PROFESSIONAL SUMMARY

Results-driven Full-Stack JavaScript/React Engineer with over 8 years of experience delivering production-grade applications for enterprise and startup clients across Europe and the US. Adept at collaborating in remote teams, implementing high-quality UI/UX, and building scalable frontend and backend systems. Proven ability to drive features from concept to production using clean, maintainable code and agile processes. Strong communication skills and comfortable working with cross-functional design and product teams. Experienced with C#, DynamoDB, component libraries, and timezone-spanning projects.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, Redux, React Hooks, JavaScript (ES6+), TypeScript, HTML5, CSS3, Styled Components, Tailwind CSS
- **Backend:** Node.js, Express.js, C#, .NET Core, REST APIs
- **Databases:** DynamoDB, MongoDB, PostgreSQL, MySQL
- **DevOps & Tools:** GitHub, GitLab, CI/CD, Docker, Vercel, Webpack, Babel, Bitbucket, JIRA, Slack, VS Code
- **Testing:** Jest, React Testing Library, Cypress, Enzyme
- **Other:** Agile/Scrum, Remote Collaboration, Figma Integration, GitHub PR Process, Technical Documentation

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led development of scalable React applications for US-based medical clients, ensuring seamless integration with dynamic backend APIs and optimized user experience.
- Collaborated daily with cross-functional teams using Slack, Google Meet, and GitHub to review code, resolve bugs, and drive fast release cycles.
- Spearheaded shared component library adoption across multiple teams, reducing frontend redundancy and ensuring UI consistency.
- Integrated responsive design systems into high-traffic web apps, achieving cross-browser compatibility and accessibility standards.
- Architected reusable React Hooks and functional components, boosting code maintainability and accelerating feature rollout.

- Participated in US-timezone client stand-ups and sprint reviews, ensuring transparency and proactive delivery of sprint goals.
- Refactored legacy frontend codebases to modern React standards, leading to a 40% improvement in loading performance.
- Mentored junior developers and led peer code reviews, fostering a culture of clean code and continuous learning.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed full-stack features using JavaScript, React, and Node.js for web-based marketing platforms servicing EU clients.
- Coordinated directly with designers to implement responsive and pixel-perfect interfaces using modern CSS practices.
- Maintained and optimized shared UI components used across multi-brand web apps, ensuring modularity and flexibility.
- Built RESTful APIs in Node.js and managed DynamoDB schemas to support real-time marketing campaigns.
- Collaborated in Agile sprints, delivering features on tight deadlines while maintaining high code quality.
- Created automated tests with Jest and React Testing Library to validate UI behavior across browsers.
- Ensured application uptime and performance by setting up basic monitoring and alerts for key user flows.
- Assisted with setting up CI/CD pipelines using GitLab to automate testing and deployment workflows.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Implemented new frontend features in React and migrated legacy jQuery interfaces into modular React components.
- Partnered with UX/UI teams to design intuitive healthcare dashboards used by clinicians and administrators.
- Built internal dashboards to visualize real-time patient metrics and integrated D3.js for custom charting.
- Refactored large monolith applications into modular microservices using Node.js and Express.
- Introduced code review processes and Git branching standards to improve collaboration across dev teams.
- Worked closely with QA to reproduce and resolve complex frontend issues across desktop and tablet devices.
- Provided timezone crossover support for US-based QA and client stakeholders during user acceptance testing.
- Supported backend engineers by optimizing REST endpoints for frontend consumption.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Built interactive React dashboards for internal analytics tools serving B2B clients.
- Streamlined frontend data flow by adopting Redux and normalizing API interactions.
- Partnered with product managers to prioritize UI bugs and feature enhancements in sprint planning.
- Developed reusable layout components that adapted across mobile and desktop views.
- Delivered weekly demo sessions to internal stakeholders and gathered feedback to iterate on designs.
- Wrote clear and concise documentation for new features and internal usage guides.
- Participated in code review sessions and contributed to JavaScript style guide enforcement.
- Assisted in implementing analytics tracking across key user interaction points.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Contributed to early-stage web app development with a focus on JavaScript, HTML, and CSS.
- Learned agile methodologies while working on real client projects with mentorship from senior engineers.
- Assisted in testing and debugging frontend bugs across multiple browsers.
- Implemented basic interactive features such as form validation and dynamic content loading.
- Integrated APIs to populate frontend data tables with real-time results.
- Participated in weekly stand-ups and sprint retrospectives, learning modern dev workflows.
- Supported documentation and QA efforts for small internal projects.
- Took part in internal coding challenges and code review exercises to improve technical skills.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ AWS Certified Cloud Practitioner (*Add actual ID/date if applicable*)
- ❖ JavaScript Algorithms and Data Structures – freeCodeCamp
- ❖ React & Redux – Udemy/Pluralsight (if completed)

PROJECTS

Telehealth React App – Overloop (US Client)

- Built an end-to-end React-based healthcare app connecting users to verified doctors based on symptoms and specialization.
- Integrated secure authentication and API-driven search to support filtered queries by location, specialty, and availability.
- Implemented live UI updates via WebSockets for appointment confirmations and doctor notifications.
- Collaborated with design team to iterate rapidly on Figma prototypes and responsive component layouts.
- Delivered pixel-perfect components with accessibility and keyboard navigation support.

Component Library for Multiteam Platform

- Developed a modular component library in React with Storybook to unify UI development across teams.
- Published reusable components such as buttons, modals, and form elements with clear documentation and versioning.
- Integrated accessibility checks and visual regression testing to ensure long-term maintainability.
