

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior iOS Developer with over 9 years of experience building high-performance mobile applications across iOS platforms using Swift, Objective-C, and modern iOS frameworks. Skilled in mobile architecture, UIKit, SwiftUI, Core Data, and RESTful API integration. Adept at managing full development lifecycle from planning to deployment, with strong expertise in Agile environments, continuous delivery, and scalable code practices. Passionate about creating seamless user experiences and building apps that scale securely and efficiently.

TECHNICAL SKILLS

- **Languages & Frameworks:** Swift, Objective-C, SwiftUI, UIKit, Combine, Core Data
- **Mobile:** Xcode, CocoaPods, Fastlane, XCTest, In-App Purchases, Firebase
- **Backend & APIs:** RESTful APIs, JSON, GraphQL, Node.js (basic)
- **CI/CD & Tools:** Git, GitHub Actions, Jenkins, Bitrise, TestFlight
- **Design & Collaboration:** Figma, Zeplin, Jira, Confluence, Agile/Scrum
- **Security & Performance:** Keychain, Secure Enclave, App Transport Security, Instruments
- **Other:** MVVM, VIPER, TDD, Push Notifications, Localization, Accessibility

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led the architecture and development of two enterprise iOS applications in Swift, introducing modular architecture using MVVM-C and Combine for reactive data flows.
- Optimized performance and app launch speed by 40% through code refactoring and asynchronous initialization of non-blocking components.
- Integrated push notification features and in-app messaging using Firebase Cloud Messaging, supporting user engagement across 3M+ devices.
- Implemented biometric authentication using Face ID and Touch ID to enhance app security for sensitive workflows.
- Developed reusable SwiftUI components and design system libraries to streamline collaboration with the design team and reduce frontend delivery time by 25%.
- Built automated CI/CD pipelines using Bitrise for test, build, and deploy cycles, increasing release frequency by 3x.

- Collaborated with cross-functional teams to localize the app for 7 languages, contributing to a 70% user growth in global markets.
- Mentored junior iOS engineers through pair programming and code reviews, fostering technical growth and consistency in code quality.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Designed and built a B2C eCommerce iOS app using Swift and UIKit, supporting product listings, live inventory updates, and secure Stripe-based checkout.
- Integrated real-time analytics with Firebase and Crashlytics to monitor user behavior and reduce crash rate below 0.5% on iOS 14+.
- Developed advanced photo upload and image recognition features using Core ML for AR product placement previews.
- Applied App Store optimization strategies, resulting in a 4.8-star app rating and over 1M downloads within 12 months.
- Coordinated with QA teams to maintain 95%+ unit test coverage using XCTest and snapshot tests.
- Conducted code audits and performance profiling with Instruments to identify bottlenecks, reducing memory leaks by 70%.
- Implemented GDPR-compliant user tracking and opt-in mechanisms using AppTrackingTransparency framework.
- Maintained backward compatibility with legacy Objective-C modules and managed full migration roadmap to Swift.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built and maintained iOS applications targeting both iPhone and iPad, introducing auto-layout responsive UIs and dark mode support.
- Designed local database architecture using Core Data and NSPersistentContainer for offline-first functionality.
- Developed customizable UI widgets using Interface Builder and storyboard constraints to simplify feature extension.
- Worked on background data syncing using URLSession and Background Tasks, ensuring app reliability during network instability.
- Created AR features using ARKit and SceneKit, enhancing interactivity for retail and educational clients.
- Integrated real-time chat and media sharing using Socket.IO, enabling live customer support within the app.
- Created unit, UI, and integration test suites to ensure end-to-end reliability and app performance.
- Participated in weekly sprint reviews and planning meetings to ensure features aligned with product roadmap and stakeholder priorities.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Developed location-based services and geofencing using Core Location and MapKit in a native Swift app for real-time delivery tracking.
- Built custom animations and transitions using UIKit Dynamics and Core Animation for enhanced user engagement.
- Applied app thinning, on-demand resources, and slice-based builds to reduce app size by 30%.
- Deployed internal beta builds via TestFlight and coordinated user feedback sessions.
- Integrated social login SDKs (Facebook, Google) to increase account creation conversions by 50%.
- Participated in codebase restructuring initiatives to align with MVC design pattern and increase testability.
- Developed user onboarding flow with custom gesture recognizers and contextual hints to increase retention.
- Contributed to design workshops to align UI with Apple's HIG standards and accessibility requirements.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in developing iOS features for educational apps including video playback, interactive quizzes, and gamified rewards.
- Contributed to performance tuning of UIKit-heavy screens using lazy loading and layer rasterization.
- Built basic Apple Watch extensions and tested WatchKit integrations.
- Worked closely with backend team to build robust error-handling around slow or failed API requests.
- Added support for multiple user profiles with session management and persistent preferences.
- Integrated SQLite for lightweight local storage and developed sync logic for server-side reconciliation.
- Created technical documentation and API usage guides for internal use.
- Participated in weekly iOS knowledge-sharing sessions and developer onboarding.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ iOS App Development with Swift – Coursera / University of Toronto (2023)
 - ❖ SwiftUI Advanced Masterclass – Udemy (2022)
 - ❖ Mobile Security Fundamentals for iOS – Pluralsight (2022)
-

PROJECTS

- ✓ **PetCare Companion App** – A SwiftUI-based mobile app for managing pet profiles, appointments, sitter booking, and in-app messaging, built as a personal side project aligned with Petme's goals.
- ✓ **iStore AR** – Integrated ARKit to build an in-app shopping experience allowing users to visualize furniture in their homes using LiDAR-supported devices.
- ✓ **SafePass** – Built a secure iOS app with local biometric authentication and encrypted storage for personal credentials.
