

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Experienced Senior Software Engineer with 9+ years of full-stack development expertise, specializing in Angular applications, scalable cloud integration, and component library maintenance. Proven track record in creating accessible, responsive web applications and collaborating across design and engineering teams. Highly proficient in AWS, GCP, SQL, NoSQL, and modern CI/CD pipelines. Passionate about performance, security, and delivering high-quality digital experiences through clean, scalable code.

TECHNICAL SKILLS

- **Frontend:** Angular, JavaScript (ES6+), TypeScript, SCSS, Bootstrap, Storybook, HTML5, AEM
- **Backend:** Node.js, PHP, Spring Boot, Java, Python
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, CloudFormation), GCP, Docker, GitHub Actions, GitLab CI/CD
- **Database:** PostgreSQL, MySQL, MongoDB, DynamoDB, Firebase (NoSQL/Realtime DB)
- **Others:** Design Systems, Web Accessibility (WCAG 2.2 AA), REST APIs, Figma, Agile/Scrum

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Migrated legacy AngularJS components to Angular 14+, integrating scalable SCSS-based design tokens in sync with UX-driven design systems.
- Collaborated with design teams to build a design system with atomic components, ensuring pixel-perfect UI across multiple platforms using Storybook.
- Engineered AEM-integrated Angular modules, maintaining parity with backend content models and enabling CMS-driven frontends.
- Integrated AWS services (Lambda, S3, CloudFront) into SPA deployments, reducing time-to-first-byte and improving CI/CD performance.
- Implemented unit/e2e test coverage (Jasmine/Karma) for all reusable components, increasing code reliability and enabling safe iterative development.
- Refactored SCSS architecture into a modular BEM structure to boost styling performance and developer maintainability.
- Worked on cross-browser accessibility compliance using axe-core and manual WCAG 2.2 AA audits, enabling government-grade web accessibility.

- Championed best practices for Angular performance tuning such as lazy loading, OnPush change detection, and code-splitting via Webpack.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Led the front-end revamp of marketing automation tools using Angular and SCSS, enhancing client-side rendering speed and usability.
- Designed and implemented RESTful services consumed by Angular components with OAuth2-secured endpoints built in Spring Boot.
- Established a component library and reusable service layers, enabling seamless onboarding and reducing new project delivery time by 40%.
- Integrated AWS API Gateway and Lambda functions for image processing, paired with S3-hosted outputs, replacing traditional server-based workflows.
- Implemented structured logging and monitoring using AWS CloudWatch and X-Ray to trace API usage and client-side behavior.
- Set up CI/CD workflows in GitLab to automate builds, enforce code linting, and deploy Angular SPAs to cloud storage via versioned releases.
- Maintained full documentation and visual specs with Figma and Storybook to ensure shared understanding across product, design, and QA teams.
- Designed dashboards with real-time charts backed by Firebase Realtime DB and Firestore for client data visualization.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed Angular applications to support a B2B order and inventory system, interfacing with PostgreSQL and Redis-based backend microservices.
- Led accessibility audits and fixes for multiple enterprise web portals to ensure compliance with WCAG 2.1, including ARIA roles and contrast fixes.
- Architected SSR-compatible Angular Universal modules that improved SEO score by 60% for marketing pages.
- Introduced modular build pipelines with Docker and Jenkins, ensuring consistent builds and reproducible deployments across staging/production.
- Built an internal CMS powered by Firebase NoSQL with Angular Material for drag-and-drop page creation and dynamic theming.
- Optimized data-heavy UI tables with virtual scroll, infinite load, and backend pagination resulting in a 3x faster interface under load.
- Collaborated on integrating payment gateways using secure REST APIs with error handling and transaction audit trails.
- Introduced centralized error handling using RxJS operators and Sentry for runtime monitoring and post-deploy debugging.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Delivered modular Angular 2 components for an eCommerce dashboard with custom UI state persistence and multilingual support.

- Built SCSS-powered theming system allowing marketing teams to apply brand-specific styles via config injection.
- Migrated user account flows from jQuery-based pages to Angular-driven modules improving user experience and accessibility.
- Worked with GCP to host static Angular sites on Google Cloud Storage with CDN-backed edge caching for international performance.
- Created client-ready dynamic reports using Angular Charts with async data sources aggregated from SQL and MongoDB endpoints.
- Engineered reusable interceptors for API token refresh, error handling, and global response transformation.
- Participated in A/B testing and optimization loops using integrated event tracking systems for UI features.
- Introduced ESLint and Prettier formatting hooks in CI pipelines to standardize codebase and reduce review cycles.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Supported the frontend team in creating responsive AngularJS modules for a SaaS CRM product.
- Connected Angular views to REST endpoints in a PHP/Laravel backend, using Axios and token-based authentication.
- Improved page load performance by minimizing bundle size and eliminating duplicate third-party library imports.
- Contributed to the development of form wizards and drag-and-drop UIs using custom directives and two-way binding.
- Helped deploy first production-grade Angular app using AWS EC2 and S3 with backup automation via CLI scripting.
- Maintained test cases using Protractor and Karma to ensure component reliability under dynamic content changes.
- Participated in weekly QA audits and accessibility checks to ensure responsiveness and keyboard navigation support.
- Documented onboarding guides and dev setup scripts to improve intern-to-developer transition speed.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ AWS Certified Developer – Associate
- ❖ Google Associate Cloud Engineer
- ❖ Web Accessibility Specialist (IAAP Certified)
- ❖ Angular Advanced Training – Pluralsight ProPath
- ❖ MongoDB for Developers – MongoDB University

PROJECTS

Design System Migration for eCommerce SaaS

- Led the front-end rearchitecture using Angular 14 and SCSS with integration into AEM for CMS-driven layout control and authored components with Storybook documentation.

WCAG 2.2 Compliance Upgrade

- Delivered a major accessibility overhaul for a public-sector application, implementing semantic HTML5, proper ARIA usage, and screen-reader support validated through manual audits and automated tools.

Cloud Native Dashboard for Logistics

- Developed a logistics admin dashboard integrated with AWS Lambda, SQS, and DynamoDB to manage routes, schedules, and real-time status, supporting mobile-first responsive design.
