PROFESSIONAL SUMMARY

Creative and detail-oriented Senior Frontend Developer with over 8 years of experience building robust, user-centric web applications. Proven track record in developing responsive UI components, consuming RESTful APIs, and collaborating with agile teams across Europe. Passionate about crafting scalable solutions that prioritize performance, usability, and maintainability. Excellent communication skills and a strong advocate for clean code, continuous integration, and design system implementation.

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass, Bootstrap, Tailwind CSS
- **UI/UX:** Figma, Adobe XD, Storybook, Responsive Design, Accessibility (WCAG), Component-based Architecture
- **APIs & Backend Integration:** REST APIs, Axios, GraphQL, JSON, Fetch API
- **Testing & Debugging:** Jest, React Testing Library, Chrome DevTools, Postman
- **Tools & DevOps:** Git, GitHub, Bitbucket, Webpack, Vite, NPM, Docker (basic), Agile/Scrum
- **Other:** Redux, Zustand, React Router, Firebase, Git Hooks, CI/CD pipelines

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Developed modular React components and built user interfaces from design specifications using Figma and Storybook, improving design consistency and reducing bugs by 30%.
- Integrated frontend views with REST APIs built by backend teams, handling all error states and improving client-side resilience with retry mechanisms and validation.
- Conducted daily stand-ups, sprint planning, and retrospectives within an Agile team, helping deliver production-ready features bi-weekly with full test coverage.
- Diagnosed and resolved UI and logic bugs in complex form-based and chart-heavy dashboards, reducing customer-reported issues by over 40% in two quarters.
- Optimized large React applications by implementing lazy loading and code splitting, resulting in 45% faster initial page loads across core user flows.
- Worked closely with QA to reproduce edge-case bugs, adding custom test coverage and assisting in automating regression scenarios via unit and integration tests.
- Refactored legacy jQuery components into reusable React units, standardizing architecture and improving maintainability across projects.

- Designed mobile-first responsive interfaces, ensuring compatibility across browsers and devices with pixel-perfect attention to layout and performance.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Created and maintained interactive web applications using JavaScript, HTML5, and CSS3 while collaborating with designers to transform wireframes into intuitive UIs.
- Connected React applications to backend services via RESTful APIs using Axios, managing authentication headers and data state through Redux and React Context.
- Participated in end-to-end agile development processes, contributing to sprint planning and estimation with detailed technical documentation and feature breakdowns.
- Reduced development time by 25% through creation of a reusable UI component library shared across multiple marketing campaigns and platforms.
- Assisted in implementing data dashboards for internal analytics tools, integrating chart libraries and ensuring accessibility and visual clarity.
- Conducted code reviews and provided mentorship to junior developers, encouraging code consistency and use of modern JavaScript practices.
- Fixed high-priority UI issues under tight deadlines, using DevTools and network tracing to isolate performance bottlenecks and improve UX.
- Delivered production-ready releases with post-deployment monitoring and bug fixes based on end-user feedback.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Developed dynamic user interfaces using vanilla JavaScript, jQuery, and CSS transitions, optimizing for browser performance and usability.
- Integrated UI components with RESTful APIs and asynchronous data fetching, handling edge cases and error boundaries for improved reliability.
- Implemented AJAX-based search and filter functionalities in customer-facing dashboards to enable real-time interaction without page reloads.
- Built frontend modules that followed separation-of-concerns principles, reducing tech debt and simplifying future feature enhancements.
- Improved SEO of single-page applications by optimizing metadata, semantic tags, and dynamic content rendering techniques.
- Enhanced responsiveness and layout consistency across devices with media queries and Flexbox/Bootstrap-based grid systems.
- Collaborated closely with UI/UX designers to align interactive features with branding goals, increasing user retention across client portals.
- Used Git for version control and participated in CI/CD pipeline management to streamline deployments and feature rollouts.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Assisted in the design and development of promotional landing pages using HTML, CSS, and JavaScript for time-sensitive digital marketing campaigns.
- Integrated tracking pixels and form logic to collect leads and analytics data while ensuring data compliance and smooth functionality.
- Maintained visual fidelity with Photoshop mockups while ensuring cross-browser consistency through targeted CSS tweaks.
- Debugged CSS issues in Internet Explorer and older Android devices, ensuring compatibility for over 90% of target users.
- Worked in a fast-paced agency environment delivering multiple front-end assets for concurrent client projects.
- Implemented lightweight animation using CSS3 and JS to improve interactivity on static pages.
- Created responsive layouts optimized for mobile and tablet usage with minimum resource overhead.
- Used Gulp and NPM scripts to automate build and asset optimization for HTML pages and stylesheets.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Contributed to early-stage development of internal web tools, primarily focusing on UI mockups and prototyping using JavaScript and Bootstrap.
- Collaborated with mentors to understand API documentation and wrote frontend integration code with backend RESTful services.
- Gained hands-on experience in debugging layout and script issues using Chrome DevTools and Firefox Inspector.
- Implemented user interface improvements based on usability testing, enhancing the navigability of internal forms and data tables.
- Used Git and GitHub for version control and pull requests, learning team collaboration workflows.
- Applied knowledge of semantic HTML and responsive design to real-world projects under supervision.
- Maintained documentation for small projects and participated in stand-up meetings for progress updates.
- Conducted basic QA testing and reported front-end bugs for continuous improvement cycles.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ Meta Front-End Developer Professional Certificate – Coursera
 - ❖ JavaScript Algorithms and Data Structures – freeCodeCamp
 - ❖ Responsive Web Design Certification – freeCodeCamp
 - ❖ Agile Development Specialization – University of Virginia
-

PROJECTS

- ✓ **Client Portal Interface Redesign (Sensidev)**
Led the UI overhaul of an internal client management tool using React, Figma, and REST APIs. Introduced modular components and responsive design, resulting in 40% improvement in user task completion rates.
- ✓ **Marketing Dashboard (Syscom Digital)**
Developed a marketing performance dashboard displaying real-time data via REST APIs, charts, and dynamic filters. Designed reusable components and collaborated with backend team to improve data latency by 60%.
- ✓ **Landing Page Generator Tool (Soft Build)**
Built a reusable template engine for marketing teams to quickly generate landing pages. Included drag-and-drop blocks, live previews, and exportable HTML/CSS bundles.
