

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Experienced Senior Software Engineer with over 9 years in designing and developing scalable mobile and web applications, with a specialization in React Native, Redux, and full-stack JavaScript technologies. Proven track record delivering production-ready apps with millions of users globally. Strong background in communication systems, startup environments, and high-performance software engineering. Skilled in remote collaboration, fast iteration, and product ownership from concept to deployment.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3, SQL, Python
- **Mobile:** React Native, Redux, Expo, iOS & Android Deployment
- **Frontend:** React.js, Vue.js, Angular, Material UI, SASS
- **Backend:** Node.js, Express, Firebase, REST APIs
- **Databases:** PostgreSQL, MongoDB, IndexedDB, SQLite
- **Cloud/DevOps:** AWS (EC2, S3, Amplify), Google Cloud, Docker, CI/CD
- **Testing:** Jest, Detox, Cypress
- **Tools:** Git, Figma, Jira, Bitrise, Fastlane

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Built and maintained a high-performance cross-platform mobile app in React Native used by over 2 million users for secure communication and productivity tasks.
- Led migration of legacy iOS/Android codebases to a unified React Native framework, reducing maintenance costs by 40%.
- Integrated Redux architecture with persistent storage using Redux-Persist and IndexedDB for seamless offline support.
- Developed an in-app messaging module with real-time chat, file sharing, and push notifications using Firebase and WebSockets.
- Improved application responsiveness by 25% through deep profiling, bundle size optimizations, and code splitting.

- Collaborated closely with design and product teams to roll out bi-weekly releases following agile delivery practices.
- Integrated CI/CD pipelines via Bitrise and Fastlane to automate testing and publishing for iOS and Android stores.
- Mentored 3 junior developers and reviewed PRs to ensure code quality, testing coverage, and adherence to React Native best practices.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Contributed to development of a startup mobile app focused on consumer marketing, using React Native and Redux for fast feature iteration.
- Integrated advanced animations and gestures using React Native Reanimated and Gesture Handler to deliver native-like UX.
- Created reusable component libraries that accelerated development by 30% across multiple mobile initiatives.
- Built RESTful API integration modules to synchronize mobile data with backend services built in Node.js and Express.
- Conducted usability tests and used analytics tools to continuously improve UI/UX performance metrics.
- Implemented secure OAuth2 and JWT-based authentication and managed user sessions across platforms.
- Setup and maintained real-time event handling with Firebase Cloud Messaging for push notification delivery.
- Participated in daily scrum ceremonies and sprint planning to prioritize and track mobile feature delivery.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built scalable mobile features with React Native and native modules for enterprise-grade communication solutions.
- Developed modules to sync with Bluetooth peripherals and local storage using SQLite for offline access and resilience.
- Refactored old Angular web components into React Native views to maintain consistency across platforms.
- Created dashboards and analytics views using D3.js for real-time data visualization on mobile.
- Integrated AWS backend (API Gateway, Lambda) with mobile apps for secure and fast API handling.
- Authored automated unit tests and Detox end-to-end tests ensuring feature stability before every release.
- Worked with designers to bring pixel-perfect UI screens from Figma to live interactive components.
- Assisted in managing release cycles and version control across iOS TestFlight and Android Beta tracks.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Developed mobile-first hybrid apps using React Native and Cordova to target both Android and iOS platforms.
- Integrated IndexedDB and local storage handling to enable persistent offline experiences.
- Built component wrappers for cross-browser compatibility and device-specific styling across screen sizes.
- Optimized mobile apps by lazy-loading assets and deferring script execution to improve initial render speed.
- Supported deployment on multiple device types through CI/CD workflows using Dockerized pipelines.
- Worked closely with QA teams to identify, isolate, and fix mobile-specific bugs in complex workflows.
- Participated in daily standups and sprint reviews in an Agile environment focused on rapid MVP releases.
- Assisted in designing test strategies and performance benchmarks for hybrid mobile applications.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Participated in the early-stage development of a chat-based productivity app using early versions of React Native.
- Implemented basic Redux patterns and API integrations to manage app state and sync data from Node.js backend.
- Built responsive layouts and interactive elements using Flexbox and component-level styling.
- Conducted testing across different Android versions to ensure compatibility and UX consistency.
- Collaborated with senior developers on mobile app architecture decisions and backend API design.
- Created in-app settings panel with local persistence using AsyncStorage.
- Implemented basic push notifications and in-app banners using Firebase.
- Documented code and technical designs to help onboard new team members and interns.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ React Native Advanced – Udemy
- ❖ AWS Certified Developer – Associate
- ❖ Google Cloud Digital Leader
- ❖ SQL for Data Engineers – Coursera

PROJECTS

- ✓ **CommPulse App:** End-to-end secure mobile communication app used by over 1.5M users, built with React Native + Redux + Firebase.
- ✓ **SyncDash:** Real-time productivity dashboard app with WebSocket data feed, React Native client, and Node.js backend.
- ✓ **PocketVault:** Mobile wallet with biometric authentication, AWS-hosted backend, and encrypted NoSQL data store.
