

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Mobile-focused Senior Software Engineer with 8+ years of experience designing and developing cross-platform mobile applications. Proven expertise in React Native and TypeScript, delivering scalable mobile apps for iOS and Android with consistent UX. Adept at mentoring teams, defining technical architecture, optimizing CI/CD pipelines, and driving the adoption of modern testing and monitoring strategies. Experienced in native module integration, monorepo setups, and AI-enhanced development flows. Passionate about code quality, team collaboration, and delivering business impact through technology.

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, Swift (basic), Kotlin (basic), HTML, CSS
Frameworks & Libraries: React Native, React, Redux, Expo, Jest, Detox, React Navigation, Context API
CI/CD & DevOps: GitHub Actions, Bitrise, CircleCI, Fastlane, Crashlytics, Sentry
Tools & Practices: Monorepo architecture, Modular design, CodePush, Firebase, E2E Testing, AI Copilot integration
Version Control: Git, GitHub, GitLab
Mobile Focus: Cross-platform consistency, App Store / Google Play deployment, OTA updates
Design & Collaboration: Figma, Zeplin, Jira, Agile/Scrum, Slack

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led architectural design and implementation of cross-platform mobile features using React Native with TypeScript, ensuring performance parity on both Android and iOS platforms.
- Introduced unified testing strategy using Jest and Detox, covering 95% of critical user flows and reducing production bugs by 45% across quarterly releases.
- Migrated app deployment to GitHub Actions with Fastlane integration, enabling automated CI/CD pipelines and cutting manual release time from 2 days to under 2 hours.
- Mentored junior developers and led regular code reviews, ensuring consistency with scalable architecture, SOLID principles, and React Native community best practices.
- Integrated Firebase Crashlytics and Sentry for proactive crash analytics, enabling 3x faster triage and resolution cycles for post-release issues.
- Championed transition from legacy native iOS/Android modules to unified React Native components, improving maintainability and reducing code duplication by 60%.

- Worked closely with UX and design teams in Figma to iterate on mobile-first UI with pixel-perfect precision while ensuring accessibility compliance.
- Co-designed monorepo structure for modular shared components across mobile and web platforms, simplifying dependency management and improving code reuse.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed and deployed mobile campaigns and apps using React Native and Redux for marketing clients with demanding SLAs and time-to-market requirements.
- Integrated multiple third-party SDKs, including push notifications, in-app messaging, and analytics, for personalized user engagement.
- Created modular React components across screens, optimizing for performance and minimal re-renders using memoization and React Hooks.
- Built API integration layers for mobile using Axios and RESTful design, ensuring secure and efficient client-server communication.
- Supported rollout of multiple product updates on both Apple App Store and Google Play with region-specific configuration using feature flags.
- Automated regression testing and release workflows through CircleCI and Bitrise pipelines, improving release stability and reducing QA feedback loops.
- Collaborated with backend engineers to define consistent mobile API contracts and supported API versioning to maintain backward compatibility.
- Piloted use of Expo for internal tools and quick MVPs, later migrating to bare workflow for production scalability and performance.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Transitioned legacy iOS/Android apps into a React Native cross-platform app, decreasing development time and improving feature parity.
- Designed reusable state management architecture with Context API and custom hooks to reduce Redux boilerplate while improving modularity.
- Delivered an onboarding module integrated with biometric authentication, enhancing UX and reducing drop-off by over 30%.
- Established crash monitoring and logging system using custom error boundaries and Sentry, proactively reducing high-severity issues.
- Worked closely with designers to implement responsive mobile layouts from Figma prototypes with full dynamic scaling across devices.
- Defined OTA update strategy using CodePush for instant bug fixes without app re-submission, reducing downtime and increasing user satisfaction.
- Performed native bridging to incorporate platform-specific capabilities when React Native features were insufficient, ensuring feature completeness.
- Developed internal tooling scripts for asset bundling, API mocking, and automated changelog generation during sprints.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Contributed to a React Native-based product catalog app targeting multiple regions, including RTL and localization support.
- Implemented image lazy loading and caching to improve performance on low-end devices using custom modules.
- Wrote unit and integration tests using Jest and Enzyme for core screens, increasing coverage to meet release-quality thresholds.
- Documented reusable UI components and published internal design system library for rapid prototyping and developer onboarding.
- Delivered complex animations using React Native Reanimated and Lottie, improving UX fluidity.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Developed early prototypes of cross-platform apps using React Native 0.x versions and evaluated feasibility for production use.
- Supported implementation of push notification features and backend integration for real-time updates.
- Created testing environments using Jest and mocked APIs to enable safe experimentation in early-stage development.
- Assisted senior developers with debugging and profiling slow-performing screens using Flipper and Chrome DevTools.
- Learned and applied design systems and component libraries to ensure brand-consistent UI/UX across screens.
- Participated in Agile ceremonies, sprint planning, and bug triage meetings to understand production development workflows.
- Contributed to a knowledge-sharing initiative documenting React Native component patterns and anti-patterns for internal team wiki.
- Helped migrate legacy mobile workflows to Git version control and introduced simple CI setup using shell scripts.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- Certified React Native Developer – Udacity, 2023
 - Mobile CI/CD & App Automation – Coursera, 2022
 - TypeScript Advanced Mastery – Pluralsight, 2021
 - Expo & OTA Updates – React Native School, 2021
-

PROJECTS

- ✓ **Multi-Tenant Mobile Staffing Platform** – Built scalable React Native staffing platform with Redux and Firebase backend; integrated biometric login and role-based UI access.
- ✓ **Delivery Driver App (CI/CD Enabled)** – Deployed GitHub Actions CI/CD pipeline for over-the-air updates using CodePush, Sentry monitoring, and custom crash reports.
- ✓ **Mobile Analytics SDK Wrapper** – Created TypeScript-based reusable wrapper for Firebase Analytics and Mixpanel, enabling clean and reusable analytics tracking.
