

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 9+ years of experience designing and developing **scalable, high-performance UI systems** for enterprise and AI-driven platforms. Specialized in **React.js, Next.js, and TypeScript**, with expertise in **building greenfield projects, integrating AI/ML outputs into user interfaces, and optimizing UI performance**. Adept at working in **full-stack environments** with Node.js and Express.js, following Agile practices, and delivering secure, maintainable, and intuitive user experiences.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Tailwind, Bootstrap, Material UI
- **Backend/Full-Stack:** Node.js, Express.js, REST APIs, GraphQL
- **UI/UX:** Component-based architecture, responsive design, accessibility, design systems, Figma collaboration
- **Testing:** Jest, Cypress, React Testing Library, Selenium
- **DevOps & CI/CD:** Git, GitHub Actions, Docker, Jenkins, GitLab CI
- **AI Integration:** UI for AI inference, dynamic model outputs, real-time visualization of ML predictions
- **Other:** Agile/Scrum, security best practices, performance tuning

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Designed and built frontend architecture using React and Next.js for AI-powered platforms, focusing on responsive design and high scalability.
- Integrated AI/ML inference results into dynamic UI components, ensuring seamless visualization of real-time predictions and outputs for end users.
- Collaborated with backend developers to connect Node.js/Express APIs with frontend, enabling efficient and secure data flows across services.
- Optimized rendering performance using React profiling, lazy loading, and code-splitting, reducing UI latency by 40% on large datasets.
- Applied CI/CD pipelines with GitHub Actions and Docker to automate frontend deployments, improving release speed and reliability.
- Wrote end-to-end and unit tests with Jest and Cypress, ensuring high test coverage and reducing post-release defects.

- Contributed to UX discussions, designing intuitive workflows for AI platform users while ensuring accessibility and responsive layouts.
- Mentored frontend developers on React best practices, state management, and performance optimization strategies.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Built React.js and TypeScript UIs for AI-driven analytics dashboards, integrating real-time insights and predictive models into user-friendly displays.
- Developed reusable UI components and design systems, standardizing frontend patterns across multiple projects and teams.
- Implemented secure authentication and authorization in the frontend using OAuth2 and JWT, aligning with enterprise compliance requirements.
- Optimized large-scale data visualization workflows by implementing virtualized lists and charting libraries, reducing render bottlenecks.
- Collaborated closely with designers using Figma to implement pixel-perfect UI and ensure consistent UX patterns.
- Automated testing using Cypress and Jest to validate AI feature integrations, ensuring accuracy of model outputs in UI.
- Integrated backend APIs (Node.js/Express) with frontend layers, ensuring smooth and efficient client-server communication.
- Participated in Agile sprints, working cross-functionally with AI engineers and product managers to deliver AI-integrated features.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Delivered full-stack features combining React frontends with PHP/Node.js backends, ensuring end-to-end delivery of customer platforms.
- Built complex UIs with HTML5, CSS3, JavaScript (ES6), and Bootstrap, delivering responsive and interactive experiences for enterprise clients.
- Applied React state management patterns (Redux, Context API) to handle dynamic data workflows in multi-page web apps.
- Contributed to frontend performance tuning, implementing caching, minification, and efficient rendering strategies.
- Designed modular UI architecture aligned with MVC and component-based development principles.
- Wrote documentation for UI modules, API usage, and frontend-backend integration patterns, improving onboarding efficiency.
- Supported deployment to AWS with Dockerized builds, contributing to full-stack delivery in cloud environments.
- Worked within Agile Scrum teams, participating in sprint planning, daily standups, and reviews to align UI delivery with business needs.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Developed web UIs using React and Angular, delivering responsive frontends for eCommerce and enterprise platforms.
- Integrated REST APIs with dynamic UI components, displaying real-time data and interactive dashboards.
- Applied performance optimization strategies including lazy loading and tree-shaking, improving frontend responsiveness.
- Implemented Bootstrap and Material UI components to accelerate design implementation while maintaining consistent UX.
- Collaborated with backend engineers to resolve API and data integration issues, ensuring smooth end-to-end delivery.
- Applied version control practices with Git, leading to efficient collaboration and conflict resolution across distributed teams.
- Participated in Agile sprints, contributing to UI story breakdowns and estimation for planning accuracy.
- Produced frontend design documentation to guide future feature enhancements and component reuse.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Assisted in building frontends with JavaScript, HTML5, and CSS3, focusing on responsive and user-friendly design.
- Contributed to early React.js adoption by implementing small dynamic components under guidance from senior engineers.
- Integrated APIs with frontend modules to display structured data, learning best practices for client-server communication.
- Applied Bootstrap for responsive layouts, ensuring usability across mobile and desktop devices.
- Wrote small test cases in Jest, learning TDD and CI/CD concepts applied in production environments.
- Collaborated with designers to implement layouts accurately, gaining exposure to UI/UX workflows.
- Documented frontend changes and assisted with knowledge transfer for ongoing projects.
- Delivered small independent UI features, building early experience with production codebases.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- React Developer Certification (Advanced)
- AWS Certified Developer – Associate

- Scrum Master Certified (SMC)
-

PROJECTS

- **AI Platform UI** – Built React/Next.js interface to display AI inference results, model status, and dynamic content visualization in real time.
- **Greenfield Data Workflow Dashboard** – Designed interactive dashboards handling high-volume streaming data with React and Node.js.
- **Next.js Enterprise Portal** – Delivered SSR and SSG features with optimized performance, SEO, and accessibility compliance.
- **Generative AI Explorer** – Created UI to interact with OpenAI/Hugging Face APIs, integrating text and image generation features.
