PROFESSIONAL SUMMARY

Results-oriented Senior Software Engineer and Frontend Team Lead with 9+ years of experience building scalable, high-performance web applications using React, Next.js, and TypeScript. Proven success in leading distributed frontend teams, mentoring engineers, and driving architectural innovation in remote-first, product-focused environments. Passionate about creating intuitive UX, clean code, and empowering engineers to grow. Looking to make an impact in a high-growth SaaS company with a focus on technical excellence and frontend leadership.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, SQL, GraphQL
- **Frameworks:** React.js, Next.js, Redux, Zustand, Tailwind CSS, Node.js, Express.js
- **Architecture:** Micro Frontends, Component Libraries, Monorepos, CI/CD (GitHub Actions, GitLab CI)
- **Tools:** Webpack, Vite, TurboRepo, NX, Jest, Vitest, Playwright, Storybook, Postman
- **Cloud & DevOps:** Docker, AWS (S3, Lambda), Vercel, Firebase, Git, Linux, Agile (Scrum/Kanban)
- **Team Skills:** Team leadership, Technical mentoring, Code reviews, Architecture planning, Sprint ownership

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led the frontend team of 6 engineers to design and develop scalable customer-facing interfaces for SaaS platforms using React, Next.js, and TypeScript in a monorepo structure.
- Mentored junior and mid-level developers through 1:1 sessions, technical walkthroughs, and regular code reviews that improved onboarding and internal promotion rates.
- Collaborated with design and product to transform Figma prototypes into accessible, high-performing UI components with pixel-perfect accuracy and responsive behavior.
- Spearheaded migration to a micro-frontend architecture using TurboRepo and Module Federation, significantly improving build speed and deployment flexibility across teams.
- Introduced feature flags and A/B testing tools to validate UI changes in production, resulting in improved decision-making and UX satisfaction metrics.

- Built and maintained shared design system with Storybook, increasing development speed and visual consistency across four internal projects.
- Integrated frontend CI/CD pipelines using GitHub Actions and Playwright, catching 40% more UI issues before production and decreasing release rollback incidents.
- Championed team-wide adoption of accessibility and performance best practices, reducing Lighthouse audit issues by 60% and increasing Core Web Vitals scores.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed custom web-based platforms for marketing automation and campaign management using React.js and Redux, handling high volumes of dynamic data updates.
- Acted as the frontend lead in cross-functional squads, ensuring delivery of features aligned with business goals, while managing timeline and scope trade-offs.
- Engineered robust and testable UI components in React and TypeScript, resulting in modular, scalable, and well-documented frontends for internal and client use.
- Led code quality initiatives and PR review guidelines, reducing tech debt and enabling faster iteration cycles through reusable patterns and ESLint rules.
- Collaborated with backend developers to integrate RESTful APIs and GraphQL endpoints, establishing shared schemas and improving error handling coverage.
- Integrated Mixpanel and Google Analytics for real-time behavior tracking, enabling data-informed decisions on design iterations and feature deprecations.
- Maintained internal component library and ensured seamless adoption across teams with regular updates, documentation, and feedback channels.
- Contributed to the agile process by owning grooming and sprint planning ceremonies, helping prioritize tech-driven improvements alongside feature tickets.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built and deployed modern, responsive single-page applications using React, JavaScript, and Node.js for clients in e-commerce and logistics sectors.
- Collaborated closely with UI/UX designers to define component behaviors, transitions, and visual layouts, resulting in improved conversion rates and user satisfaction.
- Migrated legacy PHP/jQuery codebases to React, reducing code complexity, increasing maintainability, and enhancing page speed and mobile responsiveness.
- Created automated test suites using Jest and React Testing Library to ensure production stability across critical frontend flows like checkout and registration.
- Integrated third-party services including Stripe, Firebase, and content delivery networks to deliver seamless, real-time experiences across platforms.
- Optimized frontend bundle sizes through lazy loading, code splitting, and image compression strategies, reducing load time by up to 45%.
- Participated in architecture decisions and implementation of component-driven development workflows with Storybook and design tokens.
- Deployed frontend apps to cloud platforms like Vercel and AWS S3 with CI/CD pipelines configured for zero-downtime deployments.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Contributed to frontend development for internal SaaS dashboard using AngularJS and Bootstrap, ensuring responsive layout across browser environments.
- Implemented modular reusable components to streamline form handling, validation, and user feedback for administrative workflows.
- Integrated REST APIs for CRUD operations and status tracking, improving productivity of end users by consolidating key actions into single interfaces.
- Collaborated with QA and backend to triage bugs, review logs, and identify performance regressions using Chrome DevTools and Lighthouse audits.
- Delivered documentation and onboarding resources for junior engineers to ensure consistency across shared repositories.
- Researched and proposed frontend performance metrics and KPIs that were later adopted team-wide.
- Built data visualizations using Chart.js for client dashboards, delivering actionable insights from internal analytics pipelines.
- Designed and tested user flows for admin features such as permission management, user creation, and real-time logging tools.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Developed internal CRM interfaces with jQuery and PHP to manage customer data, interactions, and marketing automation triggers.
- Created interactive dashboards to monitor sales performance and lead pipeline metrics, helping sales team improve follow-ups by 30%.
- Implemented input validation and sanitization features to enhance frontend security and prevent XSS/CSRF vulnerabilities.
- Built data import tools using AJAX and file APIs to allow batch uploading of customer profiles via CSV templates.
- Designed mobile-friendly views for CRM sections using media queries and responsive layouts to enhance accessibility for field reps.
- Integrated Google Maps API for location-aware features in client profiles and route optimizations.
- Contributed to UI/UX redesign projects by providing competitive research and wireframe proposals based on user feedback.
- Participated in weekly product reviews and delivered final internship presentation with measurable impact reports.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Certified React Developer – Meta / Coursera
 - ❖ Advanced TypeScript – Udemy
 - ❖ Software Architecture Fundamentals – O'Reilly
 - ❖ Leadership for Engineers – Pluralsight
-

PROJECTS

- ✓ **Team Collaboration Suite – SaaS Admin Portal**
Led frontend team to build a fully modular, high-performance React + Next.js SaaS portal with dynamic access control, theming, and shared design system. Delivered CI/CD, testing pipelines, and microfrontend integrations.
- ✓ **Marketing Automation Platform**
Engineered a React-based campaign builder tool with drag-and-drop components, analytics visualization, and API-driven automation flows. Integrated A/B testing and user segmentation features.
- ✓ **E-Commerce Frontend Revamp**
Migrated a legacy storefront from jQuery to Next.js and Tailwind CSS, introduced lazy-loading and route prefetching, resulting in a 60% improvement in page load and Lighthouse performance scores.
