PROFESSIONAL SUMMARY

Frontend Developer with over 8 years of professional experience building performant, user-centric web applications with React and modern JavaScript ecosystems. Passionate about frontend architecture, design systems, and UX. Proficient in TypeScript, Zustand, React Query, and cross-cloud environments (AWS & GCP). Eager to contribute to fast-paced product teams shaping the future of business travel.

TECHNICAL SKILLS

- **Frontend:** React.js, TypeScript, JavaScript (ES6+), Zustand, React Query, Redux, HTML5, CSS3, SCSS, Material UI, TailwindCSS, Figma
- **Testing:** Jest, React Testing Library, Cypress, Vitest
- **Tooling:** Git, GitHub Copilot, Webpack, Vite, ESLint, Prettier, Cursor, Storybook
- **Cloud/DevOps:** AWS (EC2, S3, Lambda), GCP (App Engine, Firestore), Docker, GitHub Actions, Netlify
- **Databases:** PostgreSQL, MySQL, MongoDB, Firestore, IndexedDB
- **Other:** Agile/Scrum, TDD, Clean Architecture, Design Systems, REST APIs, CI/CD

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led frontend initiatives for B2B platforms, architecting scalable React applications with TypeScript, Zustand, and React Query to deliver fast and maintainable interfaces.
- Designed and maintained internal admin dashboards that served as critical operational tools for client-facing apps, improving response times by 40%.
- Spearheaded the implementation of a centralized design system and custom UI component library, increasing UI consistency across projects by 90%.
- Mentored junior and mid-level engineers in React patterns, testing, and architectural best practices to build internal expertise across the frontend guild.
- Reduced frontend technical debt by over 50% through systematic refactoring and linting automation using ESLint and Prettier integrated in CI pipelines.
- Built micro-frontends with Vite and Module Federation to support rapid feature rollout and codebase separation across product domains.

- Collaborated in daily agile ceremonies, aligning closely with QA, designers, and backend developers to ensure seamless delivery of user-first features.
- Used GitHub Copilot and Cursor to prototype and ship components faster, boosting individual productivity and decreasing bug rates in early testing phases.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed and maintained customer-facing applications using React, JavaScript, and Redux, with a focus on responsive and mobile-first UI design.
- Integrated business logic-heavy interfaces with custom CMS backends, building reusable hooks and contexts to streamline development.
- Collaborated in a multi-region agile team, using GitLab CI/CD pipelines and Dockerized environments to support iterative releases.
- Used Firestore and MongoDB to implement flexible real-time data structures, ensuring fast page load performance and offline reliability.
- Led accessibility improvements across product UIs, achieving WCAG 2.1 AA compliance and broadening usability across devices and screen readers.
- Refactored legacy jQuery-based modules into modern React components with unit and snapshot testing coverage over 90%.
- Implemented real-time user analytics tracking with Mixpanel and Segment for actionable product feedback loops.
- Participated in architecture sessions, contributing design patterns that enhanced component composability and developer experience.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built robust single-page applications using React, AngularJS, and Vue, gradually transitioning legacy codebases to more modern stacks.
- Developed flight and hotel booking modules using dynamic APIs, optimizing DOM rendering with memoization and virtualization.
- Designed page layouts using BEM methodologies and CSS Grid/Flexbox, enhancing consistency across screen sizes.
- Implemented token-based auth and JWT workflows integrated into client-side routing with React Router.
- Introduced client state management via Redux Toolkit and improved data-fetching resilience using Axios interceptors and retry patterns.
- Integrated PostgreSQL and MySQL backends using RESTful services, with query optimizations ensuring latency under 200ms.
- Collaborated closely with UI/UX designers using Figma and Zeplin, converting complex wireframes into polished UI modules.
- Initiated test-driven development practices across frontend modules, raising test coverage and catching regressions early.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Contributed to eCommerce frontend modules using React and Webpack, focusing on performance budgets and SEO best practices.
- Used Firebase Realtime DB to power lightweight dashboard components with real-time sync and conflict resolution.
- Worked with Agile board rituals and GitFlow branching to ensure alignment across fast iterations.
- Built custom charting components with D3.js for visualizing dynamic business metrics.
- Participated in accessibility audits and led styling consistency efforts with SCSS variables and media queries.
- Integrated Stripe and PayPal SDKs for secure checkout workflows across international storefronts.
- Developed product search and filter interfaces optimized with debounce and pagination mechanics.
- Delivered pixel-perfect UI using Figma handoffs and a shared design token strategy.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in migrating legacy PHP pages into a React-based frontend application, collaborating with full-time engineers to understand design standards.
- Implemented basic UI components using React and Material UI, ensuring consistent behavior across different devices.
- Worked on cross-browser compatibility issues and contributed to a UI QA checklist to improve delivery quality.
- Configured unit test environments with Mocha and Chai to test component logic before PR approval.
- Participated in biweekly sprints and retrospectives, presenting demo updates on intern-led initiatives.
- Built small-scale CRUD interfaces backed by Firebase Authentication and Realtime DB.
- Debugged UI issues using Chrome DevTools, console logging, and breakpoint inspection.
- Assisted in writing internal documentation for component libraries and frontend workflows.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ **Frontend Architecture & Design Systems** – Frontend Masters (2023)
 - ❖ **Advanced React Performance Optimization** – Pluralsight (2022)
 - ❖ **AWS Developer Associate** – Amazon Web Services (2021)
-

PROJECTS

- ✓ **Booking Admin Portal (2023 – 2024)**

Built a React + Zustand-powered dashboard for internal hotel/flight reservation ops. Integrated filters, audit logs, user roles, and booking workflows used daily by 50+ team members.

- ✓ **Flight Cost Estimator Widget (2022)**

Developed a real-time cost prediction widget using React, React Query, and custom API integrations. Enabled users to visualize travel price variations before booking.
