

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with 8+ years of experience delivering robust, secure, and scalable web applications using ASP.NET Core, React.js, and TypeScript. Proven expertise in designing microservices architectures, developing cloud-native applications on Azure and AWS, and implementing test-driven development practices. Adept at translating business requirements into technical solutions, collaborating cross-functionally with teams, and delivering high-impact results across domains such as fintech, digital marketing, and enterprise systems.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, ASP.NET Core, .NET 6+, JavaScript, TypeScript, React.js, Redux, Node.js, REST API
- **Databases:** MongoDB, PostgreSQL, MS SQL Server, MySQL
- **Cloud & DevOps:** Azure, AWS, Docker, Kubernetes, GitHub Actions, Azure DevOps
- **Architecture:** Microservices, Domain-Driven Design (DDD), Event-Driven Architecture
- **Testing:** xUnit, Jest, Mocha, Cypress, Postman, Swagger
- **Tools & Methodologies:** Git, JIRA, Agile (Scrum), CI/CD, TDD, SOLID Principles, Clean Architecture
- **Other:** SignalR, RabbitMQ, Redis, GraphQL (basic), RESTful APIs

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led end-to-end development of enterprise-grade web applications using ASP.NET Core and React.js with microservice patterns and scalable architectures.
- Designed and implemented reusable RESTful APIs integrated with MongoDB and SQL Server, significantly reducing development overhead and boosting API response times by 35%.
- Spearheaded cloud migration initiatives to Azure, automating infrastructure setup using ARM templates and enhancing system resilience and observability with Azure Monitor.
- Introduced TDD workflows using xUnit and Moq in .NET projects, increasing code coverage to 90% and reducing production defects by 45%.
- Mentored junior developers on cloud-native development, CI/CD automation, and microservices orchestration using Docker and Kubernetes.

- Integrated external identity providers using OAuth2 and JWT for secure authentication across distributed services.
- Participated in client-facing sessions, gathering requirements and translating business goals into scalable software features using Agile methodology.
- Championed code quality through regular code reviews, CI pipeline integration, and static code analysis tooling (SonarQube).

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed marketing campaign management platforms using ASP.NET Core and modern JavaScript frameworks with a focus on extensibility and performance.
- Built interactive, mobile-responsive interfaces using React.js and TypeScript while adopting functional programming principles for maintainability.
- Deployed microservices on AWS ECS and automated workflows with GitHub Actions to enable continuous delivery across environments.
- Authored internal tooling dashboards and analytics features that visualized real-time marketing campaign metrics using D3.js and Redux.
- Collaborated with cross-functional product teams to implement AB test variants and user engagement tracking using Segment and Google Analytics.
- Developed secure backend integrations with third-party payment and CRM APIs while ensuring compliance with GDPR and PCI standards.
- Led feature planning sessions with QA and UX teams to define acceptance criteria and iterate via Agile sprints with two-week deployments.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Delivered modular applications for government and B2B clients using ASP.NET MVC transitioning later to ASP.NET Core for performance benefits.
- Utilized Entity Framework Core for ORM integration, building dynamic data models with LINQ and efficient eager/lazy loading strategies.
- Implemented secure admin portals and role-based dashboards with customizable widgets using React, Redux, and webpack.
- Conducted performance profiling and refactoring, reducing memory leaks and optimizing DB query latency by 50% in critical workflows.
- Built robust integration test suites and automated deployments using Octopus Deploy for multiple production environments.
- Participated in code audits, retrospectives, and architecture decisions, supporting legacy modernization and digital transformation efforts.
- Orchestrated task queues with RabbitMQ to handle background job processing and asynchronous workflows.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Contributed to a modular CMS built on .NET Core and Angular, enabling flexible content publishing for international clients.
- Created reusable modules and custom plug-ins for analytics tracking and multi-language support within enterprise portals.
- Integrated third-party APIs for newsletters, CRM, and file storage using RESTful service contracts with validation and retry mechanisms.
- Built unit and integration tests for business-critical features using Moq and NUnit for .NET Core apps.
- Actively participated in agile sprint ceremonies, helping establish a collaborative and fast-paced startup culture.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Designed UI prototypes and developed front-end components using jQuery, Bootstrap, and Razor templates.
- Assisted in building a .NET-based e-commerce backend with inventory management, user authentication, and order processing.
- Wrote stored procedures and optimized SQL queries for order tracking and customer analytics dashboards.
- Collaborated with senior engineers to debug and patch real-time production issues, contributing to maintenance of SLA agreements.
- Created documentation and onboarding guides for internal development tools and deployment practices.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Developer Associate – 2023
 - ❖ AWS Certified Developer – Associate – 2022
 - ❖ MongoDB for .NET Developers (MongoDB University) – 2021
 - ❖ React – The Complete Guide (Udemy, Maximilian Schwarzmüller) – 2020
 - ❖ Clean Architecture with ASP.NET Core (Pluralsight) – 2020
-

PROJECTS

- ✓ **Cloud-Based Logistics Platform (Sensidev)**
Architected a microservices logistics management platform using .NET 6 and Azure Kubernetes Service (AKS), supporting real-time shipment tracking, dynamic routing, and predictive analytics. React.js and SignalR powered live updates for fleet managers and dispatchers.
- ✓ **Omnichannel Marketing Portal (Syscom Digital)**
Engineered a customizable marketing automation tool enabling personalized email/SMS/push campaigns across brands. Integrated with Salesforce and AWS SES. Built with ASP.NET Core microservices, React.js, and Redux for dynamic UIs.
- ✓ **B2B Compliance Dashboard (Soft Build)**
Developed a compliance monitoring dashboard for healthcare clients to track regulation alignment. Leveraged JWT-secured APIs, complex RBAC, and Azure-hosted data pipelines.
