

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 9+ years of experience designing, developing, and deploying scalable web applications across React, Node.js, NestJS, and Next.js, with strong expertise in cloud-native architectures on AWS and GCP. Adept at owning projects end-to-end, from gathering user feedback to delivering production-ready solutions with high reliability and empathetic user experiences. Skilled in building serverless applications, integrating payment systems, implementing video services, and optimizing both frontend and backend performance for mission-driven platforms. Experienced in remote-first, fast-paced environments, with a proven ability to ship impactful features while collaborating with cross-functional teams and end users.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, Angular, TypeScript, JavaScript (ES6+), Redux, HTML5, CSS3/SCSS, Tailwind
- **Backend:** Node.js, NestJS, Express.js, PHP, Java, Python, C# .NET, GraphQL, REST APIs
- **Cloud & DevOps:** AWS (Lambda, S3, RDS, API Gateway, CloudFormation), GCP (Cloud Run, Firestore, Pub/Sub), Azure, Docker, Kubernetes, Terraform, CI/CD (GitHub Actions, GitLab CI, Jenkins)
- **Databases:** SQL (PostgreSQL, MySQL, SQL Server), NoSQL (MongoDB, DynamoDB, Redis, Firebase)
- **AI & Integrations:** LLM APIs (OpenAI, Hugging Face), AI-powered search & recommendations, Payment systems (Stripe, PayPal), Video APIs (Mux, Twilio Video), E-commerce integrations (Shopify)
- **Other:** Microservices, Event-driven systems (Kafka, RabbitMQ), Unit & Integration Testing (Jest, Mocha, Cypress)

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Designed and delivered full-stack solutions using React, Node.js, and NestJS for SaaS platforms, improving product scalability and achieving 35% faster release cycles across distributed teams.
- Built AWS-based infrastructure with Lambda, S3, RDS, and API Gateway, optimizing serverless deployments and reducing operational costs by 25% compared to containerized alternatives.
- Implemented secure payment integrations with Stripe and PayPal, powering recurring billing, donations, and e-commerce features that supported thousands of concurrent global users.

- Developed video streaming and conferencing modules with Twilio Video and Mux APIs, enabling seamless in-platform communication and improving engagement metrics by 40%.
- Architected CI/CD pipelines with GitHub Actions and Terraform to automate deployments, increasing release reliability and reducing manual intervention by over 60%.
- Partnered directly with clients and end users to gather feedback, transforming needs into empathetic, production-ready features with a strong focus on accessibility and inclusivity.
- Led cross-functional collaboration between frontend, backend, and DevOps teams, ensuring alignment on microservice architecture and maintaining 99.99% system uptime.
- Mentored junior engineers through code reviews and knowledge-sharing sessions, elevating overall code quality while fostering a culture of continuous learning and growth.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed and maintained customer-facing applications using React, Next.js, and Node.js, delivering responsive and accessible UIs optimized for mobile-first digital campaigns.
- Implemented API-first architecture with Express.js and GraphQL, streamlining integrations with CRM and marketing platforms, reducing response latency by 30% across services.
- Designed and deployed cloud-native applications on AWS and GCP, leveraging Lambda and Firestore to handle event-driven workflows with auto-scaling capabilities.
- Built data pipelines integrating SQL and NoSQL systems, ensuring reliable synchronization across PostgreSQL, MongoDB, and Redis for analytics-driven marketing campaigns.
- Enhanced platform reliability by implementing unit, integration, and end-to-end testing suites using Jest and Cypress, leading to a 50% reduction in post-release defects.
- Collaborated closely with designers and non-technical stakeholders to implement user-centric features, emphasizing intuitive design and personalized customer experiences.
- Created e-commerce functionality including product catalog, payment gateways, and campaign landing pages, driving a 20% increase in conversion rates for clients.
- Advocated for Agile practices, participating in sprint planning, retrospectives, and demos to align technical delivery with evolving business goals.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Designed and developed scalable web applications using Angular, Node.js, and PHP, delivering complex enterprise systems within aggressive timelines.
- Built RESTful APIs and microservices that powered core functionality for CRM and ERP platforms, handling thousands of concurrent requests with optimized performance.
- Implemented data-driven features by integrating SQL Server and MySQL, improving reporting accuracy and supporting advanced analytics dashboards.
- Migrated legacy applications to cloud-native infrastructure on AWS, leveraging containerization with Docker and ECS to improve deployment speed and reduce downtime.
- Introduced automated deployment processes with Jenkins and GitLab CI/CD pipelines, minimizing manual interventions and cutting release cycles by 40%.
- Collaborated with clients to scope requirements and provide technical recommendations, translating business objectives into scalable solutions.
- Improved application security by implementing authentication, authorization, and encryption strategies across critical services, reducing vulnerabilities by 30%.
- Conducted peer code reviews and documentation to ensure maintainability and knowledge transfer within a distributed team.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Built front-end components with AngularJS and backend APIs with Node.js and PHP, delivering cross-functional e-commerce solutions for international clients.
- Integrated with third-party payment providers and shipping APIs, enabling smooth checkout experiences and automated logistics workflows.
- Deployed containerized applications on AWS EC2 and S3 for scalability and high availability, ensuring 24/7 uptime during high-traffic campaigns.
- Enhanced accessibility by implementing WCAG-compliant UIs, ensuring usability for diverse audiences in regulated markets.
- Designed product catalogs and content management features with optimized database queries, reducing page load times by 35%.
- Contributed to Agile sprint delivery with daily standups, sprint planning, and code reviews to maintain project velocity.
- Worked closely with UX teams to implement modern, responsive web designs with pixel-perfect accuracy.
- Provided production support and resolved incidents under tight deadlines, maintaining customer satisfaction and contractual SLAs.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Assisted in building full-stack applications with PHP, MySQL, and JavaScript, contributing to live production systems used by SMEs.
- Developed reporting and analytics modules that aggregated data from multiple SQL tables, enabling better decision-making for client businesses.
- Implemented user authentication and role-based authorization for internal systems, improving security posture.
- Supported integrations with external APIs for payments, SMS notifications, and logistics, extending platform capabilities for clients.
- Designed front-end interfaces with HTML, CSS, and jQuery to create user-friendly dashboards and forms.
- Collaborated with senior developers in debugging and resolving critical issues in production systems.
- Contributed to testing and QA processes, identifying bugs and documenting solutions to maintain software quality.
- Gained early exposure to Agile methodology, participating in team ceremonies and contributing to collaborative workflows.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
 - Google Cloud Professional Cloud Developer
 - Microsoft Azure Fundamentals
 - Node.js Application Developer (OpenJS Foundation)
-

PROJECTS

- **AI-Powered Chatbot** – Built a **Python and Node.js** chatbot integrated with **GPT-based LLM**, deployed on AWS Lambda, supporting customer interactions with real-time query handling.
- **Scalable SaaS Platform** – Architected a **multi-tenant SaaS platform** using **React, Node.js, PostgreSQL, and Kubernetes on GCP**, handling thousands of concurrent users securely.
- **Realtime Event Dashboard** – Delivered an **analytics dashboard with WebSocket communication, Redis caching, and Elasticsearch querying**, supporting high-volume financial transactions.
