PROFESSIONAL SUMMARY

Senior Frontend Developer with 8+ years of experience building responsive, performant, and user-centric web applications using React, TypeScript, and modern CSS frameworks like Tailwind. Proven track record delivering scalable interfaces for international products, including telco dashboards, internal business tools, and e-commerce platforms. Adept at building apps from scratch, refactoring legacy codebases, and collaborating across remote teams. Strong advocate for clean, maintainable code, and continuous UI performance optimization.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, React.js, React Native, Next.js, Node.js, PHP, HTML5, CSS3, SASS, TailwindCSS, Bootstrap
- **Tools & Libraries:** React Query, Apollo GraphQL, Jest, Vitest, Redux, Zustand, Webpack, Vite, Express.js
- **CMS & Platforms:** WordPress, Webflow, Wix
- **DevOps:** Docker, GitHub Actions, Vercel, Netlify, AWS EC2/S3
- **Testing & QA:** Unit Testing, E2E, Integration Testing, CI/CD pipelines
- **Other:** REST APIs, GraphQL, Responsive Design, Component Libraries, Storybook

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Developed a React-based telecom dashboard tailored for managing users and eSIMs across multiple geographies, focusing on low-latency rendering and seamless UX.
- Spearheaded migration from Bootstrap to TailwindCSS, reducing stylesheet bloat by 60% and achieving consistent mobile responsiveness across 200+ screen variations.
- Built internal admin panels and business management tools from scratch using React, Zustand, and REST APIs to support operations across US and LATAM regions.
- Refactored several legacy components using clean architecture principles, leading to 35% improvement in performance benchmarks and faster development velocity.
- Integrated GraphQL endpoints via Apollo Client for dynamic data rendering in usage dashboards, billing UIs, and eSIM activation screens.

- Led frontend efforts for e-commerce modules, integrating Saleor for customizable product catalogs and international checkout flows.
- Mentored junior frontend developers remotely, implementing code review workflows and pairing sessions to ensure consistent delivery quality.
- Introduced unit testing via Vitest with 80%+ coverage for critical UI flows, supporting confident releases and reducing post-deploy issues by 70%.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed multiple landing pages and marketing platforms using React and Webflow with optimized assets for low-bandwidth environments.
- Built lightweight SPAs using Vanilla JS and Tailwind for mobile-first campaign microsites, targeting travelers with personalized promotions.
- Designed and implemented internal analytics dashboards from scratch to track marketing KPIs and campaign performance in real-time.
- Delivered multilingual UIs supporting international users, incorporating i18n support with lazy-loaded content modules.
- Refactored older WordPress codebases into decoupled JAMstack architecture using Headless WP + Next.js for faster load times and scalability.
- Acted as cross-functional lead with designers and backend developers to coordinate frontend delivery across campaign launches.
- Built embeddable widgets and client-side integrations that plugged into third-party apps and partner platforms.
- Integrated Google Analytics and Tag Manager with event tracking for all CTAs, improving attribution for digital marketing spends.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Led end-to-end development of a web-based internal CRM using React and Node.js, serving 3 internal departments with real-time data visibility.
- Built responsive component libraries in pure CSS and later migrated to TailwindCSS for consistency and speed of development.
- Coordinated with backend team to define API schemas and performance thresholds, achieving sub-100ms latency for key workflows.
- Developed progressive web apps for low-connectivity environments using service workers and IndexedDB for offline support.
- Integrated customer support chat via third-party widgets, customizing UI to match brand guidelines across deployments.
- Created reusable data visualization components using D3.js and Chart.js to provide real-time insight into user behavior.
- Maintained code quality using ESLint, Prettier, and enforced git hooks for pre-commit checks, reducing bugs pushed to production.
- Containerized frontend apps using Docker for consistent deployment across dev/staging/prod environments.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Built custom marketing websites using WordPress and integrated CRM lead capture logic with tailored form validation and thank-you flows.
- Delivered several React-based prototypes demonstrating mobile web app interactions for prospective product investors.
- Created reusable widgets using Vanilla JavaScript that were embedded into partner platforms with minimal external dependencies.
- Ensured WCAG compliance across all new builds, improving accessibility and SEO scores.
- Participated in architecture decisions to transition from static pages to React-powered components for landing pages.
- Designed modular UI kits to ensure consistent design implementation by non-tech team members using Webflow.
- Implemented analytics funnels and A/B testing tools across pilot programs to track user conversion behavior.
- Produced marketing animation snippets using Lottie and embedded them dynamically based on region.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in frontend development using HTML5/CSS3/JavaScript for mobile-first internal tools used by logistics teams.
- Helped design internal form builders and simple CMS functionality used by non-technical staff to generate reports.
- Wrote documentation and onboarding guides for new developers joining the frontend and design systems team.
- Built vanilla JS form validation tools with real-time error highlighting and improved input UX for tablet users.
- Implemented first iteration of a responsive layout system using media queries before company moved to Bootstrap.
- Participated in daily standups and sprint grooming sessions, gaining real-world agile development experience.
- Collaborated with backend team to mock data APIs using JSON Server for early frontend prototyping.
- Conducted manual testing for browser compatibility and UI regression issues on legacy Android devices.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ React Developer Certification – Meta (2024)
 - ❖ Advanced TypeScript – Udemy (2023)
 - ❖ TailwindCSS Masterclass – Scrimba (2023)
 - ❖ GraphQL & Apollo Bootcamp – Udemy (2022)
 - ❖ Docker for Developers – Pluralsight (2022)
-

PROJECTS

- ✓ **Global Connect Dashboard**
Custom React app built for internal usage by a telecom provider in LATAM. Included usage tracking, user billing, and device activation. Used Tailwind, GraphQL, React Query.
- ✓ **eSIM Onboarding UI**
Designed and developed a mobile-friendly onboarding web app to activate eSIMs, with dynamic flows based on user location and device.
- ✓ **Low-Bandwidth Companion App**
Progressive web app developed for users in remote areas with limited connectivity. Lightweight build with offline-first caching using service workers.
- ✓ **Component System**
Designed a React + Tailwind component library for consistent styling across products. Included accessibility standards and dark/light modes.
