

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative Frontend Developer with 10+ years of experience building interactive digital products, scalable web applications, and visually rich experiences. Skilled in **Svelte, React, Angular, and PixiJS**, with hands-on expertise in **GLSL shader programming** for custom effects. Strong background in **API integration, animations, UI/UX optimization, and cross-platform performance tuning**. Adept at collaborating with artists, designers, and backend teams to bring engaging gameplay and digital experiences to life. Proven track record of delivering **interactive frontends, reusable component libraries, and high-performance client-facing applications** in fast-paced environments.

TECHNICAL SKILLS

- **Frontend:** Svelte, React, Angular, Vue.js, PixiJS, WebGL, GLSL, TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, TailwindCSS
- **Backend & APIs:** Node.js, Express.js, RESTful APIs, GraphQL, .NET Core
- **Game & Graphics:** PixiJS, Three.js, WebGL pipelines, shader development, Canvas API, animations
- **Databases:** SQL (PostgreSQL, MySQL), NoSQL (MongoDB, Redis, Firestore)
- **Cloud & DevOps:** AWS (S3, Lambda, ECS), GCP (Firestore, Cloud Run), Azure, Docker, Kubernetes, CI/CD pipelines
- **Tools & Workflow:** Git, GitLab, Jira, Agile/Scrum, Figma, Adobe XD
- **Other:** Performance optimization, accessibility, responsive design, technical onboarding, client integrations

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Developed and optimized **interactive frontend features** using Svelte, Angular, and PixiJS, ensuring seamless integration of visual effects and game-inspired UI across platforms.
- Designed and implemented **custom GLSL shaders** within WebGL rendering pipelines, creating dynamic particle effects, lighting variations, and shader-driven animations for enhanced gameplay experiences.
- Collaborated closely with designers and artists to transform static assets into **animated UI/UX elements**, enabling smooth transitions, visual storytelling, and consistent theme alignment.
- Integrated **REST and GraphQL APIs** with frontend clients, ensuring efficient client/server communication for real-time data synchronization, authentication, and gameplay interactions.

- Built a library of **reusable components and effects** to accelerate development, reducing project timelines by 30% while maintaining consistent design quality across multiple applications.
- Debugged, profiled, and optimized **WebGL rendering performance**, reducing shader computation overhead and ensuring smooth framerates across browsers and mobile devices.
- Led technical onboarding for new enterprise clients, implementing **custom client integrations** with backend APIs and third-party systems, ensuring seamless adoption of platform features.
- Championed **CI/CD best practices** and automated builds with Docker and GitLab pipelines, ensuring consistent deployments and reducing manual release errors.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Built **interactive marketing experiences and gamified frontends** with Angular and React, enabling high-performance campaigns engaging thousands of concurrent users.
- Implemented **shader-based visual effects** using GLSL and PixiJS to power immersive advertising experiences with fluid animations, real-time transitions, and dynamic interactions.
- Designed responsive, pixel-perfect **UI components and game-like interfaces**, ensuring compatibility across browsers and devices with advanced CSS3/SCSS and TypeScript.
- Integrated complex **third-party APIs** for ad-tracking, analytics, and payment systems, ensuring secure, scalable, and seamless functionality within client applications.
- Collaborated with design teams to **animate artwork and motion graphics**, using WebGL and JavaScript frameworks to enhance brand storytelling and visual engagement.
- Tuned application performance by **optimizing rendering pipelines**, asset loading, and lazy rendering techniques, ensuring sub-second interaction speeds even under heavy traffic.
- Authored technical documentation and **mentored junior developers** in shader programming, frontend workflows, and animation techniques, raising overall team capabilities.
- Coordinated with backend teams to implement **event-driven architecture** for high-traffic campaign platforms, ensuring reliable communication between services and clients.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Delivered **feature-rich frontends for digital platforms**, implementing reusable React and Angular components that powered enterprise SaaS products and interactive dashboards.
- Created **custom shaders and real-time rendering effects** to simulate physics-driven animations, lighting environments, and interactive overlays within WebGL contexts.
- Engineered **responsive game-like user flows**, enabling intuitive navigation, smooth page transitions, and engaging motion design within consumer-facing applications.
- Integrated **RESTful APIs and real-time sockets** for multiplayer-style interactions, ensuring data consistency and low-latency gameplay-like experiences across clients.
- Collaborated with UX/UI teams to **prototype and refine micro-animations**, ensuring every visual detail contributed to user immersion and retention.
- Conducted rigorous **performance optimization**, identifying memory leaks in WebGL applications and improving GPU utilization through shader refactoring.
- Applied **DevOps practices** with Dockerized environments and CI/CD pipelines, enabling scalable deployments across AWS and GCP with minimal downtime.
- Partnered with product owners to **deliver custom client solutions**, adapting gaming-inspired interfaces for financial, educational, and media sectors.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Developed **frontend modules for digital publishing platforms**, integrating interactive content, animations, and advanced rendering pipelines with AngularJS and WebGL.
- Implemented **GLSL fragment shaders** for custom rendering effects, including transitions, real-time blurring, and particle-based overlays enhancing digital storytelling.
- Optimized **cross-browser performance**, ensuring rendering consistency across Chrome, Firefox, and Safari by resolving GPU compatibility issues in WebGL contexts.
- Built **custom onboarding workflows** for new clients, integrating authentication APIs and adapting interfaces to unique content management requirements.
- Enhanced **interactive UI/UX components**, making static articles and media visually dynamic with canvas animations, transitions, and shader effects.
- Debugged complex rendering issues within WebGL pipelines, ensuring reliable frame delivery for animations under varied device capabilities.
- Collaborated with backend developers to **synchronize API responses with interactive visual layers**, providing seamless content updates within frontend applications.
- Documented shader integration workflows and reusable patterns, streamlining team adoption of advanced visual techniques for future projects.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Assisted in developing **interactive frontends** with HTML5, CSS3, and JavaScript, gaining hands-on experience with WebGL rendering pipelines and shader fundamentals.
- Created prototype **shader-driven animations** for experimental projects, exploring real-time visual effects such as distortion, lighting, and water reflections.
- Built foundational **UI components and responsive layouts**, ensuring compatibility across devices and supporting accessibility best practices.
- Integrated APIs with frontends for **user authentication and content delivery**, ensuring reliable data flow and secure communications between systems.
- Partnered with senior developers to **troubleshoot rendering performance issues**, optimizing asset loading and improving runtime stability across browsers.
- Contributed to the development of **interactive prototypes and demos**, collaborating with designers to validate concepts with clients before full production.
- Implemented code reviews and **learned best practices in shader programming**, frontend design, and cross-functional collaboration.
- Supported early adoption of **cloud hosting environments**, deploying applications to AWS and GCP under supervision.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
 - Google Cloud Professional Cloud Developer
 - Microsoft Certified: Azure Developer Associate
 - Certified Kubernetes Application Developer (CKAD)
-

PROJECTS

- **Shader-Driven Particle System (Personal Project):** Built a WebGL particle system with GLSL shaders in PixiJS, enabling real-time interactive effects for a browser-based game demo.
- **Cross-Platform Game UI Library (Sensidev):** Developed reusable animated UI components for interactive web games, accelerating onboarding of new clients by 40%.
- **Immersive Digital Ad Campaign (Syscom Digital):** Engineered shader-based visual effects for interactive campaigns engaging 1M+ users with high retention and performance.
