

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Mobile and full-stack software engineer with 9+ years of experience building scalable, cross-platform applications across iOS, Android, and web ecosystems. Skilled in **Swift, Kotlin, SwiftUI, Android Compose, MVVM/MVI architectures, and hybrid frameworks**. Adept at designing mobile app architecture, implementing CI/CD pipelines, integrating third-party APIs, and delivering cloud-ready solutions using **AWS, GCP, and containerized DevOps workflows**. Recognized for bridging business requirements with technical execution, leading projects from conception to deployment, and delivering high-quality, customer-oriented applications.

TECHNICAL SKILLS

- **Mobile Development:** Swift, SwiftUI, Objective-C, Kotlin, Android Compose, Jetpack, Coroutines, Flow, Combine, Alamofire, Retrofit, Realm, Firebase, Glide, Epoxy, Lottie
- **Architectures:** MVVM, MVC, MVP, MVI, Modular Monoliths, Microservices
- **Backend & APIs:** Node.js, Java, .NET Core, REST, GraphQL, Firebase, Cloud Functions
- **Databases:** PostgreSQL, MySQL, SQL Server, MongoDB, Redis, Firebase Firestore (SQL + NoSQL)
- **Cloud Platforms:** AWS (Lambda, EC2, S3), GCP (Cloud Run, Firestore, BigQuery), Azure
- **DevOps & Tools:** Docker, Kubernetes, Jenkins, GitLab CI/CD, Terraform, Git/GitHub/GitLab, Jira, Figma
- **Other:** Responsive UI, Accessibility, Security Best Practices, Agile/Scrum

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Engineered mobile applications in **iOS (Swift/SwiftUI/Combine)** and **Android (Kotlin/Compose/Flow)**, ensuring adherence to MVVM architecture and integrating advanced third-party libraries like Alamofire, Retrofit, and Firebase.
- Optimized cross-platform workflows by introducing **Kotlin Multiplatform Mobile (KMM)** modules, reducing duplicated code across iOS and Android by 40% and streamlining future hybrid development.
- Led implementation of **CI/CD pipelines** for iOS and Android projects using GitLab CI and Fastlane, enabling automated builds, tests, and deployments to App Store and Google Play.

- Collaborated with designers in Figma and product managers to translate requirements into pixel-perfect, responsive, and accessible user interfaces across mobile platforms.
- Integrated **AWS S3, Firebase Realtime Database, and GCP Firestore** for cloud storage and sync, supporting real-time updates and offline-first capabilities in production apps.
- Enhanced app reliability by introducing **unit testing, snapshot testing, and automated UI testing**, achieving >90% test coverage and drastically reducing post-release bug rates.
- Mentored junior developers in modern iOS/Android practices, including MVVM refactoring, SwiftUI migration, Jetpack Compose adoption, and Git versioning best practices.
- Delivered e-commerce features like payment integrations, order tracking, and push notifications that increased customer retention by 23% across mobile platforms.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed Android applications in **Kotlin with MVVM/MVI** and implemented data flows using Coroutines and Flow, ensuring smooth asynchronous operations for real-time apps.
- Built advanced iOS apps in **Swift with UIKit and SwiftUI**, leveraging Combine for reactive programming and integrating **Alamofire** for optimized API communication.
- Created scalable backend APIs in **Node.js and .NET Core**, integrating with PostgreSQL and MongoDB databases to support mobile app functionalities like chat, analytics, and authentication.
- Integrated third-party SDKs including **Firebase (Auth, Crashlytics, Analytics), Glide for image loading, and Lottie for animations**, enhancing UX performance.
- Migrated legacy Objective-C code to Swift while maintaining backward compatibility, modernizing apps without disrupting end-users.
- Applied **Material Design and Human Interface Guidelines** to ensure consistent design across platforms and compliance with mobile UX standards.
- Introduced mobile app monitoring with **Firebase Performance and GCP Cloud Monitoring**, enabling proactive debugging of production issues.
- Actively participated in Agile ceremonies, collaborating with cross-functional teams on sprint planning, daily standups, and retrospectives to ensure delivery consistency.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Delivered full-stack e-commerce and enterprise apps, with mobile components built in **Kotlin (Android) and Swift (iOS)**, ensuring robust offline sync and push notification support.
- Designed and maintained backend services in Java and .NET, connecting to **SQL Server and PostgreSQL**, handling millions of monthly queries securely.
- Implemented **MVVM and MVP** patterns in mobile applications, ensuring separation of concerns and scalability for complex UI workflows.
- Introduced **Firebase Cloud Messaging and Google Play Services** to support targeted push campaigns, increasing customer engagement for retail apps.
- Created dashboards and admin panels using React for managing mobile app content, order history, and analytics in real time.
- Migrated apps to **Dockerized deployments** and leveraged AWS EC2 for hosting backend microservices that supported mobile clients.
- Partnered with QA teams to execute manual and automated tests across mobile platforms, reducing crash rates by 35% over 18 months.
- Documented architecture, workflows, and API usage, contributing to knowledge sharing and onboarding materials that accelerated new hire integration.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Contributed to hybrid iOS/Android app development using Swift and Kotlin, supporting e-commerce solutions and content-driven applications.
- Applied **MVC and MVVM** patterns across iOS and Android apps, integrating third-party SDKs like Retrofit, Realm, and Firebase Authentication.
- Assisted in migration projects from legacy Objective-C to Swift, modernizing app codebases and implementing SwiftUI for UI components.
- Designed and executed **SQL/NoSQL database schemas**, improving performance of queries and supporting advanced mobile features like offline caching.
- Worked on **CI/CD configuration with Jenkins** to automate mobile build pipelines, reducing deployment cycles.
- Ensured app compliance with **App Store and Google Play guidelines**, handling submissions, rejections, and updates smoothly.
- Participated in project planning, collaborating with stakeholders on timelines and milestones for mobile releases.
- Delivered high-quality documentation for APIs and mobile features to support smooth client handover and future maintenance.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Supported senior engineers in building mobile features for Android and iOS applications using Java, Objective-C, and Swift.
- Learned and applied architectural design principles (MVC, MVVM) while contributing to production-ready modules.
- Integrated APIs with **Alamofire for iOS and Retrofit for Android**, ensuring efficient client-server communication in mobile apps.
- Contributed to implementation of **Firebase Authentication and Analytics**, enabling user management and performance insights.
- Participated in UI development using UIKit and Material Design components, ensuring apps followed platform guidelines.
- Conducted QA testing, debugging, and issue resolution to enhance app stability before releases.
- Gained hands-on exposure with Git workflows and Agile processes, documenting contributions and supporting sprint deliverables.
- Delivered proof-of-concept mobile prototypes, later evolved into production modules by the engineering team.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Developer – Associate
 - Google Associate Cloud Engineer
 - Certified Kotlin Developer (JetBrains)
 - Swift iOS Development Nanodegree (Udacity)
-

PROJECTS

- **E-Commerce Mobile Suite:** Developed iOS/Android e-commerce app supporting payments, order tracking, push notifications, and Firebase analytics, achieving 30% increase in active user sessions.
- **Hybrid Mobile Core (KMM):** Designed shared business logic modules in Kotlin Multiplatform Mobile, reducing duplicated platform-specific code by 45% and streamlining mobile release cycles.
- **CI/CD Mobile Automation:** Implemented GitLab CI with Fastlane for mobile build pipelines, automating App Store/Google Play deployments and reducing release times from days to hours.
- **Cloud-Native Mobile Backend:** Built serverless APIs with **AWS Lambda and GCP Cloud Run**, supporting real-time mobile chat and notification systems with auto-scaling.
