PROFESSIONAL SUMMARY

Full Stack Developer with 9+ years of experience in **backend AI/ML integration (Python, FastAPI, LangChain, GPT APIs)** and **frontend delivery (Angular 12+, TypeScript, RxJS, NgRx)**. Skilled in **designing cross-platform digital products**, serving large language models, and delivering seamless AI-powered user interfaces. Strong expertise in **microservices, Dockerized cloud deployments (Azure/GCP)**, and **end-to-end system architecture**. Adept at Agile delivery, automated testing, and collaborative cross-functional work.

TECHNICAL SKILLS

- **Backend (Python AI):** Python, FastAPI, Flask, Django, LangChain, Semantic Kernel, Azure AI Foundry, GPT APIs, GCP Gemini
- **Frontend (Angular):** Angular 12+, TypeScript, RxJS, NgRx, Jasmine, Karma, Jest, HTML5, CSS3, SCSS
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Cloud & DevOps:** Azure, GCP, Docker, Kubernetes, Terraform, CI/CD pipelines
- **AI/ML:** Model inference, TorchServe, TensorFlow Serving, ONNX Runtime, Hugging Face Transformers
- **Other:** REST, GraphQL, state management, data visualization libraries, RBAC, authentication, Agile/Scrum

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed and implemented Python AI microservices with FastAPI and Flask, serving GPT and Gemini APIs for inference within enterprise workflows.
- Built Angular 14 frontends with TypeScript, RxJS, and NgRx, delivering AI-powered dashboards for real-time insights and dynamic model outputs.
- Integrated **LangChain** and **Semantic Kernel** frameworks to orchestrate multi-step AI reasoning pipelines, improving model performance and explainability.
- Designed scalable **Dockerized deployments** on Azure and GCP, applying Kubernetes orchestration for production-ready AI microservices.

- Collaborated with product and design teams to deliver **end-to-end cross-platform applications**, aligning technical design with business outcomes.
- Implemented **CI/CD pipelines** with GitHub Actions, ensuring automated testing, deployment, and rollback strategies for critical features.
- Applied **unit and integration testing** with PyTest, Jasmine, and Jest, increasing test coverage and reducing regression issues by 40%.
- Contributed to **system architecture discussions**, proposing hybrid AI + Angular approaches to optimize scalability and maintainability.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed backend services in Python integrating **AI APIs for NLP and content generation**, exposing REST and GraphQL endpoints for frontend use.
- Delivered Angular applications consuming AI-powered APIs, ensuring smooth interaction with model outputs in highly dynamic UI contexts.
- Designed **SQL and NoSQL schemas** for AI workloads, ensuring efficient query execution for real-time data and inference pipelines.
- Implemented frontend state management using NgRx to handle streaming AI responses and complex user workflows.
- Built cloud-native services on Azure and GCP with containerized deployments, enabling scalable inference workloads.
- Applied observability practices with Prometheus and OpenTelemetry, tracking performance of AI-driven backend services.
- Wrote comprehensive automated test suites with PyTest, Jasmine, and Jest, ensuring robust and maintainable code.
- Participated in Agile sprints, collaborating with product managers and designers to refine AI-driven user journeys.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Delivered full-stack applications with Angular 8 frontends and Python Django backends, ensuring robust business workflows.
- Integrated **AI/ML services into customer applications**, delivering NLP-powered features and recommendation systems.
- Applied Angular state management with RxJS and NgRx for real-time UI updates, improving responsiveness and scalability.
- Optimized data pipelines in Python for unstructured data ingestion, applying AI inference workflows for document analysis.
- Built Dockerized microservices deployed on AWS and GCP, ensuring reproducible and scalable environments.
- Implemented REST APIs and consumed them in Angular frontends, aligning backend and frontend layers in seamless workflows.
- Adopted Agile methodologies, participating in backlog grooming, sprint planning, and retrospective improvement cycles.
- Documented system designs and APIs, enabling easier onboarding and collaboration with distributed teams.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Built Angular-based web applications with dynamic UI components consuming AI-driven APIs for content personalization.
- Supported backend development with Python Flask, contributing to integration of machine learning models into production pipelines.
- Applied CI/CD workflows with Jenkins and Docker, ensuring stable deployments of full-stack features.
- Collaborated on **RBAC authentication** modules to secure user access across both backend and frontend systems.
- Designed and documented UML workflows, ensuring clarity in architecture decisions for cross-functional stakeholders.
- Applied automated testing practices with Jasmine and PyTest, supporting high reliability for delivered modules.
- Delivered responsive and mobile-first frontends with Angular, Bootstrap, and SCSS, enhancing end-user experience.
- Worked in Scrum teams, aligning deliverables with business priorities under fast-paced timelines.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in building Python and Angular-based prototypes, gaining early exposure to full-stack AI-driven applications.
- Integrated REST APIs with Angular frontends, ensuring smooth data exchange between client and server.
- Wrote unit tests with Jasmine and PyTest, applying TDD principles for maintainability.
- Contributed to cloud deployment experiments with AWS and Azure, learning microservice packaging with Docker.
- Applied frontend best practices with HTML5, CSS3, and JavaScript, ensuring cross-browser compatibility.
- Documented API integrations and UI flows for knowledge transfer to senior engineers.
- Gained hands-on experience in Agile Scrum cycles, participating in standups, reviews, and sprint demos.
- Delivered small independent modules across backend and frontend, developing full-stack expertise early in career.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Google Cloud Professional Machine Learning Engineer
 - ❖ Microsoft Certified: Azure AI Engineer Associate
 - ❖ Angular Advanced Developer Certification
 - ❖ Scrum Master Certified (SMC)
-

PROJECTS

- **AI-Powered Dashboard (Angular + Python)** – Built cross-platform solution integrating GPT-based APIs with Angular 14 dashboards for real-time insights.
- **LangChain-Powered Agent Services** – Designed Python backend using LangChain for multi-step reasoning, integrated with Angular UIs.
- **Cloud-Native AI Inference Pipeline** – Deployed microservices on GCP with Kubernetes and Docker, serving large-scale model inferences.
- **Full-Stack LLM Explorer** – Created Angular interface connected to Python FastAPI backend for interactive exploration of GPT and Gemini models.
