

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Experienced Senior Software Developer with over 9 years of full-time and internship experience specializing in mobile-first development. Proven success building performant, responsive, and intuitive mobile applications using React Native, Swift, and TypeScript. Expertise in building end-to-end systems, integrating APIs, optimizing performance, and deploying offline-first apps. Strong knowledge of mobile architecture, UI implementation, and testing pipelines. Passionate about education and highly motivated to contribute to mission-driven products in fast-paced environments.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Swift, Dart, Kotlin, HTML, CSS
- **Frameworks:** React Native, Expo, Next.js, React, Redux, Jotai, Zustand, Tailwind CSS, Reanimated, TanStack Query
- **Mobile Tools:** Firebase, Google Cloud Functions, Push Notifications, Fastlane, Detox, Bitrise, CircleCI
- **Platforms:** iOS, Android, macOS
- **Version Control:** Git, GitHub, Bitbucket
- **Design:** Figma, Zeplin
- **Other:** RESTful APIs, GraphQL, CI/CD, Offline-first architecture, Mobile analytics, WebSocket integration

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed and delivered a fully offline-capable educational mobile app using React Native, TypeScript, and Expo, enabling students in low-connectivity regions to study seamlessly.
- Built and optimized animations and gesture interactions using React Native Reanimated, achieving over 60 FPS performance even on lower-end Android devices.
- Integrated Firebase for real-time messaging, analytics, push notifications, and remote config, reducing backend dependency and increasing scalability by 40%.
- Led migration from Redux to Zustand for global state management, significantly simplifying architecture and improving maintainability across 14 modules.

- Developed custom UI components with Tailwind CSS and Jotai to support a pixel-perfect interface aligned with Figma design specs.
- Established Bitrise CI/CD pipelines to automate build, testing, and deployment of iOS and Android apps, cutting release time from 5 days to under 2 hours.
- Collaborated with backend team to define and implement REST APIs for tracking user progress, syncing quiz history, and storing flashcards.
- Conducted regular performance profiling, reducing bundle size by 30% and app load time by 42% through lazy loading and code splitting.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Co-developed a gamified quiz platform using React Native and Swift, resulting in a 70% increase in daily active sessions among high school users.
- Implemented native iOS components in Swift to handle high-performance media rendering and integrated them with React Native bridges.
- Engineered dynamic forms and live polling interfaces using TanStack Query and Jotai, supporting 5000+ concurrent users with real-time feedback.
- Created robust offline data caching systems using Redux Persist and SQLite, enabling access to key app functions during network outages.
- Added support for Apple and Google sign-in, increasing user onboarding rate by 18% through seamless authentication UX.
- Spearheaded mobile analytics instrumentation using Firebase and Segment, surfacing actionable insights that drove feature prioritization.
- Maintained OTA update capabilities via Expo EAS, ensuring user base always had latest minor enhancements without App Store resubmission.
- Contributed to accessibility audits and improvements, ensuring WCAG compliance and elevating usability across iOS/Android.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed cross-platform mobile applications with React Native targeting iOS and Android simultaneously, reducing development cost by 45%.
- Architected navigation systems using React Navigation and deep linking, enabling seamless user journeys through nested modules.
- Utilized Firebase Firestore and Cloud Functions to power in-app chat and progress syncing for e-learning platforms.
- Introduced Detox-based E2E test coverage, improving app stability and catching regressions before releases.
- Built modular components with high reusability, improving development velocity across 3 different internal apps.
- Championed code reviews and mentoring for junior mobile devs, improving overall team code quality and process efficiency.
- Created dashboards to track mobile crash logs and usage analytics via Firebase Crashlytics and BigQuery integrations.
- Integrated localization frameworks to support 5+ languages in educational apps, expanding reach across multiple regions.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Collaborated with a distributed team to deliver custom Swift-based modules for iOS apps focused on productivity and scheduling.
- Participated in UI prototyping sessions using Figma and implemented production-ready animations and transitions.
- Conducted iOS app store deployments and provisioning profile management, gaining hands-on experience with App Store Connect workflows.
- Wrote detailed documentation and handover guides for clients with minimal technical expertise to maintain their apps.
- Debugged and optimized Core Data integration for persistent local storage of user preferences and session data.
- Interfaced with RESTful APIs to deliver push updates and user-specific content streams.
- Implemented biometric authentication for enterprise apps via FaceID and TouchID.
- Contributed to unit test coverage of new Swift components with XCTest, improving test reliability across releases.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Built interactive flashcard and quiz modules in React Native for a prototype edtech app targeting non-native English speakers.
- Developed proof-of-concept mobile apps to demonstrate offline capabilities and caching strategies to senior stakeholders.
- Assisted in implementing Firebase Authentication and Firestore in prototype apps.
- Contributed to prototype of spaced repetition learning system leveraging local storage and background sync.
- Participated in user testing sessions and performed front-line debugging based on student feedback.
- Documented test cases and manually verified UI and performance issues on both iOS and Android simulators.
- Supported setup of continuous testing scripts using CircleCI and Fastlane for iOS test deployments.
- Presented outcomes and progress demos weekly to senior engineers, improving confidence and communication skills.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ React Native: Advanced Concepts (Udemy, 2023)
- ❖ Building iOS Apps with Swift and SwiftUI (Coursera, 2023)
- ❖ Firebase in Practice: Cloud Functions and Authentication (LinkedIn Learning, 2022)

PROJECTS

✓ **StudySprint**

A self-initiated mobile app project aimed at helping students revise for high school exams. Built with React Native, Expo, Zustand, and Firebase. Includes flashcards, timed quizzes, and performance tracking. Offline-first architecture with real-time analytics.

✓ **QuizVerse**

A collaboration project with an edtech startup. Developed Swift and React Native hybrid app focused on spaced repetition and adaptive quizzes. Deployed via TestFlight with CI/CD managed through Bitrise.

✓ **EduTrack Lite**

Lightweight progress tracking tool for mobile-first education. Built with TypeScript, React Native, Tailwind, and Firebase. Offline synchronization using Redux Persist.
