

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Versatile fullstack engineer with over 9 years of hands-on experience in architecting and developing scalable, performant applications. Skilled in TypeScript, React, and Python, with deep exposure to AI-powered solutions and startup product cycles. Proven ability to deliver AI-enhanced interfaces, REST APIs, and cloud-native apps using modern DevOps practices. Adept at bridging frontend UX with backend intelligence in fast-paced environments.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3, SCSS
- **Frameworks & Libraries:** React, Next.js, Redux, Node.js, Express, Flask, FastAPI, LangChain
- **AI & Data:** OpenAI API, HuggingFace Transformers, LangChain, Pydantic, NumPy, Pandas
- **Tools:** Git, Webpack, Docker, Kubernetes, REST, GraphQL, Postman, Playwright
- **Databases:** PostgreSQL, MongoDB, Firebase, MySQL
- **Cloud & DevOps:** AWS (S3, EC2), Azure Pipelines, Vercel, GitHub Actions, Firebase
- **Practices:** Test-Driven Development (TDD), A/B Testing, Agile/Scrum, CI/CD
- **Other:** SharePoint, OAuth2, JWT, VSCode, JIRA, Confluence

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led fullstack architecture and development for SaaS platforms integrating OpenAI-based assistants, enhancing user workflows through context-aware NLP components and dynamic prompt engineering.
- Designed and deployed React-based dashboards tightly integrated with LangChain-powered backend pipelines to provide real-time data analytics and AI-driven insights to business users.
- Developed intelligent document analysis workflows using Python (FastAPI + Pydantic) that extracted and summarized unstructured data for legal, HR, and medical clients.
- Architected and built end-to-end testing systems using Playwright and GitHub Actions, resulting in a 40% reduction in production bugs in mission-critical features.
- Refactored legacy components to modern Next.js and React 18 with server-side rendering, drastically improving Time-To-Interactive scores in Lighthouse audits.
- Created unified authentication layers with JWT and OAuth2 across frontend and backend services, ensuring seamless user experience and enterprise-grade security.

- Integrated Firebase for real-time data syncing and notifications, leveraging Firestore and Firebase Auth for user engagement and activity tracking modules.
- Spearheaded adoption of Agile planning tools and led sprint ceremonies, improving team delivery velocity by 25% over three quarters.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed cross-platform AI-enhanced marketing dashboards using React and Node.js, helping clients measure ad engagement and conversion metrics across multiple channels.
- Integrated ML-based segmentation APIs in campaign management platforms, empowering marketing teams to target user personas based on behavioral clustering.
- Maintained and scaled REST APIs for content delivery systems, handling over 1M requests/day using Express and MongoDB on Dockerized AWS EC2 clusters.
- Applied advanced A/B testing methodology and TDD principles using Mocha and Chai, ensuring every feature launch was backed by statistical validation.
- Migrated legacy jQuery interfaces to React with Redux Toolkit, improving maintainability and performance while reducing client-side bundle sizes.
- Developed internal tooling with TypeScript to automate marketing asset uploads to SharePoint and sync data across platforms, saving 20+ engineer hours monthly.
- Implemented server-side rate limiting and API key protection strategies to defend against abuse, preserving SLAs and reducing infrastructure load.
- Collaborated with UI/UX designers to produce pixel-perfect, accessible components following WCAG 2.1 standards.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Designed and implemented client portals in React and Python Flask for logistics and e-commerce businesses, delivering modular components with real-time state updates via websockets.
- Developed internal AI document classifier using scikit-learn and Python scripting to route incoming PDF contracts to appropriate departments.
- Worked with RESTful APIs to integrate shipment tracking and payment systems with MySQL and Firebase backends.
- Used Docker and Docker Compose to streamline local development and deployment across microservices architecture.
- Built reusable React UI component library based on internal design system, reducing development time for new features by 35%.
- Developed automated invoicing tools using Python, interfaced with Google Sheets API and Mailgun for reporting and email delivery.
- Implemented OAuth-based authentication and permissions middleware, improving security compliance for client applications.
- Participated in biweekly code reviews and architecture discussions to improve application scalability and maintainability.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Contributed to multilingual React and Redux-based CMS for eCommerce websites; improved SEO compliance by implementing SSR and dynamic sitemap generation.
- Built dynamic, content-driven layouts using JSON schema definitions parsed via React renderers.
- Integrated OpenAI GPT-2 APIs to generate product descriptions automatically based on minimal user input, improving catalog publishing workflows.
- Delivered clean UI using SCSS modules and implemented responsive design across tablet and mobile breakpoints.
- Performed end-to-end testing using Cypress and implemented unit coverage with Jest.
- Designed and normalized relational schemas for PostgreSQL with Sequelize ORM in Node backend.
- Set up CI/CD pipeline with GitLab CI to automate builds and environment-specific deployments.
- Debugged cross-browser compatibility issues in legacy widgets and refactored them using standardized design tokens.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Assisted in developing internal dashboards using vanilla JavaScript and Bootstrap for network management teams.
- Implemented basic user authentication and routing using Node.js and Express for internal admin panels.
- Integrated third-party APIs for geolocation and IP tracking in monitoring tools.
- Worked on small-scale Python scripts to clean CSV data and generate automated Excel reports.
- Participated in QA cycles and contributed to JIRA issue triage and testing documentation.
- Refined legacy HTML/CSS templates to align with new brand style guides and responsive behavior.
- Learned Git workflows through daily check-ins and collaborative code sharing.
- Attended company workshops and internal hackathons focused on innovation with AI and automation.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ DeepLearning.AI: Prompt Engineering for Developers (OpenAI + LangChain)
- ❖ IBM AI Engineering Professional Certificate (Coursera)
- ❖ JavaScript Algorithms and Data Structures – freeCodeCamp
- ❖ React with TypeScript – Udemy
- ❖ Docker for Developers – Pluralsight
- ❖ OpenAI API Quickstart – OpenAI Developer Portal

PROJECTS

- ✓ **AI Portfolio Builder (2024)**

React + LangChain + OpenAI + Firebase

Developed an AI-driven platform to generate personalized developer portfolios using LLMs and fine-tuned prompts; integrated Firestore for real-time document updates.

- ✓ **SmartDocs Summarizer (2023)**

Python + FastAPI + HuggingFace

Built an internal tool to extract and summarize PDF reports and Word docs using Transformer models; reduced manual review time by over 60% for HR and legal teams.

- ✓ **Realtime AI Chatbot (2023)**

Next.js + OpenAI API + WebSockets

Implemented a fullstack GPT-powered chatbot for live Q&A embedded into support dashboards; added contextual memory and custom instructions.
