

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Experienced and versatile Senior Software Engineer with over 9 years of hands-on experience in designing, developing, and deploying robust, scalable web applications. Proficient in Ruby on Rails, Hotwire, Tailwind CSS, and modern frontend tooling, with deep expertise in full-stack development, cloud platforms (AWS, GCP), and clean code architecture. Proven ability to thrive in small, agile teams and startup environments, driving innovation and quality with a passion for collaboration and long-term maintainability.

TECHNICAL SKILLS

- **Languages & Frameworks:** Ruby, Ruby on Rails (v8+), JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Hotwire (Turbo + Stimulus), Tailwind CSS, React, Node.js
- **Backend & APIs:** RESTful APIs, JSON, GraphQL, PostgreSQL, MySQL, Redis, Firebase, MongoDB
- **Cloud & DevOps:** AWS (EC2, S3, RDS, Lambda), Google Cloud Platform (GCP), Heroku, Docker, GitHub Actions, CI/CD
- **Testing & QA:** RSpec, Capybara, Minitest, FactoryBot, Jest, Cypress
- **Tools:** Git, Figma, Jira, GitLab, Postman, VS Code, Webpack, Vite
- **Databases:** SQL, NoSQL (MongoDB, Firestore)
- **Other:** Agile/Scrum, Microservices, TDD, Clean Code, Performance Optimization

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed and developed a custom SaaS platform using Ruby on Rails, Hotwire, and Tailwind CSS to streamline operations for logistics clients, improving throughput by 42%.
- Led a 3-person agile engineering squad, owning end-to-end feature delivery with full CI/CD automation, code reviews, and continuous performance improvements.
- Re-architected legacy systems by modularizing components into service-oriented microservices using Rails Engines and PostgreSQL partitions.
- Integrated real-time broadcasting via Turbo Streams, ensuring live updates for dashboards and notifications without manual refreshes.
- Spearheaded test-driven development (TDD) culture by implementing RSpec and FactoryBot, achieving 95% code coverage and zero regression during weekly sprints.

- Migrated infrastructure from Heroku to AWS, optimizing costs and improving deployment speed through Docker and GitHub Actions.
- Collaborated closely with UI/UX team using Figma and translated designs into fully responsive views using Tailwind CSS.
- Mentored two junior engineers in Ruby idioms, test practices, and clean architecture principles, enhancing team skill maturity.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Built full-stack promotional campaign engines and real-time analytics dashboards using Ruby on Rails, Stimulus.js, and PostgreSQL.
- Designed and implemented custom Hotwire-based components for seamless single-page experiences, reducing client-side complexity by 30%.
- Enhanced multi-tenant support in the admin system using PostgreSQL schemas and flexible authorization roles.
- Introduced automated database backups and system health monitoring with AWS CloudWatch, S3, and RDS snapshot schedules.
- Developed internal design system using Tailwind CSS and componentized layouts, which reduced design inconsistencies across the product.
- Contributed to large refactoring initiative replacing jQuery dependencies with Stimulus controllers and custom JS modules.
- Built RESTful APIs for mobile app integrations and third-party CRM systems, supporting over 100k active users monthly.
- Participated in roadmap planning, providing technical estimates and ensuring alignment between product and engineering teams.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Delivered over 12 client-facing web platforms using Ruby on Rails with slim templates, modular partials, and custom Tailwind utility layers.
- Developed dynamic content rendering pipeline using Rails view components, reducing redundant logic and improving reusability across projects.
- Conducted performance audits and applied indexing and eager-loading strategies that decreased page load times by 60% on average.
- Led the implementation of role-based access control (RBAC) using Pundit and Devise, increasing system security.
- Integrated Stripe, PayPal, and third-party booking systems, enabling scalable monetization workflows.
- Oversaw release cycles and coordinated staging-to-production deployments across GCP and Heroku stacks.
- Researched and deployed Firebase for real-time sync in a property management dashboard with mobile clients.
- Co-led weekly pair-programming and retrospectives to foster team collaboration and reduce bottlenecks.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Maintained and enhanced e-commerce backend solutions using Rails 5, Spree Commerce, and PostgreSQL.
- Implemented background jobs with Sidekiq and Redis to optimize media processing and order lifecycle updates.
- Conducted security patching and updates following OWASP best practices.
- Migrated legacy features from PHP to Ruby on Rails with detailed performance benchmarks and rollback plans.
- Supported UI migration from Bootstrap 3 to Tailwind CSS with updated templates and component strategy.
- Built reusable form components with dynamic validations and file upload support.
- Created automated data import tools with ActiveJob and AWS S3 triggers for large catalog ingestion.
- Participated in daily stand-ups and sprint planning to track delivery goals with the team lead.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in development and maintenance of internal CRM built with Ruby on Rails 4 and MySQL backend.
- Created unit and integration tests using Minitest and Capybara, improving test reliability across branches.
- Implemented caching strategies using Rails fragment caching and Redis for dashboard optimization.
- Built analytics widgets displaying KPI charts and activity heatmaps with Chart.js and dynamic queries.
- Developed backend logic for user authentication, password recovery, and email verification workflows.
- Participated in code reviews and implemented improvements suggested by senior developers.
- Worked closely with QA to resolve bugs and deployment issues in a test-driven environment.
- Explored deployment pipelines using Capistrano and Git hooks to support staging workflows.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- **AWS Certified Developer – Associate**
- **Google Cloud Digital Leader**
- **Advanced Ruby Programming – Codecademy**
- **PostgreSQL for Developers – Udemy**
