

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Detail-oriented Front-End Developer with over 8 years of hands-on experience crafting responsive, accessible, and scalable web applications. Adept in translating high-fidelity Figma designs into reusable components within Ruby on Rails environments. Proven expertise with HTML5, CSS3 (SCSS), Turbo, Stimulus, and ERB. Strong advocate for user-centric design and maintainable codebases. Skilled collaborator with UI/UX designers and back-end engineers in fast-paced agile teams.

TECHNICAL SKILLS

- **Languages & Markup:** HTML5, CSS3, SCSS, JavaScript (ES6+), Ruby
- **Frameworks & Libraries:** Ruby on Rails, Stimulus, Turbo, TailwindCSS
- **Design & Prototyping:** Figma, Balsamiq, Adobe XD
- **Testing Tools:** RSpec, Jest, Capybara
- **Version Control:** Git, GitHub, GitLab
- **Build & Deployment:** Webpack, Docker, CI/CD
- **Accessibility:** ARIA roles, WCAG compliance, auditing tools
- **Tools:** VS Code, Postman, Chrome DevTools

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led front-end integration across Ruby on Rails applications, embedding responsive HTML/CSS components directly into ERB templates while maintaining full design system fidelity.
- Delivered Figma-to-code implementations with 100% visual consistency and ensured full responsiveness across breakpoints and devices.
- Refactored legacy views using Turbo and Stimulus, reducing JS complexity by 35% and improving UI reactivity without full SPA overhead.
- Collaborated on internal design system, creating reusable SCSS utilities and building pixel-perfect components shared across teams.
- Introduced accessibility standards (WCAG 2.1), adding ARIA roles and focus management—boosting Lighthouse accessibility score from 69 to 95+.
- Conducted regular code reviews, enforced semantic HTML structure, and mentored team on front-end best practices within Rails.
- Spearheaded integration testing with Capybara for critical UI flows, ensuring stability post-deployments.

- Participated in quarterly on-site planning in Estonia to bridge design-dev collaboration and align with company roadmap.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed and maintained interactive front-end modules for marketing platforms using ERB views in Ruby on Rails, improving customer conversion by 18%.
- Built dynamic and responsive layouts from detailed Figma files using SCSS and HTML5 while supporting i18n requirements.
- Integrated analytics dashboards using Chart.js and React within existing Rails apps, ensuring seamless user experience.
- Standardized UI components across campaigns by creating modular HTML templates and maintaining a shared style guide in SCSS.
- Enhanced site performance and SEO by optimizing rendering logic, lazy-loading assets, and deferring non-critical scripts.
- Partnered with QA and UX to ensure cross-browser and accessibility compliance across Chrome, Firefox, Safari, and Edge.
- Led migration effort from Bootstrap to TailwindCSS in two flagship applications to improve design consistency and responsiveness.
- Delivered front-end unit tests using Jest and added coverage reports to CI pipeline for ongoing quality control.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Built and deployed front-end modules for CRM and HR SaaS platforms using SCSS and JavaScript within the Rails stack.
- Translated visual design specs into flexible, reusable HTML structures using partials and helpers in ERB.
- Created mobile-first layouts and ensured smooth performance across device resolutions, improving mobile usability by 42%.
- Developed onboarding UI workflows with Stimulus.js, allowing lightweight interactivity without full React integration.
- Managed Git workflows and performed pull request reviews with a strong focus on accessibility and usability.
- Integrated front-end validations with server-side logic using custom form builders and Stimulus controllers.
- Collaborated with back-end team to align API data responses with front-end component expectations.
- Reduced CSS duplication by over 60% through refactor into a centralized SCSS architecture.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Worked on Ruby on Rails eCommerce projects; transformed Sketch designs into Rails views with semantic HTML and clean SCSS.

- Introduced basic front-end testing with Jasmine and performed browser testing to ensure visual consistency.
- Added Stimulus-powered dynamic behaviors for forms, modals, and navigation to improve interactivity without full-page reloads.
- Participated in agile stand-ups and sprint planning; collaborated closely with product owners and designers to iterate fast.
- Conducted responsive QA on tablet and mobile viewports and adjusted layout structure accordingly.
- Maintained internal documentation on front-end patterns and usage guidelines for future developers.
- Assisted in Rails asset pipeline management and organized components with BEM naming conventions.
- Participated in bi-weekly code audits, improving code readability and enforcing company coding standards.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Shadowed senior developers and implemented front-end features in a legacy Rails application with jQuery and SCSS.
- Transformed Photoshop designs into static HTML pages and later integrated them into ERB templates.
- Rebuilt legacy layouts with responsive structure using media queries and grid systems.
- Learned and applied Git best practices in a team setting, resolving conflicts and branching for feature development.
- Integrated basic accessibility features such as keyboard navigation and alt-text for all interactive elements.
- Worked on bug triage and handled front-end support tickets during production incidents.
- Performed initial tests using Chrome DevTools and conducted manual regression testing pre-deployment.
- Documented design discrepancies and suggested UI improvements to align with user expectations.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ **Front-End Web UI Frameworks and Tools** – Coursera, 2023
 - ❖ **Ruby on Rails: Advanced Views and Components** – Pluralsight, 2022
 - ❖ **Accessibility Fundamentals** – W3C edX, 2022
 - ❖ **TailwindCSS Masterclass** – Udemy, 2023
-

PROJECTS

✓ **Design System Migration for Rails UI**

- Led a front-end refactor project converting legacy Bootstrap UI to TailwindCSS across 5 applications, increasing design consistency and reducing CSS load time by 40%.
- Built a component library from Figma design tokens and integrated it into Rails via SCSS modules and ERB partials.

✓ **Elderly Safety Dashboard Interface (Prototype)**

- Designed and implemented a front-end prototype for a smart lighting dashboard for elderly care using HTML5, SCSS, and Rails views.
- Focused on accessibility, color contrast, and intuitive UI for caregivers, tested against WCAG 2.1 AA guidelines.
