

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative and detail-oriented Senior Software Engineer with over 9 years of experience building scalable web applications using Python, JavaScript, React, and cloud platforms like AWS and Azure. Adept at leading development across full-stack environments, architecting robust APIs, implementing CI/CD pipelines, and delivering in Agile teams across international projects. Passionate about writing clean, testable code and driving high-impact digital solutions in fast-paced, client-focused environments.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, HTML5, CSS3, SQL, Bash
- **Frontend:** React.js, Angular, Redux, Next.js, SASS, Tailwind
- **Backend & APIs:** FastAPI, Flask, Django, Node.js, REST, SOAP
- **Testing & Quality:** PyTest, xUnit, Moq, Jest, Snapshooter, Flurl.Http, FluentAssertions, Unit/Integration Testing
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), Azure, Docker, GitHub Actions, GitLab CI/CD, Terraform
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Tools & Libraries:** Autofac, AutoMapper, Mapster, Serilog, FluentValidation, GIT, Jira, Confluence
- **Practices:** OOP, Functional Programming, Clean Code, TDD, Agile, Scrum

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Spearheaded the full-stack development of AI-enhanced applications using Python (FastAPI), React, and PostgreSQL deployed on AWS, enhancing data delivery performance by 30%.
- Developed and maintained scalable REST APIs for healthcare and fintech clients, integrating OAuth2, JWT authentication, and versioning for long-term API lifecycle management.
- Implemented robust unit and integration testing with PyTest and xUnit, ensuring 90%+ test coverage across microservices while integrating pipelines into GitHub Actions workflows.
- Refactored legacy Flask codebases to FastAPI, applying Clean Code principles and dependency injection via Autofac for improved readability and scalability.

- Integrated responsive frontend interfaces using React.js and Redux with real-time WebSocket feeds, achieving optimal user engagement across mobile and desktop platforms.
- Led containerization strategy using Docker and Docker Compose to streamline development workflows and onboard new developers in under 1 day.
- Collaborated closely with cross-functional product teams in Agile sprints, including daily stand-ups, grooming, and retrospectives with international stakeholders.
- Mentored 4 junior developers, providing weekly code reviews and pairing sessions, which improved team velocity and reduced technical debt.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Built web platforms for digital marketing campaigns using Django and React, managing over 1 million users with integrated analytics and real-time reporting dashboards.
- Deployed multiple full-stack apps on Azure with automated CI/CD pipelines using GitLab, improving deployment frequency from bi-weekly to daily without downtime.
- Engineered RESTful microservices and integrated third-party SOAP APIs to facilitate secure data exchange between internal tools and external vendors.
- Delivered responsive UIs with Angular and Bootstrap, ensuring WCAG-compliant accessibility and mobile-first design across all client-facing solutions.
- Introduced containerized dev environments via Docker and docker-compose, reducing environment-specific bugs and improving QA turnaround by 40%.
- Applied Clean Architecture and Domain-Driven Design to improve backend maintainability and team onboarding for multi-tenant web systems.
- Created ETL pipelines to import marketing datasets, applying data validation with Pandas and custom validators, feeding into dynamic dashboards via Chart.js.
- Engaged in bi-weekly sprint planning with product owners and business analysts to deliver prioritized features on schedule.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Designed and implemented enterprise B2B CRM systems using Python/Django and Vue.js with a focus on high-performance querying and advanced search filters.
- Utilized PostgreSQL and Elasticsearch for fast querying and indexing of client datasets exceeding 100GB, achieving sub-second response time under high load.
- Built comprehensive admin panels with user permission management, audit logging, and dynamic role-based access using JWT and RBAC patterns.
- Automated infrastructure setup with Ansible and Bash scripts for Linux server provisioning and cloud VM management, reducing manual error-prone processes.
- Integrated payment processors via REST APIs and handled webhook processing with retry logic and event logging.
- Implemented frontend unit and e2e tests using Jest and Cypress, increasing UI test coverage by 70% within 3 months.
- Actively contributed to code reviews and technical documentation to ensure consistency and promote engineering best practices.
- Participated in product design discussions, translating business requirements into robust technical architectures.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Created modular web interfaces using AngularJS and SCSS for logistics and e-commerce platforms, delivering pixel-perfect UI components from Figma designs.
- Developed Flask-based backend services with RESTful API endpoints, including authentication and logging using JWT and Serilog.
- Wrote reusable front-end modules and custom directives, significantly improving frontend maintainability and reducing duplicated code by 40%.
- Assisted in cloud-based deployment using AWS EC2 and S3 for web asset hosting and storage.
- Created test plans and executed unit testing with Mocha and Karma, achieving higher QA pass rates across multiple releases.
- Supported Agile project delivery with daily stand-ups, sprint demos, and backlog grooming.
- Collaborated with QA and design teams to resolve issues, perform root cause analysis, and enhance UX based on user feedback.
- Documented system features and functionality using Confluence, supporting knowledge sharing across teams.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Built internal dashboards with Flask and jQuery to manage user subscriptions, billing, and event logs, reducing manual admin overhead.
- Developed scripts to automate data entry and validation for client onboarding, accelerating setup time by 50%.
- Implemented user registration and authentication systems using SQLite, bcrypt, and session management best practices.
- Designed simple REST endpoints for CRUD operations and consumed them via AJAX on the frontend for seamless UX.
- Conducted cross-browser testing and resolved CSS issues, ensuring pixel-consistent layouts across Firefox, Chrome, and IE.
- Created and maintained internal wiki with documentation on internal APIs and services.
- Supported senior developers with debugging, version control using Git, and writing detailed bug reports in Jira.
- Participated in weekly team knowledge-sharing sessions to explore tools like Jenkins, Git workflows, and Python testing libraries.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- **AWS Certified Developer – Associate** (2023)
 - **Microsoft Certified: Azure Developer Associate** (2022)
 - **Scrum.org Professional Scrum Developer (PSD I)**
 - **Udemy – Test-Driven Development with Python & PyTest** (2024)
 - **LinkedIn Learning – Advanced REST API Development in Flask & FastAPI**
-

PROJECTS

- ✓ **Sales Analytics Dashboard**
Developed an interactive dashboard using React, FastAPI, and PostgreSQL to track sales performance in real time, deployed on AWS Lambda + API Gateway with CI/CD pipelines.
- ✓ **Document Automation Tool**
Engineered a Python-based backend service with Flask and Celery that automated PDF generation and email delivery, integrated with SendGrid and Google Drive APIs.
- ✓ **Inventory Microservices Suite**
Built a microservices architecture using FastAPI, RabbitMQ, and MongoDB for inventory management, deployed via Docker and Kubernetes on Azure.
