

# CRISTOFF STAN

## Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com  
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

## PROFESSIONAL SUMMARY

Seasoned front-end engineer with over 8 years of professional experience building robust, high-performance user interfaces across Smart TVs, set-top boxes, and streaming devices. Specialized in React-based OTT (Over-The-Top) application development, with expertise in optimizing UI/UX for memory-constrained devices and remote navigation. Adept in asynchronous data handling, cross-platform debugging, and building immersive TV experiences. Proven ability to work within remote cross-functional teams, collaborating closely with designers, backend engineers, and product owners to deliver compelling entertainment solutions.

## TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, React.js, React Native, Redux, HTML5, CSS3, Styled Components
- **TV & OTT Platforms:** Samsung Tizen, LG webOS, Android TV, Apple TV, Roku, Chromecast
- **Streaming & Media:** HLS, MPEG-DASH, DRM, ExoPlayer, Shaka Player
- **Tools & Utilities:** Git, Webpack, Babel, Jenkins, ESLint, Prettier, Chrome DevTools, TV emulators
- **CI/CD & DevOps:** Docker, GitHub Actions, Bitrise, Firebase
- **Other:** TV Remote UX Optimization, Cross-device Testing, Accessibility, Performance Profiling

## WORK EXPERIENCE

### Senior Software Engineer

#### Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Engineered Smart TV applications using React.js for LG webOS and Samsung Tizen that streamed live and VOD content to thousands of daily viewers.
- Implemented remote navigation logic and focused state management to ensure intuitive user experiences using standard TV remotes.
- Integrated DRM-enabled HLS and MPEG-DASH streams, optimizing playback performance on low-memory devices.
- Collaborated with backend engineers to consume GraphQL and REST APIs, implementing efficient asynchronous data flows.
- Led the refactoring of legacy video player modules to support adaptive streaming and subtitle rendering.

- Conducted cross-platform performance testing on physical TVs, emulators, and set-top boxes, resolving hardware-specific issues.
- Built custom UI components adhering to TV UX constraints, ensuring smooth animations and low input lag.
- Spearheaded the transition to a CI/CD pipeline using GitHub Actions and Bitrise for build automation and release workflows.

## **Software Engineer**

### **Syscom Digital**

**October 2019 – August 2021**

Bucharest, Romania (Remote)

- Developed interactive video streaming applications with React and Redux for Android TV and Apple TV platforms.
- Integrated media playback libraries supporting HLS and MPEG-DASH with custom video controls and analytics tracking.
- Partnered with UX teams to adapt designs for large screen sizes, ensuring compliance with TV interface guidelines.
- Optimized application boot time and memory usage using lazy loading and code-splitting techniques.
- Maintained cross-platform compatibility and implemented device-specific feature toggles.
- Collaborated with QA to automate tests for remote control navigation using Jest and testing-library/react.
- Implemented accessibility features including high contrast mode and screen reader support.
- Researched emerging trends in OTT streaming technologies and recommended improvements to stakeholders.

## **Software Developer**

### **Soft Build**

**June 2016 – July 2019**

Timișoara, Romania (Remote)

- Created multi-platform video delivery interfaces for set-top boxes using React and custom JavaScript frameworks.
- Integrated dynamic ad-insertion APIs into OTT video players and ensured compliance with broadcast policies.
- Designed responsive UIs with flexible grid layouts optimized for 720p/1080p TV resolutions.
- Migrated legacy UI codebases to modern React architecture while ensuring feature parity.
- Enhanced performance by rewriting render-heavy components and deferring non-critical API calls.
- Conducted code reviews and mentored junior developers on best practices for front-end performance.
- Implemented real-time error tracking with Sentry and created dashboards for performance metrics.
- Wrote device-specific fallbacks and polyfills to ensure consistent functionality across TV platforms.

## **Software Developer**

### **Decima Digital**

**November 2015 – April 2016**

Tallinn, Estonia

- Built proof-of-concept TV interfaces using HTML5 and JavaScript for early-stage media projects.
- Participated in usability testing on prototype apps with real users on LG Smart TVs and Apple TV.
- Created libraries for remote key input detection, focus state tracking, and dynamic menu navigation.
- Supported integration of CDN-based streaming with failover handling and fallback assets.
- Collaborated with visual designers to ensure pixel-perfect implementation across screens.
- Assisted in the development of UI state synchronization logic using finite state machines.

- Tuned video startup times by preloading assets and using efficient buffering strategies.
- Worked closely with clients to gather feedback and iterate on UI concepts.

## Software Developer Intern

### Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Developed a simple OTT video player as part of a final year project, laying foundation for Smart TV work.
- Implemented playlist handling and user authentication in a modular front-end stack.
- Created RESTful API integrations for video content metadata and user sessions.
- Participated in Agile sprint planning and demoed MVP releases to internal stakeholders.
- Learned principles of TV UX design, memory profiling, and responsiveness for TV hardware.
- Performed testing on Android TV emulators and manually validated on Chromecast.
- Assisted in QA automation with Selenium and documented testing results.
- Delivered weekly reports on learning outcomes and code performance metrics.

---

## EDUCATION

### Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

---

## CERTIFICATIONS

- ❖ OTT Video Engineering Masterclass – Streaming Video Alliance, 2023
- ❖ React Native for TV Platforms – Pluralsight, 2022
- ❖ Front-End Performance Optimization – Udacity Nanodegree, 2021

---

## PROJECTS

- ✓ **Cross-Platform Smart TV Player (2023)**  
Built a unified React-based codebase supporting Samsung Tizen, LG webOS, and Android TV with adaptive UI, focus management, and streaming APIs.
- ✓ **Low-Latency Sports Streaming App (2022)**  
Developed a high-performance TV app for live sports streaming using HLS with low-latency support, player event tracking, and DRM integration.
- ✓ **Modular OTT UI Library (2021)**  
Created a component library for common OTT UI patterns (carousels, detail pages, remote navigation) reusable across multiple white-labeled platforms.
