

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Creative and performance-driven Front-End Developer with 8+ years of experience building interactive, user-centric web applications. Specializing in React.js, Next.js, and modern JavaScript frameworks to deliver pixel-perfect, scalable interfaces. Adept at translating complex UI/UX designs into clean and maintainable code, collaborating in agile teams, and optimizing for speed and responsiveness across devices. Strong background in state management, RESTful APIs, SSR/SSG techniques, and front-end testing.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3, TypeScript
- **Frameworks/Libraries:** React.js, Next.js, Redux, Context API, Tailwind CSS
- **Tools:** Git, GitHub, GitLab, Bitbucket, Figma, Postman
- **Testing:** Jest, React Testing Library, Cypress
- **Techniques:** SSR, SSG, SEO Optimization, A/B Testing, TDD
- **Others:** RESTful APIs, Webpack, Vite, ESLint, Responsive Design, CI/CD

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Developed multiple production-grade web applications using Next.js and React.js, implementing SSR and SSG features to enhance SEO and initial page load times.
- Led front-end architecture for scalable projects, introducing component-based design systems to ensure maintainability and rapid feature development cycles.
- Integrated RESTful APIs and handled complex state management using Redux Toolkit and Context API to manage global application state securely and efficiently.
- Translated Figma UI/UX designs into pixel-perfect components, adhering to responsive design standards for cross-browser/device compatibility.
- Implemented performance optimization techniques such as lazy loading, code splitting, and caching strategies to reduce page load by over 40%.
- Collaborated with back-end teams to define API contracts and implemented mocking strategies for isolated front-end development and testing.

- Wrote unit and integration tests using Jest and Cypress to ensure front-end quality and reliability during agile sprint releases.
- Conducted regular code reviews and mentored junior developers, fostering a culture of clean code and continuous learning within the team.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Designed and maintained high-traffic client dashboards and marketing platforms using React.js, ensuring real-time updates and smooth user interactions.
- Built responsive UIs with HTML5 and CSS3, implementing reusable component patterns and atomic design principles to streamline development workflow.
- Enhanced user experience by integrating smooth animations and interactions using React Spring and Framer Motion.
- Migrated legacy jQuery applications to modern React-based SPAs, reducing technical debt and increasing development efficiency.
- Worked closely with the design team to fine-tune UI components for branding consistency and usability across marketing campaigns.
- Integrated multiple third-party libraries and analytics tools for tracking user behavior, improving customer retention by 15%.
- Used Git version control for collaborative development, branching workflows, and conflict resolution in a CI/CD pipeline.
- Applied accessibility standards (WCAG) to ensure all UIs were inclusive and met compliance requirements.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built dynamic client portals and e-commerce front-ends using React and Redux, achieving faster rendering and reduced bounce rates.
- Collaborated on the integration of RESTful services with robust error handling and loading states for a seamless user experience.
- Designed UI components optimized for mobile-first responsiveness and touch interactions across diverse devices.
- Led the refactoring of monolithic codebases into modular React components, improving development scalability and testing.
- Optimized front-end build pipeline with Webpack and Babel, reducing initial bundle size and enhancing performance.
- Managed feature toggles and A/B testing setups for iterative deployment and performance tracking of new features.
- Collaborated with QA engineers to define UI test plans and automation scripts using Selenium and Cypress.
- Maintained comprehensive documentation for reusable components and developer onboarding.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Implemented customer-facing React modules and interfaces for a media management platform, focusing on usability and performance.
- Contributed to front-end roadmap planning and sprint delivery, working in a fast-paced agile environment with international clients.
- Developed accessibility-friendly interfaces using ARIA attributes and semantic HTML to meet EU compliance.
- Debugged complex browser issues and implemented fallbacks for edge cases across Internet Explorer and Safari versions.
- Created documentation and tutorials for internal tooling adoption among non-technical team members.
- Participated in peer code reviews and pair programming to maintain high code quality and share best practices.
- Integrated localization frameworks to support multilingual UI capabilities across European markets.
- Assisted DevOps team in refining deployment pipelines and automating front-end builds with Jenkins.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Supported development of internal admin tools using React.js and early Next.js implementations for performance testing.
- Learned and applied front-end best practices including modular architecture, reusable hooks, and design tokens.
- Assisted senior developers with debugging and fixing UI bugs across multiple staging environments.
- Created documentation and style guides to support consistent development practices within the team.
- Helped with UI testing and bug reporting, contributing to significant QA throughput.
- Built HTML/CSS prototypes for upcoming product features for stakeholder review.
- Participated in team scrums and sprint planning as part of professional training.
- Provided research support for evaluating front-end tooling trends and presenting findings to engineering leads.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ **React – The Complete Guide (incl Hooks, React Router, Redux)** – Udemy, 2023
- ❖ **Modern JavaScript From The Beginning** – Udemy, 2022
- ❖ **Frontend Masters – Advanced CSS & Sass** – 2022

PROJECTS

- ✓ **Hosting Platform Front-End Clone:** Recreated the user dashboard and landing pages of a leading web hosting provider using Next.js with SSR and Tailwind CSS to match exact SEO and performance metrics.
- ✓ **Multi-language Blog Engine:** Built a statically generated multilingual blog using Next.js SSG features with integrated MDX, achieving sub-second page load and excellent Core Web Vitals scores.
- ✓ **E-Commerce Dashboard:** Developed an admin panel with analytics, inventory tracking, and user role access using React, Redux, and Chart.js, deployed on Vercel with CI.
- ✓ **Portfolio SSR Site:** Personal portfolio built with Next.js and Framer Motion, optimized for SEO, deployed with Vercel, and Lighthouse scores above 95.
