

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience in designing, developing, and deploying scalable full stack applications using **Python (FastAPI), Angular, AWS, Terraform, CI/CD pipelines, and secure API-driven architectures**. Proven track record in building cloud-native solutions, integrating AI-driven use cases, and collaborating in international agile teams. Strong expertise in DevSecOps practices, infrastructure as code, and modern frontend frameworks.

TECHNICAL SKILLS

- **Frontend:** Angular, React.js, TypeScript, JavaScript, HTML5, CSS3, UI/UX best practices
- **Backend:** Python (FastAPI, Django, Flask), Node.js, .NET Core, RESTful API design
- **Cloud & DevOps:** AWS (EC2, Lambda, S3, RDS, ECS, EKS), Terraform, Docker, Kubernetes, Argo CD, Jenkins, GitHub Actions
- **Databases:** SQL Server, PostgreSQL, MySQL, MongoDB, Redis, NoSQL solutions
- **Security:** Authentication & Authorization (OAuth2, JWT, SAML), API Security, Data Protection, DevSecOps principles
- **Other Tools:** Git, Jira, Confluence, Agile/Scrum methodologies

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed and implemented full stack applications with **Python FastAPI backend and Angular frontend**, ensuring modular, scalable, and maintainable architectures.
- Built **secure RESTful APIs** with OAuth2 and JWT authentication, integrating state management and authorization mechanisms for enterprise-grade platforms.
- Applied **infrastructure as code with Terraform**, enabling reproducible AWS environments and automated deployments using CI/CD pipelines.
- Optimized backend services for **high-performance AI-driven applications**, reducing API response times by over 40% through caching and query tuning.
- Developed cloud-native solutions on **AWS (EC2, S3, Lambda, RDS)**, leveraging microservices and containerized workloads with Docker and Kubernetes.
- Collaborated with UI/UX teams to design and deliver intuitive **user interfaces**, ensuring accessibility, responsive layouts, and seamless user experience.

- Established **DevSecOps practices** including automated security scans, secret management, and monitoring, strengthening system reliability and compliance.
- Mentored junior developers, reviewed code for adherence to best practices, and contributed to knowledge-sharing sessions across distributed teams.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed customer-facing applications with **Angular and React**, integrating APIs from backend services to deliver smooth and engaging user experiences.
- Created **backend microservices using Python and Node.js**, managing data pipelines and supporting large-scale enterprise integrations.
- Implemented **automated CI/CD pipelines** with Jenkins and GitHub Actions, reducing release cycles from weeks to days while improving deployment reliability.
- Configured **Terraform templates for AWS resources**, automating infrastructure provisioning for multi-environment deployments.
- Secured platforms with **API Gateway, JWT authentication, and role-based access control**, ensuring compliance with security policies.
- Improved performance of data-intensive services by optimizing database queries and introducing **caching strategies with Redis and NoSQL databases**.
- Actively participated in agile ceremonies, working with international stakeholders to clarify requirements, refine backlog items, and deliver sprint commitments.
- Led code reviews, technical workshops, and **cross-functional collaboration**, fostering a culture of engineering excellence and accountability.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built **full stack applications** integrating Angular frontends with Python/Django and .NET Core backends, focusing on scalability and modularity.
- Designed **REST APIs and data exchange workflows** for multiple enterprise applications, enabling smooth third-party system integrations.
- Migrated legacy systems to **cloud-native AWS architectures**, utilizing EC2, RDS, and S3 while ensuring cost efficiency and scalability.
- Developed **secure authentication flows** using OAuth2 and SAML, integrating with corporate identity providers for enterprise customers.
- Maintained and optimized SQL Server and PostgreSQL databases, implementing **indexing and partitioning strategies** to reduce query execution time.
- Collaborated with product managers and designers to implement **responsive and user-friendly interfaces** aligned with UI/UX best practices.
- Introduced **unit and integration testing frameworks**, increasing test coverage and reducing production defects by over 30%.
- Participated in agile delivery, providing **continuous improvements** to software development lifecycle processes and team productivity.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Developed **backend services using Python and Django**, implementing APIs for e-commerce and digital media platforms.
- Built interactive **frontend interfaces using AngularJS**, focusing on responsive layouts and seamless cross-browser compatibility.
- Configured AWS resources including **S3 for storage and EC2 for compute**, enabling high-availability deployments for client solutions.
- Assisted in **infrastructure automation**, writing Ansible playbooks and introducing early IaC practices to support CI/CD pipelines.
- Ensured **secure data handling** and implemented encryption strategies for sensitive client information.
- Worked in collaboration with UI/UX designers to enhance visual consistency and **optimize user engagement across web applications**.
- Participated in client meetings, gathering requirements, and translating business needs into **technical specifications and deliverables**.
- Wrote technical documentation for **API endpoints, deployment guides, and architecture diagrams**, supporting long-term maintainability.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in the development of **frontend applications using AngularJS**, creating reusable components and improving maintainability.
- Supported backend development with **Python Flask**, implementing simple REST APIs and testing data integration workflows.
- Learned and applied **basic AWS services** including S3 for storage and EC2 instances for small-scale deployments.
- Created **CI/CD automation scripts** with Jenkins, reducing manual deployment overhead and improving release consistency.
- Implemented **basic security practices** such as hashed password storage and HTTPS enforcement for development environments.
- Participated in **UI/UX workshops**, contributing to wireframes, prototypes, and interface improvements.
- Documented coding standards, onboarding guides, and **API usage manuals** for new developers joining the team.
- Collaborated with senior engineers on debugging, performance optimization, and **technical troubleshooting** for client issues.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
 - Microsoft Certified: Azure Solutions Architect Expert
 - Google Cloud Professional Cloud Architect
 - Certified Kubernetes Administrator (CKA)
-

PROJECTS

- **AI Platform for Swiss Organization** – Built and deployed a cloud-native AI platform on AWS with Python FastAPI, Angular, and Terraform, showcasing scalable AI use cases.
- **Customer Engagement Portal** – Developed a multi-tenant Angular and Node.js portal with secure APIs, integrating real-time analytics and CI/CD pipelines.
- **Cloud Migration for Enterprise ERP** – Led migration of a legacy ERP system to AWS using Terraform, Docker, and Kubernetes, improving scalability and reducing costs.
- **E-commerce API Gateway** – Designed and implemented a FastAPI-based gateway with OAuth2 and JWT, handling secure integrations with multiple payment providers.
- **Data Analytics Dashboard** – Built a React and Python analytics dashboard with PostgreSQL backend, delivering real-time business insights and visualization.
- **Healthcare Management System** – Developed a HIPAA-compliant platform with .NET Core and Angular, ensuring secure patient data exchange and role-based access.
- **IoT Monitoring Solution** – Implemented a scalable IoT monitoring service on AWS Lambda and DynamoDB, enabling event-driven processing of sensor data.
- **DevSecOps Automation** – Created automated CI/CD pipelines with Terraform, Argo CD, and Kubernetes, integrating security checks into the release process.
