

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative Senior Software Engineer with 9+ years of experience delivering high-performance frontend solutions using **React, TypeScript, and modern architecture patterns**. Strong expertise in **crypto, blockchain, and Web3 ecosystems**, including WalletConnect, Wagmi, and smart contract integrations. Adept at **scalable UI design, Feature Slices Design, and performance optimization** with Webpack. Proven success leading cross-functional teams in building modular, production-ready applications for global users. Skilled in **cloud platforms (AWS, GCP, Azure), SQL & NoSQL databases, and DevOps practices**. Passionate about driving **cutting-edge digital asset products** with a focus on performance, security, and seamless user experience.

TECHNICAL SKILLS

- **Frontend:** React, TypeScript, JavaScript (ES6+), Redux, Next.js, Tailwind, CSS/SCSS, Webpack, Feature Slices Design
- **Web3 & Blockchain:** Wagmi, WalletConnect, Ethers.js, Web3.js, Smart Contract Integration, dApp Development
- **Backend & APIs:** Node.js, GraphQL, REST, Express.js, PHP, Laravel
- **Databases:** SQL (PostgreSQL, MySQL, MariaDB), NoSQL (MongoDB, Redis, Firestore)
- **Cloud & DevOps:** AWS, GCP, Azure, Docker, Kubernetes, CI/CD (GitHub Actions, GitLab, Jenkins)
- **Tools & Practices:** Agile, TDD/BDD, Git, Jira, Microservices, Monorepos, Clean Architecture

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Spearheaded development of **React + TypeScript crypto dashboards** with wallet integrations (WalletConnect, Wagmi) supporting 50k+ daily active users.
- Architected **scalable modular applications using Feature Slices Design**, ensuring long-term maintainability and rapid feature deployment.
- Optimized **Webpack build pipelines** with environment-specific configs, reducing bundle size by 35% and improving load speed across devices.
- Integrated **real-time blockchain data streams** into responsive UIs, enabling traders to monitor undercollateralized lending positions securely.
- Collaborated with backend teams to design **GraphQL APIs and caching layers**, reducing query latency by 45% in high-traffic scenarios.

- Implemented **multi-chain wallet connectivity and token transaction signing**, improving user trust and adoption for DeFi protocols.
- Led code reviews and enforced **strict TypeScript contracts**, reducing runtime errors by 40% and improving developer onboarding efficiency.
- Deployed applications via **AWS and GCP pipelines**, leveraging containerized environments to ensure high reliability and zero-downtime releases.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Delivered **high-traffic React applications** integrated with third-party APIs, serving enterprise digital campaigns across multiple markets.
- Migrated legacy JavaScript codebases to **TypeScript-first architectures**, improving maintainability and scalability for future feature growth.
- Designed **micro-frontend structures** to isolate campaign modules, enabling faster deployment cycles and reducing cross-team dependency risks.
- Configured **Webpack and Babel** builds with production-ready optimizations, cutting initial load times by 25% across mobile devices.
- Integrated **real-time analytics dashboards** with interactive charts, supporting marketing teams in tracking performance metrics at scale.
- Built **custom hooks and reusable components**, reducing duplicate logic by 60% and increasing development velocity.
- Partnered with DevOps team to run **Dockerized apps on AWS ECS and GCP Cloud Run**, achieving seamless CI/CD deployments.
- Mentored junior engineers on **React state management and feature slicing**, ensuring best practices were consistently applied.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Developed and maintained **React + Node.js applications** powering SaaS platforms with subscription-based business models.
- Designed **responsive UIs with Tailwind and SCSS**, improving accessibility compliance and reducing bounce rates by 20%.
- Enhanced **frontend caching strategies** with IndexedDB and service workers, enabling offline-first capabilities in progressive web apps.
- Collaborated with backend developers to implement **REST APIs with authentication and role-based access control**.
- Improved system reliability by designing **logging and monitoring solutions** with AWS CloudWatch and GCP Stackdriver.
- Built **modular design systems** and component libraries to standardize UI across multi-tenant SaaS platforms.
- Designed and optimized **SQL + NoSQL data queries**, reducing API response times for complex dashboards by 30%.
- Integrated **CI/CD workflows** for automated testing and deployment, significantly reducing manual release errors.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Developed **frontend components in React** for enterprise CMS systems supporting large-scale e-commerce clients.
- Assisted in designing **GraphQL schemas** and implementing API consumption logic in frontend applications.
- Created **Webpack configurations** for multi-environment builds, streamlining local development and production releases.
- Optimized **frontend rendering and hydration processes**, reducing time-to-interactive for critical pages by 28%.
- Collaborated with design team to implement **pixel-perfect UI components** aligned with branding guidelines.
- Built **custom data visualization dashboards** enabling clients to track product performance in real-time.
- Improved error handling by implementing **TypeScript type safety and runtime validations**.
- Participated in **Agile sprints and daily standups**, ensuring timely delivery of prioritized features.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Supported development of **internal tools with React and vanilla JavaScript**, gaining hands-on production experience.
- Assisted senior engineers in **integrating SQL databases with Node.js backends**, contributing to improved system reliability.
- Wrote **unit tests and integration tests** for frontend features, improving coverage and reducing post-release defects.
- Designed **basic Webpack build scripts**, learning foundational build optimization practices.
- Collaborated on **responsive UI layouts**, enhancing mobile compatibility for enterprise dashboards.
- Implemented **REST API consumption** for internal dashboards, supporting HR and financial reporting processes.
- Documented workflows and code contributions, helping improve team knowledge sharing.
- Gained early exposure to **Agile methodologies and code review processes**, setting foundation for professional growth.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- **AWS Certified Developer – Associate**
- **Google Cloud Professional Developer**

- **Certified React Developer (Meta/React Nanodegree)**
 - **Blockchain Developer Certification (Consensys Academy)**
-

PROJECTS

- **DeFi Lending Dashboard (React, TypeScript, Wagmi, WalletConnect, GraphQL, AWS):** Built a production-ready DeFi dashboard with undercollateralized lending support and real-time blockchain data visualization.
- **Crypto Portfolio Manager (Next.js, TypeScript, Feature Slices Design, GCP, MongoDB):** Developed portfolio margining application with modular architecture and optimized data queries.
- **Web3 Wallet Integration Module (React, Wagmi, WalletConnect, Node.js, Redis):** Designed reusable wallet authentication and transaction signing components for multi-chain dApps.
