

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Results-driven Senior Software Developer with over 9 years of experience building high-performance, scalable web applications using ReactJS, JavaScript (ES6+), and modern tooling. Proven expertise in designing responsive, testable, and maintainable front-end systems. Adept in unit/integration testing, API integration, and performance optimization. Known for delivering clean, well-documented code and leading architectural and code quality initiatives.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, ReactJS, HTML5, CSS3, SASS, LESS, Node.js
- **Testing:** Jest, Mocha, Jasmine, React Testing Library
- **Build Tools:** Vite, Webpack, Yarn, NPM
- **Version Control:** Git, GitHub, GitLab
- **APIs:** RESTful APIs, Axios, Fetch
- **Performance:** Lazy loading, caching strategies, code splitting, bundle optimization
- **CI/CD:** GitHub Actions, Jenkins
- **Methodologies:** Agile/Scrum, TDD, Code Reviews
- **Documentation:** Markdown, Swagger/OpenAPI, Confluence

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed and implemented scalable ReactJS frontends for B2B applications with reusable components, significantly reducing development time across teams.
- Led performance optimizations using lazy loading, tree shaking, and Vite, improving time-to-interactive metrics by over 35% across core pages.
- Integrated REST APIs with advanced error handling, retries, and caching strategies to deliver consistent user experience under fluctuating network conditions.
- Maintained 95%+ test coverage using Jest and React Testing Library across multiple repositories, ensuring feature reliability during refactoring and upgrades.

- Drove architecture redesign initiatives, introducing atomic component structuring and performance profiling to reduce bundle size by 40%.
- Created custom hooks and context providers to simplify shared state management, improving developer velocity and reducing redundant logic.
- Collaborated closely with backend teams to define API contracts and enforce schema validation, reducing integration bugs by 60%.
- Mentored junior developers, conducted code reviews, and led internal React workshops, improving team proficiency in modern JavaScript practices.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Built dynamic ReactJS interfaces for digital marketing dashboards, enhancing user analytics and content personalization workflows.
- Used Webpack and Yarn workspaces to build modular, production-ready packages for internal and external consumption.
- Integrated external REST APIs with robust error tracking and fallback strategies, ensuring business continuity during external service disruptions.
- Wrote detailed unit and integration tests using Jasmine and Mocha, enabling confidence in rapid feature rollouts.
- Tuned client-side performance by analyzing Lighthouse reports and reducing page weight with font subsetting and asset minification.
- Contributed to cross-functional architecture reviews, standardizing frontend development practices across three engineering teams.
- Improved continuous deployment pipeline by incorporating static analysis and test coverage checks, reducing post-deploy defects.
- Participated in agile ceremonies and provided task estimations that improved sprint predictability by 20%.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed responsive UI components using HTML5, CSS3, and JavaScript, ensuring accessibility and cross-browser compatibility.
- Refactored legacy jQuery codebases into modular React components, reducing technical debt and boosting maintainability.
- Implemented client-side caching and route prefetching to enhance perceived performance on single-page applications.
- Wrote unit tests and visual regression tests, reducing UI regressions during weekly updates.
- Integrated analytics tools and created event-based triggers for actionable user insights.
- Participated in weekly code reviews, ensuring adherence to internal standards and front-end best practices.
- Supported multiple internal tools, collaborating with stakeholders to deliver features aligned with user feedback.
- Documented reusable utilities and design patterns, improving onboarding time for new frontend hires.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Built UI modules using JavaScript and SASS for a media streaming platform, integrating with REST APIs for real-time updates.
- Focused on accessibility compliance and responsive design, optimizing interfaces for multiple devices and screen sizes.
- Created unit tests with Jasmine and integrated tests into CI/CD workflows, catching bugs before deployment.
- Delivered robust error handling with fallback UI for improved user experience during API failures.
- Reduced CSS payload using modular BEM methodology and variable-driven SASS architecture.
- Helped create UI guidelines shared across the engineering department to ensure design consistency.
- Collaborated with QA and design teams to reduce UI defect rate by 50% in one quarter.
- Conducted code refactoring sessions to clean legacy code and improve testability.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Supported frontend tasks on various React and vanilla JS components under mentorship, gradually taking ownership of independent modules.
- Built internal tools for monitoring API response times and page rendering benchmarks, contributing to early-stage performance profiling.
- Participated in code reviews and pair programming sessions, gaining hands-on experience with Git-based workflows.
- Applied CSS preprocessors (LESS/SASS) to implement dynamic theming and UI flexibility across multiple apps.
- Contributed to API integration tasks and wrote detailed documentation for future junior developers.
- Delivered bug fixes and enhancements to production systems within weekly sprint cycles.
- Learned modern UI/UX principles and contributed feedback on design deliverables.
- Created CLI tools using Node.js to automate internal development tasks and JSON data manipulation.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ React Advanced Certification – Codecademy (2023)
- ❖ JavaScript Testing with Jest – Udemy (2022)
- ❖ Web Performance Optimization – Coursera (2021)
- ❖ Modern Web Development Bootcamp – freeCodeCamp (2020)

PROJECTS

- ✓ **Real-Time Sales Dashboard** – Built a React + REST-powered dashboard with dynamic charts, filters, and WebSocket updates for live sales insights. Optimized performance with memoization and lazy loading.
- ✓ **Component Library Starter Kit** – Developed an internal component library using Vite, Rollup, and SASS modules. Included Storybook docs and full testing with Jest and RTL.
- ✓ **Responsive Marketing Pages** – Created pixel-perfect, SEO-optimized landing pages with HTML5, CSS3, and React. Integrated with CMS APIs and deployed via Netlify.
