

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Full Stack Engineer with 8+ years of experience delivering robust, scalable, and high-performing web applications in Agile environments. Proficient in React, Ruby on Rails, PostgreSQL, and distributed system architecture. Proven success in mentoring engineers, leading full-cycle feature development, and collaborating cross-functionally with data science, QA, and DevOps teams. Committed to continuous learning, inclusive teamwork, and building impactful software products.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Ruby, HTML5, CSS3, SQL, Python
- **Frontend:** React, Redux, Next.js, Vue.js, Material-UI, Tailwind CSS, Webpack
- **Backend:** Ruby on Rails, Node.js, Express.js, RESTful APIs, Microservices
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Tools:** Git, Docker, Webpack, Jenkins, Jira, GitHub, GitLab CI/CD
- **Testing:** Jest, Mocha, Cypress, RSpec, Capybara
- **Others:** Agile/Scrum, Linux, Unix Shell, Figma, OAuth, JWT

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Developed scalable React-based frontends with advanced state management using Redux and Context API to support high-traffic enterprise platforms and micro-frontends.
- Engineered and deployed secure backend services in Ruby on Rails for customer-facing APIs with high reliability and low latency.
- Implemented and maintained PostgreSQL database schemas, optimizing queries and indexes to reduce latency by 30%.
- Mentored 4 junior developers, providing pair programming, code review sessions, and design guidance on architectural decisions.
- Worked closely with Product and Design teams to translate Figma prototypes into functional and accessible user interfaces.
- Wrote comprehensive unit and end-to-end tests using Jest, Cypress, and RSpec to increase test coverage to 95% across projects.
- Participated in architecture discussions to migrate from monolithic to microservices and containerized critical services with Docker.

- Led bi-weekly internal meetups focused on design patterns, performance tuning, and secure development practices.

Syscom Digital **Software Engineer**

October 2019 – August 2021

Bucharest, Romania

- Built full-stack web applications using React for frontend interfaces and Ruby on Rails for backend APIs with robust session handling and access control.
- Created modular components and UI libraries to enhance reusability and maintainability across multiple marketing platforms.
- Managed PostgreSQL schema migrations and database performance audits for analytics-heavy platforms.
- Collaborated with QA and DevOps to define deployment strategies using GitHub Actions and Docker for test automation pipelines.
- Enhanced legacy systems by replacing jQuery-based UIs with modern React and Redux-based architecture.
- Integrated third-party analytics and CRM tools into backend services for real-time campaign data processing.
- Designed and consumed RESTful APIs to enable seamless cross-platform data synchronization.
- Reviewed peer code, advocated for best practices, and contributed to internal documentation and onboarding resources.

Soft Build **Software Developer**

June 2016 – July 2019

Timișoara, Romania

- Designed and built client dashboards using Vue.js and Bootstrap, delivering responsive interfaces tailored for B2B platforms.
- Developed REST APIs in Node.js and Ruby on Rails to power dashboards, customer billing, and support modules.
- Implemented complex forms and dynamic validation logic using custom hooks and reusable components.
- Managed integrations with payment gateways and external CRM services for business process automation.
- Refactored monolithic services into decoupled modules for maintainability and scalability in distributed systems.
- Collaborated in Agile sprints with cross-functional teams, prioritizing code quality and feature delivery velocity.
- Conducted performance audits using Chrome DevTools and Lighthouse, achieving a 40% improvement in load time.
- Maintained CI/CD pipelines and monitored deployment health through automated test suites and monitoring dashboards.

Decima Digital **Software Developer**

November 2015 – April 2016

Tallinn, Estonia

- Assisted in backend development of eCommerce solutions using Ruby on Rails and integrated PostgreSQL for product data management.

- Worked with frontend developers to translate design mockups into pixel-perfect web pages using HTML5, CSS3, and vanilla JS.
- Implemented unit and functional tests with RSpec and Capybara to maintain quality during frequent updates.
- Configured Linux-based development environments and collaborated via Git and GitLab merge requests.
- Helped refactor parts of the order management system for higher stability and modularity.
- Created API documentation and developer wikis to support internal team use and third-party integrations.
- Supported deployment on staging and production servers while troubleshooting live environment issues.
- Participated in code reviews and sprint planning to align implementation with business requirements.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Developed internal tools for data migration and reporting using Ruby scripts and shell automation.
 - Collaborated with senior developers to build proof-of-concept features using AngularJS and REST APIs.
 - Supported QA testing cycles by identifying edge cases and documenting reproducible bugs.
 - Created SQL scripts for batch processing and updating of product records.
 - Gained hands-on experience in Agile development methodologies including sprint demos and retrospectives.
 - Maintained local development environment and resolved dependency issues across Linux servers.
 - Conducted performance testing for key modules, identifying memory leaks and IO bottlenecks.
 - Documented development practices and intern contributions in internal Confluence space.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Full-Stack Web Development Specialization
 - ❖ Ruby on Rails Engineering – The Odin Project
 - ❖ Advanced React and Redux – Udemy
 - ❖ SQL for Data Science – University of California, Davis
-

PROJECTS

- ✓ **Campaign Personalization Engine** – Developed a micro-frontend React app integrating OAuth-authenticated flows for marketing teams, with a Rails backend managing campaign lifecycles and analytics.

- ✓ **Internal Component Library** – Built a React-based design system with Storybook, supporting accessibility and dark mode.
- ✓ **Multi-tenant SaaS Admin Portal** – Full-stack implementation of user management, subscription billing, and feature toggling using Rails, PostgreSQL, and React.
- ✓ **Form Automation Wizard** – Created a form builder tool integrated with third-party APIs, leveraging React, Redux Toolkit, and asynchronous Rails jobs.
