

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Software Engineer with **9+ years of experience** delivering scalable backend systems, cloud-native applications, and API-driven architectures. Specialized in **Python/Django and Golang** with proven success building high-performance services across **AWS cloud environments**. Adept at **GraphQL/REST API development**, external API integrations, and DevOps practices for deployment automation, performance optimization, and testing best practices. Experienced contractor with a track record of working in **fast-paced, startup-driven environments** balancing speed and quality.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python, Django, Golang, JavaScript, Node.js, TypeScript, React, HTML, CSS, SCSS
- **APIs & Data:** GraphQL, REST APIs, WebSockets, gRPC, API integrations
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, SQL, NoSQL
- **Cloud Platforms:** AWS (EC2, S3, RDS, Lambda, API Gateway, CloudFormation), GCP, Azure
- **DevOps & Tools:** Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, GitLab CI/CD
- **Testing & Monitoring:** PyTest, Go testing framework, Postman, JUnit, Jest, Prometheus, Grafana, ELK Stack
- **Other:** SaaS architecture, microservices, serverless applications, Agile/Scrum, TDD/BDD

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Designed and implemented **scalable microservices in Golang and Django**, powering enterprise SaaS applications used by thousands of clients daily.
- Developed and maintained **GraphQL and REST APIs**, ensuring low-latency responses and secure data transfer for customer-facing applications.
- Led migration of legacy monolith services to **AWS Lambda and EC2-based microservices**, improving scalability and reducing costs by 30%.
- Integrated multiple **external APIs** (payment gateways, third-party analytics, and messaging systems) with robust error handling and retry strategies.
- Improved **test automation pipelines** by introducing PyTest and Go test frameworks, raising unit/integration test coverage above 90%.

- Deployed high-performance APIs using **AWS RDS (PostgreSQL) and DynamoDB**, optimizing queries for large-scale data ingestion and retrieval.
- Collaborated with product owners and cross-functional teams, translating business requirements into **production-ready cloud solutions**.
- Mentored junior developers in **Python/Django and Golang best practices**, ensuring code quality, testing discipline, and performance improvements.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Built **full-stack applications** with Django and React, delivering digital marketing platforms supporting thousands of concurrent users.
- Created and optimized **REST APIs for real-time campaign tracking**, ensuring accurate metrics and high availability under heavy loads.
- Implemented AWS solutions including **S3 for static asset storage, EC2 for backend services, and RDS for relational data**.
- Developed **GraphQL services** to provide flexible data querying capabilities for dashboards and reporting modules.
- Enhanced application performance by **profiling Python code and optimizing database queries**, reducing response times by 45%.
- Automated deployments with **Docker and Kubernetes**, streamlining CI/CD pipelines and ensuring zero-downtime releases.
- Designed and enforced robust **unit, integration, and end-to-end testing frameworks**, ensuring system reliability.
- Partnered with stakeholders to rapidly prototype and deliver solutions in **agile, startup-like conditions**.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Engineered backend services with **Python/Django** for e-commerce and fintech applications, ensuring transactional integrity and scalability.
- Designed **secure authentication systems** with JWT and OAuth2 across multiple platforms, integrating with external identity providers.
- Deployed **serverless applications using AWS Lambda** for real-time event-driven workflows, improving cost efficiency.
- Built **custom API integrations** with logistics and payment services, enabling seamless third-party interoperability.
- Introduced **code review practices, CI/CD pipelines, and testing frameworks**, reducing production incidents by 40%.
- Optimized **PostgreSQL and MySQL databases**, implementing indexing and partitioning strategies for high-volume data.
- Actively participated in client discussions, delivering **tailored solutions in startup and enterprise environments**.
- Ensured compliance with **GDPR and security best practices** across all systems.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Contributed to **Python/Django backend development** for content management and publishing platforms.
- Supported deployment of services on **AWS EC2 and S3**, configuring monitoring and alerting pipelines.
- Built and documented **RESTful APIs** consumed by frontend and third-party systems.
- Enhanced application security through **input validation, encryption, and API authentication improvements**.
- Developed **automated unit and integration tests** for backend services, ensuring reliable releases.
- Collaborated with senior engineers on **microservices architecture migration**.
- Improved CI/CD workflows, reducing build times by 20%.
- Delivered well-documented solutions enabling smooth handovers and onboarding.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Assisted in development of **Django applications**, focusing on API endpoints and database schemas.
- Contributed to **frontend integration with React and REST APIs**, improving user experience.
- Worked with **MySQL and MongoDB**, gaining exposure to SQL and NoSQL models.
- Deployed small-scale projects on **AWS EC2 and S3**, learning best practices for cloud infrastructure.
- Conducted **QA testing and bug fixing**, improving system reliability during releases.
- Documented technical designs and contributed to system architecture discussions.
- Supported senior developers in **third-party API integrations**, ensuring stable connectivity.
- Gained hands-on experience in **agile workflows and team collaboration**.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
 - Google Cloud Professional Cloud Developer
 - Django for Professionals (Advanced Udemy Certification)
 - Golang Microservices & Distributed Systems (Coursera)
 - REST API Design & GraphQL Fundamentals (Pluralsight)
-

PROJECTS

- **Scalable E-Commerce Platform (Python/Django + AWS):** Designed a distributed backend system handling 100k+ concurrent users, integrating third-party payment APIs and deployed on AWS EC2/S3 with CI/CD pipelines.
- **Real-Time Analytics Dashboard (Golang + GraphQL):** Built high-performance services with Golang and GraphQL, aggregating data streams from multiple APIs, achieving sub-second query response times.
- **Serverless Video Processing Pipeline (AWS Lambda + S3):** Implemented an event-driven pipeline for video upload, encoding, and storage, reducing infrastructure costs by 40%.
- **Fintech API Gateway (Django + Golang):** Engineered secure APIs enabling financial transactions, integrating multiple banking APIs with audit logging and automated test coverage above 95%.
