

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Experienced and creative Senior Frontend Engineer with 9+ years in full-stack and frontend development. Specialized in building scalable, elegant, and user-friendly interfaces with React, TypeScript, Next.js, Tailwind, and state management libraries like React-Query. Passionate about simplifying complex data workflows, designing reusable UI systems, and contributing to open-source MLOps tools. Experienced in cross-functional collaboration, rapid iteration, and production-grade deployments. Familiar with cloud platforms like AWS and GCP, and working knowledge of both SQL and NoSQL databases.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Radix UI, Shadcn, React-Query, Redux, SCSS, HTML5, CSS3
- **Backend:** Node.js, Express.js, Python (FastAPI, Flask), PHP (Laravel), REST APIs, GraphQL
- **DevOps/Cloud:** AWS (Lambda, S3, EC2, API Gateway), GCP (App Engine, Firestore), Docker, GitHub Actions, Vercel, Netlify
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase, Redis
- **Other Tools:** React Flow, Zustand, Storybook, Webpack, Jest, Cypress, Git, Jira

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led UI development for multiple web-based analytics dashboards in React and Next.js, improving usability for complex data workflows used by enterprise clients.
- Architected and maintained a shared component library using Storybook and Radix UI, reducing design debt and speeding up development across teams.
- Collaborated with MLOps engineers to build visualization tools using React Flow for real-time ML pipeline monitoring and orchestration.
- Optimized performance of large, stateful UIs with React-Query and lazy loading strategies, improving interaction speed by 45%.
- Worked closely with designers to iterate on Tailwind-based UI systems with strict adherence to accessibility and responsiveness standards.
- Integrated frontend with GCP backend APIs using secure auth patterns and managed deployment with Vercel and Docker containers.

- Championed use of Cypress for E2E testing across components, reducing frontend bugs by 30% in production.
- Participated in open-source contributions, publishing UI components used across multiple internal and external React-based projects.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed a large-scale campaign management dashboard using React, TypeScript, and Redux for digital marketing teams.
- Designed and implemented a flexible data table component to visualize campaign metrics, supporting dynamic filters and custom visual rules.
- Created CI/CD pipelines for frontend builds using GitHub Actions and Netlify, enabling faster iteration and testing cycles.
- Integrated AWS Lambda and S3 for user-uploaded assets, and implemented secure API Gateway endpoints for frontend communication.
- Led refactor of legacy jQuery codebase into reusable React components, reducing technical debt and improving maintainability.
- Mentored junior frontend engineers and facilitated regular code review sessions to ensure quality and adherence to best practices.
- Coordinated directly with backend team to define GraphQL schemas and manage caching strategies using Apollo Client.
- Drove frontend observability efforts using custom logging, user behavior tracking, and Sentry integration.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Created mobile-friendly web applications using AngularJS and Bootstrap, with a focus on enterprise process automation tools.
- Built dynamic form builders and dashboards consuming RESTful APIs for logistics and manufacturing companies.
- Migrated client-side logic from Backbone to React to support better state handling and component reuse.
- Developed internal tools using Laravel and Vue.js to support customer onboarding workflows.
- Managed MySQL and MongoDB database interactions, optimizing queries and indexes to support large dataset reports.
- Set up and maintained Docker-based development environments for easier onboarding and consistency.
- Collaborated with DevOps team to integrate CI/CD deployments and automated testing using Jenkins.
- Implemented authentication with OAuth2 and JWT tokens, ensuring secure access control for user roles.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Contributed to web app UI development for a financial SaaS platform using React and Webpack.

- Created responsive UI components using SCSS and JavaScript, optimized for mobile and tablet devices.
- Integrated charts and data visualization using Chart.js and D3 for analytics dashboards.
- Participated in Agile ceremonies and contributed to sprint planning and story estimations.
- Conducted browser testing and performance profiling using Lighthouse and Chrome DevTools.
- Wrote unit tests and integration tests using Jest and Enzyme.
- Assisted in optimizing build pipelines and improving initial load times.
- Delivered regular frontend demos to clients and gathered feedback for iteration.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Supported frontend and backend development for internal management systems using PHP and JavaScript.
- Built CRUD interfaces for admin panels, improving internal operations for logistics workflows.
- Designed HTML email templates and marketing landing pages with dynamic forms.
- Wrote SQL queries for reporting dashboards and handled database normalization.
- Built file upload workflows with image compression using JavaScript and GD library.
- Created UI components using jQuery and Bootstrap with validation and AJAX integration.
- Participated in weekly product meetings and contributed to task scoping.
- Shadowed senior developers to learn modern frontend architecture and best practices.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Google Cloud Professional Cloud Developer
- React Nanodegree by Udacity
- Advanced CSS and Sass by Jonas Schmedtmann

➤ PROJECTS

- **MLFlow UI Enhancement** — Contributed open-source components to a React-based MLFlow fork to support visual DAG editing and status visualization using react-flow and Tailwind CSS.
- **Next.js Admin Panel** — Built a highly configurable admin interface using Next.js, Tailwind, and Zustand for internal tools used by a SaaS billing platform.
- **Realtime Event Dashboard** — Created a real-time dashboard using WebSockets and React-Query to visualize IoT device events for an industrial automation client.
