

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative and detail-oriented Senior Software Developer with 8+ years of experience in mobile and web app development. Specialized in React Native, TypeScript, and scalable cross-platform architecture. Strong background in accessibility-first design, performance optimization, and CI/CD integration. Proven success in developing secure, responsive, and production-grade applications across diverse industries.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, React Native, React, Expo, HTML5, CSS3, D3.js, Node.js
- **Mobile Development:** iOS (Xcode), Android (Gradle), Biometric Auth, Accessibility (VoiceOver, TalkBack)
- **State Management:** Redux, Context API, Zustand
- **DevOps & Tools:** Azure DevOps, GitHub Actions, Storybook, Figma, Postman, JMeter
- **Testing:** Jest, React Native Testing Library, E2E with Detox
- **Security:** OAuth2, Azure B2C, Root/Jailbreak Detection
- **Backend Familiarity:** REST APIs, .NET Core, GraphQL
- **Visualization:** Custom SVG, D3.js
- **Others:** Jira, Agile/Scrum, CI/CD pipelines, Docker, Git

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Built and maintained a high-performance React Native application using Expo for cross-platform delivery with full offline-first capabilities and biometric authentication.
- Designed and developed scalable, accessible UI components in TypeScript, leveraging Storybook and design tokens to align with enterprise-level design systems.
- Debugged and resolved platform-specific issues across iOS (Xcode) and Android (Gradle), optimizing bundle size and launch speed.
- Integrated remote web content and hybrid web views using secure iframe management within native shells.
- Developed rich SVG-based D3.js visualizations to represent real-time analytical data for end users.
- Implemented authentication flows with Azure AD B2C, managing secure token storage, refresh logic, and biometric encryption.

- Led implementation of accessibility compliance using tools like TalkBack, VoiceOver, and Accessibility Inspector.
- Wrote unit and integration tests with Jest and Detox, integrated with GitHub Actions and Azure DevOps pipelines.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed modular and reusable mobile interfaces in React Native with focus on performance, localization, and accessibility.
- Implemented animations and transitions using React Native Reanimated to enhance UX while maintaining 60fps across views.
- Worked on custom chart components using D3.js and integrated them into business dashboards.
- Managed OAuth2 authentication using Microsoft identity platform and ensured compliance with enterprise security policies.
- Maintained CI/CD pipelines in Azure DevOps, reducing deployment time by 40% through pipeline optimization and artifact caching.
- Built multiple custom native modules to integrate third-party SDKs into React Native apps.
- Collaborated with QA to define test scenarios and maintain test coverage using React Native Testing Library.
- Participated in sprint planning, backlog grooming, and release management under Agile methodology.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Engineered mobile applications using React Native and Redux for both consumer and enterprise clients.
- Converted high-fidelity Figma designs into responsive React Native layouts using flexbox and design tokens.
- Implemented native-like gesture handling and navigation via React Navigation and Gesture Handler.
- Built secure mobile forms with validation and encrypted data storage for compliance-heavy domains.
- Integrated apps with .NET Core backend APIs and handled error boundaries and fallback UIs.
- Led onboarding of Storybook for component development, improving team velocity by 25%.
- Participated in root/jailbreak detection and secure storage for sensitive medical application.
- Resolved complex issues related to Android memory leaks and slow performance on low-end devices.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Maintained hybrid mobile apps using Cordova and transitioned legacy codebase to React Native.
- Built initial proof-of-concept apps to demonstrate cross-platform capability using Expo and D3.js.
- Helped implement OAuth flows and token lifecycle management across web and mobile clients.
- Contributed to early accessibility support using semantic roles and accessible touch targets.
- Participated in writing shell scripts for automated builds and deployment pipelines.
- Documented system architecture and onboarding guides for future mobile engineers.

- Created interactive map visualizations embedded within mobile views.
- Ensured pixel-perfect UI match with client-provided mockups using grid and layout inspection tools.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Developed internal tools using JavaScript and HTML5 to automate testing of mobile apps.
 - Created lightweight mobile dashboards using D3.js for real-time device data visualization.
 - Assisted in translating wireframes into functional mobile UI components.
 - Debugged mobile layouts across iPhone and Android simulator environments.
 - Automated testing of mobile features using Jest and manual QA scripts.
 - Participated in sprint reviews and wrote documentation for reusable components.
 - Built forms with dynamic validation and error highlighting logic.
 - Designed onboarding tutorials using animated SVGs embedded in React Native.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ Certified React Native Developer – Udacity (2022)
 - ❖ Mobile Web Specialist – Google Developers (2021)
 - ❖ Microsoft Certified: Azure Developer Associate (2023)
-

PROJECTS

- ✓ **Global Health Monitor App:** Built a cross-platform app in React Native with biometric login and offline capabilities used by healthcare workers across 15 countries.
- ✓ **Secure Finance Tracker:** Developed a privacy-first budgeting app using Azure B2C, biometric auth, and D3.js visualizations with a focus on accessibility and secure UX.
- ✓ **Design System Library:** Led frontend initiative to build a design system with Storybook, shared tokens, and accessibility-first components adopted across 4 products.
