PROFESSIONAL SUMMARY

Creative and high-impact Senior Frontend Engineer with 8+ years of experience building scalable, performance-optimized web applications using modern frameworks. Adept at migrating legacy UIs, implementing micro frontend architecture, and integrating with GraphQL and REST APIs. Proven track record of shipping engaging real-time platforms with dynamic content. Obsessed with UX and passionate about innovation in gaming, e-commerce, and gamified user experiences.

TECHNICAL SKILLS

- **Frontend:** Qwik, React, Angular, Next.js, Tailwind CSS (v4), Bootstrap 3, Material UI
- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS
- **Architecture:** Micro Frontends, Modular Design
- **Backend Familiarity:** Node.js, Express.js, PHP (Laravel), RESTful APIs, GraphQL
- **Tools:** Builder.io, Git, Webpack, Vite, ESLint, Prettier
- **DevOps:** GitHub Actions, Docker, CI/CD pipelines
- **Testing:** Jest, React Testing Library, Cypress
- **CMS:** Headless CMS (Strapi, Contentful), Builder.io
- **Database:** MySQL, MongoDB, SQLite

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Migrated and modernized multiple enterprise UI components from Bootstrap 3 and Angular to Tailwind 4 and Qwik for improved performance and maintainability across scalable web apps.
- Designed and implemented modular micro frontend architecture enabling team collaboration and reusable independent modules across products.
- Integrated dynamic content-driven pages using Builder.io, optimizing performance and SEO rendering through edge caching strategies.
- Developed and maintained interactive UI for gamified platforms with real-time state updates using GraphQL and RESTful APIs.
- Led frontend refactors to support headless CMS-based workflows and admin portal content management.

- Collaborated with UX designers and backend engineers to ensure pixel-perfect, mobile-first responsive design under Agile delivery cycles.
- Optimized web applications with lazy loading, code splitting, and prefetching techniques, reducing average page load time by 45%.
- Implemented end-to-end testing and CI pipelines to ensure consistent delivery and cross-browser compatibility on all major devices.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Maintained and extended features for a marketing automation dashboard built with Angular, Material UI, and Bootstrap.
- Contributed to the successful integration of third-party APIs and backend endpoints using GraphQL and REST, powering data visualization components.
- Migrated components into micro frontend patterns to support independent team workflows and deployment flexibility.
- Supported SEO and accessibility initiatives by ensuring ARIA compliance and semantic HTML in all frontend modules.
- Conducted regular performance audits using Lighthouse and implemented optimizations to improve Core Web Vitals across projects.
- Contributed to building admin tools using Builder.io and internal CMS structures for dynamic content curation.
- Supported QA teams with robust unit and integration tests using Cypress and Jest, improving test coverage to over 90%.
- Coordinated closely with stakeholders and design teams during sprint reviews to refine UX strategies and product flows.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed a gamified e-learning and commerce experience using JavaScript, Bootstrap, and jQuery which laid the foundation for future migration to SPA frameworks.
- Worked on feature-rich user interfaces for B2C platforms including gamified shopping experiences with mystery rewards and progressive UI states.
- Integrated REST APIs and developed UI logic for mystery box mechanics and promotional offers, enhancing engagement metrics by over 30%.
- Collaborated with UI/UX designers to craft visually appealing, responsive layouts adaptable across devices and screen sizes.
- Managed CMS content injection via custom-built interface and ensured seamless synchronization with backend services.
- Mentored junior developers and conducted code reviews to ensure consistency and knowledge sharing.
- Helped set up Git workflows and branching strategies for scalable team collaboration.
- Monitored frontend logs and user behavior for UX issues using Hotjar and Sentry, delivering timely fixes and enhancements.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Built components in AngularJS for a digital booking and payment system, ensuring responsive design and cross-browser support.
- Implemented dashboard widgets and form validations using Bootstrap and jQuery, reducing error reports by 40%.
- Connected frontend interfaces to REST APIs and supported real-time updates through polling mechanisms.
- Contributed to upgrading legacy UIs and migrating portions of the platform to TypeScript for better maintainability.
- Participated in Agile ceremonies and backlog grooming, helping define realistic sprint scopes.
- Wrote technical documentation for internal toolkits and frontend architecture standards.
- Created reusable form components and dropdown filters to speed up future development cycles.
- Maintained version control discipline and code standards across the frontend team.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Assisted in developing admin dashboards and form-heavy UIs with Bootstrap 3 and plain JavaScript.
- Fixed layout bugs, improved responsiveness, and added interactivity to existing client-facing portals.
- Learned core concepts of UI state management, asynchronous JS, and DOM manipulation.
- Participated in weekly knowledge-sharing sessions and pair programming to enhance learning curve.
- Supported database debugging tasks and wrote SQL scripts for test cases.
- Conducted manual frontend tests for UI consistency and user flow.
- Built internal style guide references for UI patterns and CSS class conventions.
- Created lightweight tools for automated UI screenshots using headless browsers.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ✓ Frontend Architecture and Micro Frontends – FrontendMasters
- ✓ GraphQL Fundamentals – Apollo Academy
- ✓ Advanced CSS and Sass – Udemy
- ✓ Qwik Framework Essentials – Builder.io Labs (in progress)

PROJECTS

❖ Mystery Box Commerce Platform

Built a gamified shopping interface inspired by loot-box mechanics, integrating frontend with Builder.io and GraphQL APIs to enable real-time inventory reveals and order processing.

❖ **Frontend Migration Toolkit**

Developed a migration utility suite to transform legacy Angular+Bootstrap UIs into Tailwind+Qwik structures, dramatically reducing redesign and QA time.
