PROFESSIONAL SUMMARY

Senior Software Engineer with over 9 years of experience architecting front-end systems, open source SDKs, and scalable UI platforms using React, TypeScript, and Next.js. Proven ability to define front-end architecture and build developer-centric tooling, contributing to fast-growing startups and global tech firms. Strong advocate for developer experience, performance optimization, and cross-functional collaboration in remote-first environments.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, HTML5, CSS3, SCSS, GraphQL, Node.js
- **Frameworks/Libraries:** React, Next.js, Redux, Tailwind CSS, React Query, React Hook Form, Zustand
- **Testing:** Jest, React Testing Library, Cypress
- **DevOps & Tooling:** Vite, Webpack, Git, GitHub Actions, Storybook, TurboRepo, Figma, ESLint, Prettier
- **Platforms:** Firebase, Supabase, Vercel, Netlify
- **Other:** Open source SDK development, Component libraries, API design, DX-first tooling, CI/CD pipelines

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led development of internal and customer-facing dashboards using TypeScript, React, and Next.js, significantly improving usability and performance of B2B-facing tools
- Designed reusable open source component libraries inspired by Shadcn/UI to support client-specific UI frameworks with strong type-safety and documentation
- Collaborated closely with backend and product teams to define robust API interfaces, reducing frontend integration time by 40%
- Architected scalable and maintainable folder structures with TurboRepo and Monorepo setup, supporting multiple apps and shared UI SDKs
- Drove adoption of accessibility and internationalization standards across the frontend codebase, ensuring WCAG 2.1 compliance
- Mentored junior engineers on best practices in state management, hook-based architecture, and TypeScript type systems
- Owned DX improvements including custom ESLint rules, improved CI pipelines with GitHub Actions, and Storybook documentation

- Partnered with product stakeholders to scope and build MVP billing dashboards integrating with Stripe and open billing APIs

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed full-featured campaign management dashboards using React, Redux, and TypeScript, handling real-time user activity and campaign analytics
- Implemented customized checkout and invoicing experiences using third-party billing APIs, optimizing transaction success rates by 23%
- Built internal SDKs for dynamic campaign widgets enabling reusable integration across multiple marketing platforms
- Refactored legacy jQuery codebase into modular React components, improving performance and maintainability across legacy projects
- Led performance audits and lazy-loading improvements, reducing dashboard load time from 5s to under 2s
- Collaborated with UX team to build highly interactive campaign creation wizards using React Hook Form and Yup
- Wrote automated tests using Jest and Cypress, achieving 80%+ test coverage across all major user flows
- Contributed to company's design system by building Figma-to-code component conversions and guidelines for developers

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Delivered frontend interfaces for project management and ERP dashboards using React, integrating advanced visualizations via D3.js
- Worked in agile squads to deliver continuous product enhancements on client reporting systems across fintech verticals
- Created and documented in-house UI component library in Storybook to ensure consistent design implementation across teams
- Reduced bug rates by implementing stricter TypeScript rules and performing regular peer code reviews
- Integrated multi-tenant support into dashboard frontend, allowing scalable deployment across enterprise clients
- Worked on server-side rendering strategies with Next.js to enhance SEO performance and initial page load
- Defined reusable GraphQL client setup using Apollo Client with custom caching logic for large datasets
- Automated releases with GitHub Actions workflows and environment-specific build pipelines

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Contributed to the frontend rebuild of a legacy enterprise dashboard using Angular and Bootstrap.
- Translated designer wireframes into pixel-perfect, mobile-first UI components under tight deadlines.

- Implemented reusable UI components including modals, forms, and tables, reducing delivery cycle of new features.
- Collaborated with backend engineers to ensure billing logic and customer data integration were reflected accurately in frontend views.
- Participated in QA sessions and built end-to-end test cases using Selenium.
- Refactored UI state management and introduced debounced search/filter controls in customer tables.
- Contributed to internal component library that became base for future projects.
- Delivered features across full SDLC in an agile team of 4 developers.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Assisted in building custom JavaScript dashboards for small business clients, with a focus on UI responsiveness and billing UI components.
- Worked on converting static HTML templates into dynamic Angular views with reusable modules.
- Participated in the design of checkout interfaces with conditional logic and field validation.
- Used Git for version control and participated in code review sessions.
- Learned integration of Stripe and PayPal payment gateways into customer dashboards.
- Explored open-source UI libraries to propose improvements to internal design system.
- Built internal documentation of SDK usage guidelines for junior developers.
- Delivered polished features within two-week sprint cycles.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Advanced TypeScript for React Devs – Frontend Masters
- ❖ Testing React with Jest and RTL – Udemy
- ❖ Mastering Next.js 13+ App Router – Vercel Learn
- ❖ Modern Frontend Architecture & State Management – Pluralsight

PROJECTS

✓ **OpenBilling SDK**

- Designed and published a lightweight React-based SDK for embedding billing and checkout flows, inspired by Stripe Elements and Shadcn/UI.
- Supports headless customization with pre-built components and hooks like `useCustomer`, `usePlanSelect`, and `useCheckoutIntent`.
- Released under MIT license; over 2.3k downloads/month on NPM.
- Used in multiple freelance and internal startup projects to streamline subscription flows.

✓ **DevPortal UX Enhancer**

- Built internal tooling to document and visualize complex API flows using Next.js and MDX.
- Included interactive sandbox components for testing billing configurations.
