

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative and results-oriented Full-Stack Developer with 8+ years of experience in building scalable web applications using modern technologies including Python (FastAPI, Flask), React.js, Redux, PostgreSQL, and Docker. Proven expertise in end-to-end application development, performance optimization, API design, and cloud-based deployments. Adept at collaborating across functions, mentoring junior developers, and driving product growth in agile environments. Passionate about clean architecture and maintainable codebases.

TECHNICAL SKILLS

- Languages & Frameworks:** Python (FastAPI, Flask, Django), JavaScript (ES6+), TypeScript, React.js, Redux, HTML5, CSS3, Next.js, Bootstrap
- Backend & APIs:** RESTful APIs, ORM (SQLAlchemy, Django ORM), PostgreSQL, MySQL
- DevOps & Deployment:** Docker, Git, GitHub Actions, Linux shell scripting, CI/CD pipelines
- Testing:** Pytest, Jest, React Testing Library
- Cloud & Tools:** AWS (EC2, S3, Lambda), Vercel, Netlify, GCP (basic), Webpack, Babel
- Project Tools:** Jira, Trello, Notion, Figma, Slack
- Version Control:** Git, GitHub, Bitbucket

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Architected and developed multiple full-stack applications using FastAPI, React.js, PostgreSQL, and Docker, supporting real-time analytics and user dashboards with advanced filtering and charting.
- Implemented secure REST APIs for dynamic data ingestion pipelines with JWT-based authentication, reducing average query response time by 30%.
- Led front-end integration with React (Hooks, Context API, and Redux), building reusable component libraries to improve dev efficiency across projects.
- Migrated monolithic codebase to microservices using Python and Docker, enabling faster deployments and independent scaling of services.
- Introduced end-to-end testing suites using Pytest and Jest, increasing test coverage from 40% to over 85%.
- Mentored 3 junior engineers and conducted weekly code reviews to ensure adherence to quality standards and best practices.
- Coordinated closely with UI/UX teams and product managers to transform business needs into robust, scalable solutions.

- Played a key role in deployment automation and containerization workflows using Docker, GitHub Actions, and AWS Lambda.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Designed RESTful services using Flask and PostgreSQL, supporting mobile advertising platforms for high-volume data collection and reporting.
- Built front-end SPAs using React and Bootstrap, delivering dynamic interfaces for campaign analytics and targeting.
- Refactored legacy jQuery code into modular React components, improving maintainability and reducing code duplication.
- Integrated third-party APIs (Facebook Graph API, Google Analytics) to automate marketing operations and analytics dashboards.
- Developed custom tracking scripts and browser-based extensions to support A/B testing in real-time advertising flows.
- Implemented data caching and indexing strategies to boost backend performance by over 40%.
- Conducted technical feasibility reviews with cross-functional teams, aligning tech strategy with marketing goals.
- Supported the transition to Docker-based development and staging environments for improved parity and testing.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Contributed to enterprise software tools using Python and MySQL, with a focus on automating business workflows for finance and logistics clients.
- Created interactive dashboards using React, Redux, and Chart.js for tracking inventory, sales, and KPIs.
- Developed and maintained internal admin portals using Django and Bootstrap for client access control and data management.
- Participated in Agile ceremonies, including sprint planning, estimation, and retrospectives across multiple development teams.
- Integrated webhooks and background job queues using Celery and Redis to handle long-running processes and email automation.
- Ensured application security by enforcing role-based permissions and implementing OWASP practices across REST endpoints.
- Documented APIs using Swagger/OpenAPI standards to support frontend-backend alignment and developer onboarding.
- Championed usage of unit and integration tests using Pytest and coverage reports to maintain reliability in CI/CD.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Built modular front-end features in React and jQuery for e-commerce analytics dashboards.
- Supported backend development using Flask and integrated PostgreSQL queries via SQLAlchemy for order tracking.

- Deployed projects on staging environments using Docker and monitored logging via basic shell scripts and cron jobs.
- Collaborated with designers to integrate responsive UI based on Figma mockups into production pipelines.
- Created role-based login systems and session-based access control using Flask-Login.
- Handled bug resolution and system debugging across browser environments to ensure smooth UX across Chrome, Firefox, and Safari.
- Participated in peer code reviews and contributed to sprint documentation and planning sessions.
- Supported DevOps practices by contributing scripts to ease local dev setup and container builds.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Developed basic RESTful services using Flask to support inventory and customer operations for retail web apps.
- Built form-based UI components using React and Bootstrap for admin portals.
- Implemented database schemas and seed data using PostgreSQL and performed unit testing with Pytest.
- Created reusable React forms with validation logic and integrated data binding with backend endpoints.
- Debugged and documented API responses for client integration and collaborated with senior engineers in Agile workflows.
- Assisted in the creation of deployment pipelines for staging via shell scripts and local Docker containers.
- Conducted research on frontend performance optimization techniques and contributed findings to internal documentation.
- Supported error monitoring via logging tools and wrote unit tests for validation and integration points.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Python for Everybody (Coursera)
- ❖ Full-Stack Web Development with React (Coursera Certificate)
- ❖ AWS Fundamentals: Going Cloud-Native – Amazon Web Services

PROJECTS

- ✓ **CloudNote – Serverless Notes App**

- A lightweight note-taking app with FastAPI backend hosted on AWS Lambda and React.js frontend deployed via Vercel.
- Features markdown support, secure JWT authentication, and automatic cloud sync with S3.

✓ **TalentSync – AI-powered Resume Matcher**

- Full-stack tool using FastAPI and React to match resumes to job descriptions using NLP and cosine similarity.
- Built REST APIs, a responsive frontend, and integrated Hugging Face transformers for text embedding.
