

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-866410383/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Frontend-focused Senior Software Engineer with 9+ years of experience designing, developing, and scaling responsive, high-performance web applications. Specialized in React, Next.js, TypeScript, Tailwind CSS, and modern frontend ecosystems, with a proven record of building engaging digital experiences for global clients. Skilled in e-commerce platforms, API integrations, and optimizing applications for speed, maintainability, and user engagement. Adept at collaborating with cross-functional teams to deliver robust solutions that combine technical precision with business goals.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Material UI
- **Backend/Full Stack:** Node.js, Express.js, .NET Core, PHP
- **Testing & CI/CD:** Jest, Cypress, React Testing Library, Git, GitHub Actions, Azure DevOps, GitLab CI/CD
- **APIs & Data:** REST APIs, GraphQL, WebSockets, JSON, XML, Google Tag Manager (GTM)
- **Cloud & Infrastructure:** AWS (Lambda, S3, DynamoDB), GCP, Azure, Docker, Kubernetes
- **Databases:** SQL (PostgreSQL, MySQL, SQL Server), NoSQL (MongoDB, Redis, DynamoDB)
- **Other Tools:** Figma, Jira, Trello, Agile/Scrum, Webpack, Babel

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Designed and developed advanced React and Next.js interfaces with TypeScript and Tailwind CSS, enhancing responsiveness and scalability of complex e-commerce and SaaS platforms.
- Implemented GraphQL and RESTful API integrations to power real-time dashboards and user experiences, improving cross-platform performance and data synchronization.
- Optimized page load performance by over 40% using code splitting, lazy loading, and image optimization, improving SEO rankings and user engagement metrics.
- Spearheaded adoption of Google Tag Manager (GTM) across multiple projects to track customer behavior, enabling data-driven marketing strategies and higher conversion rates.
- Built robust CI/CD pipelines with GitHub Actions and Docker containers, streamlining deployment processes and reducing release time by 30%.
- Conducted accessibility and cross-browser compliance testing, ensuring WCAG 2.1 standards and seamless UX across mobile, tablet, and desktop devices.

- Led code reviews, mentoring junior developers on React best practices, TypeScript type safety, and scalable component-driven architectures.
- Partnered with design teams using Figma and contributed to UX refinement, creating pixel-perfect, user-friendly interfaces tailored to business requirements.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Delivered interactive web applications using React, Redux, and TypeScript, improving user engagement and customer retention in high-traffic campaigns.
- Built reusable UI libraries aligned with brand guidelines, reducing new feature delivery timelines and establishing scalable component-driven architecture.
- Integrated RESTful APIs for real-time data synchronization across CRM platforms, enabling automation of marketing workflows and increasing efficiency by 25%.
- Conducted end-to-end testing with Jest and Cypress, ensuring high application reliability and reducing bug reports during production rollout.
- Developed custom dashboards with complex filtering, visualization, and analytics capabilities, empowering clients with actionable business insights.
- Enhanced SEO optimization and structured data for e-commerce pages, improving organic traffic by 35% through better visibility on Google Search.
- Actively contributed to Agile ceremonies, providing technical input for sprint planning and ensuring delivery aligned with product roadmaps.
- Collaborated with stakeholders to define frontend performance KPIs, consistently delivering against high availability and speed benchmarks.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Built feature-rich applications in React and Angular, with focus on modular UI components and maintainable architecture for scalable business platforms.
- Integrated multiple third-party APIs and payment gateways into client e-commerce solutions, ensuring secure and reliable checkout experiences.
- Implemented responsive, mobile-first layouts using HTML5, CSS3, and SASS, providing a seamless experience across devices and screen sizes.
- Enhanced site performance by refactoring legacy JavaScript into ES6+ standards, improving maintainability and boosting Lighthouse performance scores.
- Designed and optimized SQL/NoSQL database queries, ensuring seamless interaction between front-end applications and backend systems.
- Delivered project documentation and onboarding materials, reducing developer ramp-up time and improving knowledge-sharing within teams.
- Collaborated with QA teams to design automated testing suites, catching regressions early and improving deployment confidence.
- Contributed to DevOps initiatives with Docker-based deployments, enabling efficient staging environments for client demonstrations and testing.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Contributed to the development of high-traffic digital commerce applications, implementing React-based UI features and ensuring responsive design fidelity.
- Designed reusable and scalable CSS components aligned with enterprise design systems, enabling brand consistency across multiple web products.
- Integrated RESTful APIs to deliver personalized content and multi-language support, improving customer experience across global markets.
- Assisted in migrating legacy codebases into React and modern JavaScript frameworks, accelerating product development and maintainability.
- Supported GTM and analytics implementations for e-commerce campaigns, enabling detailed tracking and ROI measurement.
- Improved application loading speed by implementing image optimization and CDN delivery strategies for critical assets.
- Collaborated directly with backend developers to streamline integration workflows and ensure consistency of API contracts.
- Maintained detailed technical documentation for client projects, supporting seamless handoff and cross-team collaboration.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Developed small-scale web features using HTML, CSS, and JavaScript, contributing to early-stage startup product releases.
- Implemented unit testing practices and debugged frontend issues under supervision, gaining hands-on exposure to production environments.
- Collaborated with senior engineers to optimize website performance and implement responsive layouts across browsers and devices.
- Participated in Agile stand-ups and sprints, learning industry best practices for teamwork and software delivery.
- Assisted in integrating basic REST APIs, laying groundwork for improved client-server communication within projects.
- Produced internal tools to automate repetitive frontend testing tasks, improving overall QA efficiency.
- Documented development processes and provided tutorials to other interns, ensuring smoother knowledge transfer.
- Learned modern frontend patterns by shadowing experienced developers, applying React concepts to small production-ready components.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- **AWS Certified Developer – Associate**
 - **Google Cloud Professional Developer**
 - **Certified React Developer (Meta/React Nanodegree)**
 - **Blockchain Developer Certification (Consensys Academy)**
-

PROJECTS

- **DeFi Lending Dashboard (React, TypeScript, Wagmi, WalletConnect, GraphQL, AWS):** Built a production-ready DeFi dashboard with undercollateralized lending support and real-time blockchain data visualization.
- **Crypto Portfolio Manager (Next.js, TypeScript, Feature Slices Design, GCP, MongoDB):** Developed portfolio margining application with modular architecture and optimized data queries.
- **Web3 Wallet Integration Module (React, Wagmi, WalletConnect, Node.js, Redis):** Designed reusable wallet authentication and transaction signing components for multi-chain dApps.
