

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative and detail-oriented Senior Software Developer with 8+ years of hands-on experience crafting responsive, accessible, and high-performance frontend solutions across eCommerce and digital platforms. Passionate about SFCC development, pixel-perfect UI/UX integration, and building scalable frontend architectures with HTML5, CSS3, JavaScript, and preprocessors like Sass. Eager to contribute expertise in SFCC, SEO, accessibility, and modern build tools to deliver top-tier solutions for a digital agency committed to quality and innovation.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), SFCC (Salesforce Commerce Cloud), Handlebars, EJS, Bootstrap, TailwindCSS
- **Preprocessors & Styling:** Sass, LESS, BEM methodology, PostCSS, Styled Components
- **Tooling:** Gulp, Grunt, Webpack, Vite, npm, Yarn, Babel
- **Frameworks & Libraries:** React, jQuery, Alpine.js
- **CMS & Ecommerce:** Salesforce Commerce Cloud (SFRA), WordPress, Magento
- **Testing & Debugging:** Chrome DevTools, Firebug, Lighthouse, BrowserStack
- **Performance & Accessibility:** SEO, WAVE, aXe, Lighthouse, Responsive Web Design
- **Cloud & Databases:** AWS, GCP, Firebase, MongoDB, PostgreSQL, MySQL
- **Version Control:** Git, GitHub, GitLab, Bitbucket
- **Design:** Adobe Photoshop, Figma, Zeplin, Adobe XD
- **Soft Skills:** Agile (Scrum, Kanban), TDD, Pair Programming, UX Collaboration

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Transformed complex Figma mockups into pixel-perfect, mobile-first HTML/CSS templates integrated into Salesforce Commerce Cloud frontend architecture using SFRA framework.
- Engineered responsive SFCC storefronts by applying custom SASS structures and ensuring cross-browser compatibility across Chrome, Safari, Edge, and Firefox.
- Partnered with UX and graphic designers to convert design concepts into robust HTML5/CSS3 layouts, supporting progressive enhancement principles and graceful degradation.

- Refactored large CSS codebases into modular Sass structure improving maintainability, performance, and readability by leveraging BEM naming and Gulp pipelines.
- Implemented Gulp/Grunt automation scripts for compiling, minifying, and linting code while optimizing image assets and enforcing coding standards across the team.
- Performed accessibility audits and updates to ensure ADA and WCAG 2.1 compliance across all public-facing digital commerce pages.
- Built dynamic JS components integrated with third-party analytics and personalization tools, improving page interactivity and client engagement rates.
- Optimized frontend rendering pipeline, achieving Lighthouse performance score improvements from 72 to 95+ by minimizing layout shifts and reducing blocking resources.
- Led technical documentation initiatives for frontend build pipelines, component libraries, and style guide standards within agile delivery sprints.
- Mentored junior developers in frontend best practices and SFCC templating, leading to accelerated onboarding and quality output.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Built custom landing pages, email templates, and microsites for high-traffic marketing campaigns using semantic HTML5 and optimized CSS3.
- Developed component-based reusable modules with LESS preprocessor and grid systems, improving productivity for future campaign deliveries.
- Collaborated closely with the QA team to debug client-side code via Chrome DevTools and legacy Firebug setups, ensuring zero regression bugs pre-deployment.
- Crafted optimized media queries for consistent rendering across iOS and Android platforms using device emulators and cross-browser QA tools.
- Integrated Adobe XD and Photoshop designs into hand-coded, scalable UI components with a strong focus on performance and maintainability.
- Contributed to SEO optimization tasks including proper HTML semantics, heading hierarchy, meta tag enhancements, and lazy loading of assets.
- Applied JavaScript enhancements and event listeners to add dynamic behavior to campaign pages without relying on bulky frameworks.
- Assisted in migration of legacy CSS and inline HTML code to modular, BEM-compliant Sass architecture across multiple web properties.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed ecommerce templates using HTML5/CSS3 within CMS environments and integrated them with third-party payment and shipping APIs.
- Ensured pixel-perfect alignment of layouts by inspecting design handoffs and utilizing tools like Zeplin and BrowserStack for QA across devices.
- Leveraged Gulp.js to streamline build processes, compile Sass, autoprefix CSS, and automate minification and deployment pipelines.
- Applied accessibility improvements to ensure screen reader compatibility and keyboard navigability across major site sections.
- Led frontend code reviews and introduced styling conventions to standardize markup quality across teams.
- Created interactive product sliders, tabbed content, and modals using vanilla JS and jQuery with graceful fallback strategies.
- Tuned performance using lazy-loading strategies, sprite sheets, and resource inlining techniques.

- Delivered engaging user experiences by leveraging parallax effects, animations, and transitions optimized for mobile-first usage.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Assisted in developing custom ecommerce pages using SFCC pipelines and ISML templates while learning the SFCC architecture and controller flows.
- Created frontend components adhering to brand style guides and using Adobe Photoshop files as a reference for slicing and styling.
- Built prototype templates for A/B testing campaigns, integrating tracking pixels and analytics into HTML structure.
- Worked closely with backend developers to ensure dynamic content rendering via JSON endpoints into pre-built templates.
- Validated frontend changes via staging environments and client acceptance criteria within tight agile deadlines.
- Maintained style uniformity using consistent spacing, typography, and color schemes defined in design documentation.
- Investigated browser-specific issues in Internet Explorer 11 and applied polyfills or graceful fallbacks to maintain usability.
- Supported ongoing QA testing for multilingual layouts, ensuring proper RTL/LTR rendering and locale formatting.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Gained foundational skills in hand-coding HTML, CSS, and JS to create promotional websites for startup clients.
- Practiced responsive design principles by converting PSD mockups into fluid, device-friendly web layouts using grid systems.
- Applied LESS preprocessing to reduce style duplication and streamline code maintenance across multiple templates.
- Learned JavaScript fundamentals and enhanced user experience with simple sliders, modals, and form validation.
- Participated in weekly code reviews and QA testing efforts to improve quality assurance workflows.
- Enhanced site performance through image compression techniques and deferred JS loading strategies.
- Shadowed senior developers in debugging and client walkthrough sessions, learning agile collaboration and documentation.
- Delivered internal wiki documentation for reusable HTML blocks and onboarding notes for new interns.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ **Salesforce B2C Commerce Developer** (*expected*)
 - ❖ **Responsive Web Design** – freeCodeCamp
 - ❖ **Advanced JavaScript Concepts** – Udemy
 - ❖ **Front-End Web UI Frameworks and Tools: Bootstrap 4** – Coursera
 - ❖ **Google Cloud Fundamentals: Core Infrastructure** – Google
 - ❖ **AWS Cloud Practitioner Essentials** – Amazon Web Services
-

PROJECTS

- ✓ **SFCC Clothing Storefront** – Custom Salesforce Commerce Cloud storefront with interactive filters, search autocomplete, and promotional banners. Used ISML templates, SFRA, and Gulp build system.
- ✓ **Mobile-First Travel Blog** – Fully responsive travel blog theme using SCSS, lazy loading, and mobile optimization practices.
- ✓ **Ecommerce A/B Testing Platform** – Created modular HTML/CSS/JS components to serve different versions for analytics-driven UX testing.
