PROFESSIONAL SUMMARY

Seasoned Fullstack Developer with 9+ years of hands-on experience in building and maintaining scalable web applications, with deep expertise in Ruby on Rails, JavaScript, PostgreSQL, REST APIs, and Git-based collaboration. Proven track record of delivering high-impact projects in fast-paced agile environments, contributing to full software lifecycles, and driving client-centric digital transformations. Adept at solving complex problems, working cross-functionally, and delivering innovative, high-quality solutions aligned with modern development practices.

TECHNICAL SKILLS

- **Languages & Frameworks:** Ruby, Ruby on Rails, JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass
- **Frontend:** React.js, Vue.js, Tailwind CSS, Bootstrap, jQuery
- **Backend:** Ruby on Rails, Node.js, Express.js, RESTful API design, MVC architecture
- **Databases:** PostgreSQL, MySQL, SQLite, MongoDB
- **Tools & DevOps:** Git, GitHub, GitLab, Bitbucket, CI/CD, Docker, Webpack, Nginx
- **Testing:** RSpec, Jest, Mocha, Capybara, Cypress
- **Others:** Agile/Scrum, Jira, Trello, Figma, JSON, JWT, OAuth

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led development of backend services and RESTful APIs using Ruby on Rails to support scalable web applications for fintech and e-commerce clients.
- Integrated PostgreSQL for complex schema management and data optimization in multi-tenant environments.
- Collaborated with frontend engineers to deliver seamless UI/UX using HTML5, SCSS, and vanilla JavaScript.
- Developed CI/CD pipelines and implemented Git-based workflows across teams to ensure robust version control and continuous delivery.
- Mentored junior developers in Ruby on Rails best practices, improving team velocity and code maintainability.

- Implemented API integrations with third-party services including Stripe, Twilio, and SendGrid, improving customer engagement workflows.
- Participated in agile sprints, leading estimation, refinement, and technical decision-making.
- Optimized legacy code and database queries, reducing page load time by 35% across key application views.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Built and maintained full-stack Ruby on Rails applications integrated with PostgreSQL and dynamic JS frontends.
- Designed scalable database models and optimized queries for marketing analytics and reporting dashboards.
- Created responsive UIs using HTML5, CSS3, and Vue.js to ensure compatibility across modern browsers.
- Developed custom RESTful endpoints for internal tools and mobile app backends using clean architecture principles.
- Wrote unit and integration tests using RSpec and Capybara to improve code reliability and test coverage.
- Spearheaded the Git workflow process including PR reviews and GitLab merge strategies across distributed teams.
- Assisted product managers in defining technical requirements and scope feasibility.
- Contributed to deployment automation using shell scripts and Docker to streamline releases.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Delivered multiple Rails applications with RESTful architectures and PostgreSQL databases for SaaS platforms.
- Developed admin dashboards with full CRUD functionalities and authentication using Devise and CanCanCan.
- Built frontend views using ERB, Slim, and JavaScript, following mobile-first responsive design principles.
- Conducted code reviews, introduced Git branching models, and onboarded junior hires into the development stack.
- Created background job processing with Sidekiq and Redis for performance-heavy tasks.
- Collaborated with QA to implement integration and acceptance tests, achieving over 85% test coverage.
- Developed custom email notification services with ActionMailer and Mailgun integration.
- Migrated legacy MySQL schemas to PostgreSQL, improving data consistency and integrity.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Assisted in modernizing internal tools using Ruby on Rails and JavaScript for client delivery pipelines.
- Developed interactive web components using jQuery and AJAX for improved user interaction.

- Collaborated with designers to translate wireframes into functional UI modules with HTML/CSS.
- Created RESTful APIs for integrating third-party services into internal CMS tools.
- Refactored legacy PHP codebase into modular Ruby services improving testability and security.
- Supported MySQL optimization tasks and implemented automated SQL backups.
- Conducted manual and automated QA using Selenium scripts.
- Participated in daily stand-ups, grooming, and code planning sessions.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Contributed to development of internal CRM modules using Ruby and ERB templates.
 - Assisted in database modeling and migrations for client profiles and workflows using PostgreSQL.
 - Created UI layouts and forms in HTML5 and styled with CSS3 and basic Bootstrap grid system.
 - Wrote unit tests using MiniTest to validate core functionalities of the system.
 - Helped document internal APIs and maintained change logs for version control.
 - Gained exposure to agile development cycle and collaborative Git practices.
 - Worked on bug fixing and debugging tasks as assigned by senior developers.
 - Created knowledge base entries to support onboarding and dev process documentation.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ Ruby on Rails 6 Web Development (Udemy)
 - ❖ Full Stack Web Development with Ruby on Rails (Coursera – Johns Hopkins University)
 - ❖ PostgreSQL for Developers (Pluralsight)
 - ❖ Git Advanced Workflow & Version Control (LinkedIn Learning)
-

PROJECTS

CRM Dashboard for Insurance Aggregator

- Fullstack system built in Ruby on Rails and PostgreSQL with dynamic charts powered by Chart.js and AJAX interactions.
- Integrated REST APIs from multiple third-party services including policy providers, user verification, and payment gateways.

Internal DevOps Tool for Remote Teams

- A productivity suite with a Rails backend and Vue.js frontend for managing deployment tasks, CI builds, and team notifications.

Multi-Tenant Survey Platform

- Developed from scratch using Rails, PostgreSQL, and Stimulus.js, supporting customizable form templates, reporting, and email automation.
