabyte datasets by 70%.
