

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Results-driven Senior Software Developer with 9+ years of experience specializing in front-end development with React and React Native. Proven expertise in designing intuitive, performance-optimized, and scalable mobile-first applications for startups and high-growth businesses. Deep understanding of front-end architecture, UI/UX, and cross-platform development using modern technologies including JavaScript, GraphQL, TypeScript, and REST APIs. Strong track record of working remotely with distributed teams, delivering high-quality solutions that align with business goals and user needs.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3, SASS, GraphQL, REST
- **Frameworks & Libraries:** React, React Native, Redux, Next.js, Styled Components, Tailwind CSS
- **Tools:** Git, Jira, Bitbucket, Confluence, Webpack, ESLint, Prettier
- **Testing:** Jest, React Testing Library, Detox, Cypress
- **CI/CD & DevOps:** GitHub Actions, Azure DevOps, Firebase, Fastlane
- **Design & Collaboration:** Figma, Zeplin, Adobe XD, Trello, Slack
- **Others:** PWA, Responsive Design, Accessibility (WCAG), Code Review, Agile/Scrum

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Developed and maintained cross-platform mobile apps using React Native, integrating native modules for iOS and Android to enhance performance and user experience.
- Led the front-end architecture for a materials logistics platform, focusing on optimizing component structure, lazy loading, and modular design patterns to boost efficiency.
- Collaborated with UI/UX teams using Figma to translate complex design specs into responsive and accessible React interfaces.
- Implemented GraphQL APIs for dynamic data retrieval, reducing network payload and improving frontend responsiveness by 40%.
- Introduced end-to-end testing with Detox and integrated CI pipelines via GitHub Actions to automate testing and deployment workflows.
- Conducted detailed code reviews and mentored junior developers on React/React Native best practices and scalable code patterns.

- Worked closely with product teams to deliver rapid iterations in an agile startup environment, meeting strict release timelines.
- Championed performance audits and accessibility compliance (WCAG 2.1), significantly improving usability across mobile platforms.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Designed and implemented multiple consumer-facing mobile applications using React Native with Redux, enabling real-time data interaction with RESTful APIs.
- Built scalable reusable component libraries to standardize design across multiple products, accelerating development and reducing technical debt.
- Integrated third-party SDKs such as Firebase, push notifications, and analytics tools to enhance engagement and gather actionable metrics.
- Played a key role in architecting offline-first capabilities using local storage and caching mechanisms to support field agents in low-connectivity areas.
- Participated in all sprint planning, grooming, and retrospective sessions, contributing to process optimization and team velocity improvements.
- Partnered with QA teams to develop robust unit and integration tests using Jest and React Testing Library, maintaining high code coverage.
- Delivered several production features using GraphQL to enhance performance and align with evolving backend architecture.
- Promoted knowledge sharing by hosting technical brown-bag sessions on React Native architecture and performance optimization.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built and maintained client-side features for web and mobile platforms using React and React Native with a focus on real-time updates and animations.
- Engineered state management logic using Redux and React Context API, enabling scalable data flow in applications with complex user interactions.
- Developed custom animations and gesture-based components using Reanimated and Gesture Handler to deliver premium mobile experiences.
- Managed continuous integration pipelines with Fastlane for Android/iOS builds and beta distribution via TestFlight and Google Play Console.
- Refactored legacy JavaScript codebases into modern ES6+ React code, significantly improving maintainability and performance.
- Worked closely with backend developers to define API contracts, ensuring seamless integration and versioning of REST and GraphQL endpoints.
- Enhanced app security by implementing biometric authentication, secure storage, and encrypted API communication.
- Maintained documentation and onboarding guides to streamline team expansion and improve developer experience.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Developed modular front-end components in React for enterprise web applications, focusing on maintainable and reusable code.
- Applied responsive design principles and CSS methodologies such as BEM to deliver clean, scalable UI layouts across breakpoints.
- Implemented performance optimizations including lazy loading, image compression, and memoization, achieving 25% improvement in page load times.
- Participated in daily standups and retrospectives within an agile team, supporting rapid delivery cycles and continuous improvement.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Assisted in developing hybrid mobile applications using Ionic and early-stage React Native, gaining hands-on experience in cross-platform development.
- Contributed to developing a procurement management system prototype for a local logistics client, collaborating with both frontend and backend teams.
- Learned and applied Git version control and agile workflow practices while participating in code reviews and sprint ceremonies.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Meta: Advanced React Native
- ❖ Microsoft: Front-End Web Development with React (edX)
- ❖ Udemy: The Complete React Native + Hooks Course
- ❖ Coursera: Full-Stack Web Development with React Specialization

PROJECTS

SmartProcure Mobile App

- Built an end-to-end React Native app for procurement tracking and vendor communication in the construction domain.
- Integrated with GraphQL API for live updates, notifications, and dynamic filtering, achieving real-time supplier insights and inventory tracking.

FieldForce Offline App

- Designed an offline-capable mobile app for field technicians with React Native and Redux Persist, enabling seamless sync when reconnecting to the network.

UX Component Library

- Developed a reusable UI library with custom-styled components using Styled Components and Tailwind CSS to ensure design consistency across multiple projects.
