

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Product-driven Full Stack Engineer with 9+ years of experience crafting polished, performant, and maintainable web applications. Specializing in modern frontend stacks—React, Next.js, TypeScript, Tailwind—and comfortable handling backend logic with Node.js and Prisma. Known for shipping high-quality features quickly, collaborating closely with designers, and building intuitive, user-centric interfaces. Strong advocate for clean code, smart iteration, and scaling products without compromising UX.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL, HTML, CSS
- **Frontend:** React, Svelte, Vue.js, Next.js, Tailwind CSS, Redux, jQuery
- **Backend:** Node.js, NestJS, Express, FastAPI, Flask, Odoo ORM
- **Databases:** PostgreSQL, MySQL, MongoDB, Elasticsearch
- **DevOps & Cloud:** Docker, GitHub Actions, CI/CD, Vercel, Heroku, DigitalOcean
- **Tools & Workflow:** Git, GitHub, JIRA, Confluence, Postman, Figma, Storybook, Zeplin
- **Testing:** Jest, React Testing Library, Pytest, TDD
- **Other:** Odoo ERP (custom workflows & scripting), Pandas, NumPy

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led development of real-time web apps using React and Tailwind CSS with Node.js and FastAPI backends, powering ERP-integrated community dashboards.
- Designed modular RESTful APIs with role-based permissions and secure token handling using OAuth2 and JWT across multiple user types.
- Integrated PostgreSQL with Prisma and Elasticsearch for fast, paginated querying on large datasets, improving dashboard load time by 60%.
- Implemented CI/CD pipelines using Docker and GitHub Actions to support agile feature rollout across staging and production.
- Built internal developer tools to sync Discord-like community metadata from third-party services into internal CRM systems.
- Advocated async-first communication, mentored junior devs, and contributed to an engineering culture of feedback, testing, and rapid shipping.

Syscom Digital
Software Engineer
October 2019 – August 2021
Bucharest, Romania

- Developed marketing campaign admin tools using Vue.js and Express, with PostgreSQL as the primary datastore and Redis for caching.
- Refactored and extended backend integrations for CRM and email automation workflows, reducing sync time by 70%.
- Created dashboard components using dynamic Vue templates and Tailwind CSS, ensuring mobile-first responsiveness across clients.
- Built and maintained custom API gateway using Node.js with caching, proxy routing, and load-aware logic.
- Managed PostgreSQL schema migrations with zero-downtime practices in a microservice architecture.
- Delivered weekly sprint demos, collaborated with QA engineers to define test criteria, and handled production hotfixes independently.

Soft Build
Software Developer
June 2016 – July 2019
Timișoara, Romania

- Architected modular internal tools using Express, PostgreSQL, and Vue.js to support HR and finance operations across departments.
- Refactored legacy monoliths into independently deployable services using Docker and CI-based workflows, cutting deployment time by 50%.
- Collaborated with cross-functional teams to build dynamic financial dashboards with real-time budget tracking.
- Led integration of third-party tools (Zoho, Mailgun) via secure REST APIs with exponential backoff logic and SLA-aware retry mechanisms.
- Maintained infrastructure for dev, test, and production environments using shell scripts and crontab-based backup automation.
- Authored onboarding and code standardization docs, led pair programming sessions with junior devs.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Built data ingestion scripts using Node.js and Python to collect analytics and push summaries into PostgreSQL for internal BI dashboards.
- Supported Svelte migration experiments to modernize UIs within legacy environments constrained by templating engines.
- Wrote unit tests using Jest and created stubs/mocks for integration in CI pipelines.
- Led debugging sessions to resolve inconsistencies in customer data across environments and restored operational confidence.
- Contributed to developer productivity by documenting component behavior and API interaction patterns.
- Configured GitLab CI for container-based deployments and artifact storage for staging environments.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Built CLI tools in Node.js and Python to automate transformation of financial data between ERP formats.
 - Prototyped community-style user interfaces in vanilla JavaScript with Discord-inspired UX for internal client communication tools.
 - Created data sync scripts to harmonize metadata between local CRM and cloud services.
 - Assisted in early-stage experiments using Svelte and lightweight web socket services for real-time UI feedback.
 - Participated in daily stand-ups and provided tech demos for peer feedback.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ TypeScript Masterclass – Udemy
 - ❖ Full-Stack with Node.js, React & PostgreSQL – Coursera
 - ❖ Docker for Developers – Udemy
 - ❖ Odoo Technical Training – OdooClass
 - ❖ Python for Data Science – Coursera
-

PROJECTS

- ✓ **Discord Campaign Sync** – Node.js + PostgreSQL service syncing engagement metrics and user roles from Discord API to internal CRM.
- ✓ **Svelte Admin Panel** – Lightweight, production-ready admin dashboard with real-time metrics, notifications, and permission management.
- ✓ **NestJS Auth Server** – Role-based JWT auth system with PostgreSQL and Redis session store; integrates with third-party OAuth providers.
- ✓ **Finance PDF Generator** – Serverless backend with FastAPI and Pandas to output dynamic PDF/CSV financial reports on demand.
- ✓ **Vue Webhook Dashboard** – Frontend interface for visualizing inbound events from APIs like Stripe, Discord, and Intercom in real time.
