

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Results-oriented Full Stack Developer with 9+ years of experience specializing in building scalable applications using TypeScript, Node.js, React, NestJS, and PostgreSQL. Proven expertise in developing RESTful and GraphQL APIs, implementing CI/CD pipelines, and creating reusable components across frontend and backend systems. Adept in Agile environments, producing testable, documented, and maintainable code, with hands-on experience in Docker, Vite, Linux, Tailwind, and React Native. Passionate about delivering high-performance applications and collaborating with distributed teams in dynamic environments

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, SQL, Bash
- **Frontend:** React, Vue.js, Next.js, Nuxt.js, React Native, TailwindCSS, Bootstrap
- **Backend:** Node.js, NestJS, Express.js, GraphQL, tRPC, REST API
- **Databases:** PostgreSQL, MySQL, TypeORM, Sequelize
- **Tools & DevOps:** Docker, Linux, Git, Swagger, Monitask, Vite, GitHub Actions, CI/CD, Vitest, Playwright
- **Other:** Agile/Scrum, Microservices, API Documentation, Authentication Systems

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Engineered and maintained multiple full-stack applications using Node.js with NestJS and React, ensuring performance, maintainability, and security across all systems.
- Integrated RESTful APIs and GraphQL interfaces to support client-server communication for scalable restaurant and logistics software solutions.
- Led technical documentation efforts including Swagger API specs, architecture diagrams, and database schemas using PostgreSQL and MySQL.
- Created component libraries with TypeScript and TailwindCSS to streamline frontend development across multiple projects and teams.
- Collaborated in an Agile team to prioritize feature backlogs and implemented robust test suites using Vitest and Playwright for regression testing.
- Developed React Native prototypes to transition web modules into mobile-friendly cross-platform experiences with consistent UI/UX.

- Managed Docker-based deployment pipelines for CI/CD with GitHub Actions to streamline development-to-production workflows.
- Mentored junior developers on best practices in clean coding, database optimization, and architectural design decisions.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Built and scaled enterprise-facing digital marketing dashboards using React, Vue, and Nuxt.js, resulting in 50% faster campaign configuration workflows.
- Developed microservices in Node.js and Express.js that processed high-volume marketing data streams with performance monitoring and error recovery.
- Implemented secure OAuth2-based authentication across web and mobile platforms, ensuring GDPR-compliant session tracking.
- Designed REST APIs with OpenAPI documentation and developed internal CLI tools for campaign automation and scheduling.
- Collaborated with designers to implement pixel-perfect responsive interfaces using TailwindCSS and Bootstrap across modern browsers and devices.
- Orchestrated PostgreSQL and MySQL database schemas and indexes, achieving 35% faster query performance through optimization.
- Participated in nightly deployments and CI/CD integration with Docker and Jenkins to ensure quality releases.
- Conducted technical reviews and knowledge transfer sessions to improve team efficiency and reduce onboarding times.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Spearheaded frontend development of B2B platforms using React, Vue, and custom component libraries tailored for financial and logistics clients.
- Contributed to backend services in Node.js with TypeORM integration and advanced SQL procedures to support dynamic reporting modules.
- Built feature-rich SPAs integrated with Vite for optimized build times and hot module replacement during development cycles.
- Maintained internal REST and GraphQL APIs, including integration with third-party payment gateways and real-time notification systems.
- Automated testing strategies using unit, integration, and end-to-end tests for mission-critical features.
- Implemented mobile-first interfaces and reusable layout components across projects for optimal UX on smartphones and tablets.
- Led UI accessibility efforts and localization/internationalization features across three languages.
- Refactored legacy JavaScript codebases to modular TypeScript implementations, enhancing type safety and maintainability.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Contributed to e-commerce solutions using Vue.js and backend APIs in Node.js for Baltic region retail clients.
- Helped build internal inventory management system and synchronized product data with external vendor APIs.
- Developed custom data pipelines to process bulk product imports using CSV parsing, data validation, and relational mapping.
- Participated in UI revamp projects, ensuring cross-browser compatibility and accessibility for end users.
- Implemented unit tests for core modules and conducted post-release bug triage with QA teams.
- Documented workflows and schema structures for future maintenance and development cycles.
- Performed server maintenance and security patching on Linux-based development environments.
- Integrated file upload features with cloud storage support for image assets and documents.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Supported development of educational platforms using PHP and MySQL while learning JavaScript frontend techniques.
- Developed CRUD features, form validations, and file upload modules for classroom content management.
- Gained exposure to cross-functional development lifecycle and Agile collaboration practices.
- Conducted functional and unit testing to ensure feature completeness and correctness.
- Assisted in database indexing improvements and query tuning to reduce report generation times.
- Shadowed senior developers and contributed to code reviews and ticket grooming sessions.
- Produced technical documentation for user roles, feature workflows, and database tables.
- Maintained version control practices and collaborated on Git-based repositories.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Node.js Certified Developer – OpenJS Foundation
- ❖ React Developer Certification – Meta (Coursera)
- ❖ Full Stack Web Development with TypeScript – Udemy
- ❖ Docker for Developers – Pluralsight

PROJECTS

✓ **Altametrics Workforce Platform Clone (Personal Project)**

- Rebuilt critical modules (scheduling, inventory, reports) in React, NestJS, and PostgreSQL to mirror Altametrics architecture
- Integrated tRPC and GraphQL for experimentation and API performance benchmarking
- Deployed system using Docker, Vite, and Nginx on Linux server with SSL and CI/CD

✓ **Restaurant POS Inventory Tracker**

- Developed end-to-end restaurant inventory system using React Native, TypeScript, and MySQL
- Enabled real-time sync and offline-first capabilities, tested across Android and iOS platforms
