PROFESSIONAL SUMMARY

Passionate and highly skilled Game Developer with 8+ years of experience creating performant, real-time applications, including rich interactive browser-based games. Seeking to contribute my strong expertise in TypeScript, Pixi.js, WebSocket, and online game mechanics to Just Slots to deliver top-tier casino gaming experiences.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, HTML5, CSS3, Node.js, Java, PHP
- **Game & UI Libraries:** Pixi.js, Phaser.js, Three.js, Canvas API
- **Communication:** WebSocket, RESTful APIs, HTTP, JSON
- **Tools:** Git, Webpack, Babel, Jenkins, Figma, Chrome DevTools
- **Databases:** PostgreSQL, MySQL, MongoDB (NoSQL), Firebase Realtime DB
- **Cloud & Infrastructure:** AWS (S3, Lambda, CloudFront), GCP (Cloud Functions, Firestore), Docker
- **Testing:** Mocha, Chai, Jest, Puppeteer, Cypress
- **Other:** Agile/Scrum, CI/CD, Lighthouse, Chrome DevTools, Jira

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led the architecture and development of HTML5 real-money slot game prototypes using TypeScript and Pixi.js, achieving frame-perfect rendering and high performance across desktop and mobile.
- Implemented a custom animation framework using Pixi.js's ticker and GSAP integration, streamlining complex character and environment transitions in slot reels.
- Built WebSocket-based real-time betting and event systems, maintaining sub-50ms latency for synchronous in-game actions under heavy player load.
- Integrated third-party game math engines and managed secure communication between the front-end client and game servers using REST and WebSocket APIs.
- Optimized asset streaming via lazy loading and CDN via AWS S3 + CloudFront, reducing initial load time by 35% on average.
- Enhanced automated testing by building mock game environments using Jest and Puppeteer, achieving 92% unit test coverage on front-end logic.

- Developed custom component libraries with reusable UI widgets and audio pipelines for consistent game presentation and user feedback.
- Mentored 3 junior developers in Pixi.js and WebSocket architecture, and contributed to team-wide adoption of agile delivery practices with Jira and daily scrums.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Created browser-based educational games using Pixi.js and JavaScript, targeting school systems and training platforms across Europe.
- Developed a configurable animation module with scene transitions and layered effects for story-based gamified learning content.
- Integrated Firebase for real-time multiplayer quiz battles, using Firestore and Cloud Functions to sync state changes.
- Developed slot-style quiz mechanics using randomization and rulesets inspired by casino game patterns for engagement.
- Designed dynamic audio engines with Web Audio API and multi-language support with runtime text rendering.
- Maintained detailed documentation and storyboards in collaboration with educational consultants and curriculum designers.
- Conducted cross-platform testing and optimization to ensure seamless experience across mobile browsers and older Android/iOS versions.
- Introduced performance metrics tracking via Lighthouse and automated screenshot regression testing using Puppeteer.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed animation-heavy HTML5 casino game mockups using JavaScript and Pixi.js, tailored for investor demos and initial playtesting.
- Built an interactive slot game logic simulator with adjustable volatility, hit rate, and RTP, used to validate client game design.
- Optimized canvas rendering performance and texture batching using Pixi.js best practices.
- Delivered working proof-of-concept slots to senior stakeholders under aggressive two-week sprint schedules.
- Documented codebase with JSDoc and conducted weekly review sessions for cross-functional alignment.
- Developed secure token-based REST endpoints for stateless game-server mock interactions.
- Assisted in designing feature specs for bonus game features including free spins, wilds, and scatter multipliers.
- Conducted user testing sessions and collected player feedback to inform design iterations.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Developed animation-heavy HTML5 casino game mockups using JavaScript and Pixi.js, tailored for investor demos and initial playtesting.

- Built an interactive slot game logic simulator with adjustable volatility, hit rate, and RTP, used to validate client game design.
- Optimized canvas rendering performance and texture batching using Pixi.js best practices.
- Delivered working proof-of-concept slots to senior stakeholders under aggressive two-week sprint schedules.
- Documented codebase with JSDoc and conducted weekly review sessions for cross-functional alignment.
- Developed secure token-based REST endpoints for stateless game-server mock interactions.
- Assisted in designing feature specs for bonus game features including free spins, wilds, and scatter multipliers.
- Conducted user testing sessions and collected player feedback to inform design iterations.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Assisted in development of mobile web games using JavaScript and HTML5, focused on mini slot simulations.
- Built internal tools for sprite slicing and optimization using Node.js CLI utilities.
- Helped create touch-based input handlers compatible with various Android and iOS devices.
- Built internal game testing dashboard with real-time event display and session storage.
- Wrote unit and integration tests for frontend components using Mocha and Chai.
- Collaborated in agile team setting and participated in sprint retrospectives.
- Shadowed senior game developers and contributed to small but complete game projects.
- Documented bugs and testing cases using Jira and Git.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Certified AWS Developer Associate (2022)
- ❖ Google Cloud Associate Cloud Engineer (2023)
- ❖ Advanced JavaScript and HTML5 Canvas Certificate – Udemy (2021)
- ❖ Game Development with Pixi.js Masterclass – Coursera (2022)

PROJECTS

- ✓ **RealMoney Spin Engine** – Designed and developed a server-client game engine with WebSocket communication and configurable reel mechanics; deployed on AWS with Firebase authentication.
- ✓ **FireJack Multiplayer Game** – Multiplayer real-time blackjack-style slot game with WebRTC communication and a Pixi.js-rendered UI.

- ✓ **Slot Designer UI Tool** – Internal tool for game designers to configure, preview, and export slot configurations with JSON schemas.
